

SAMBA on a Macintosh

Overview:

SAMBA is a utility for mapping your UNIX shell account to any of the computers in the labs and classrooms on campus. The following applies:

- The default quota for SHELL accounts is 500 MB.
- If you have problems logging in, ask one of the lab consultants, or visit the Technology Support Center in 211 Lucas Hall.

Usages:

You can create, edit, and save documents directly to your account space.

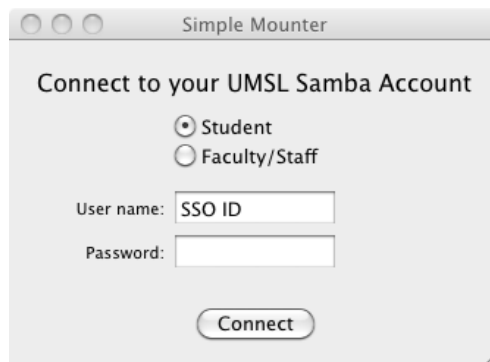

- Drag and drop files directly into your UNIX account
- Stop using FTP to upload your HTML documents
- SAVE your work often in case the computer freezes or crashes!

To Login:

1. Select the Samba Icon from the toolbar at the bottom of your screen.

2. Enter your SSOID user name and password.
3. Click "Connect".

4. Once you login, your UNIX account space will appear as an icon on the desktop with your SSOID on it.
