

Projector Control

Crestron Controller for NEC GT5000

<u>On:</u>	° Turns the projector on. It will take approx. a minute for the projector to warm up.
<u>Off:</u>	° Turns the projector off. It will take a few minutes to cool down and will not power on again until it has finished its cooling cycle. ° Please turn the projector off when finished.
<u>PC:</u>	° Projects the image that is on the computer screen.
<u>LAP:</u>	° Projects the image that is on the laptop screen. ° The laptop must be connected to the designated laptop connection on the podium with a VGA cable.
<u>VCR:</u>	° Projects the video image from the VCR when it is powered on. ° You can control the VCR's Play, Pause, Rewind and Fast Forward functions from this controller as well.
<u>BLK:</u>	° Displays a black screen without powering the projector off.
<u>Volume:</u>	° Adjusts the volume of the computer, VCR, stage microphone and laptop.

Please call **x6852** from the red phone in the hallway with any questions, comments or concerns.
