

Projector Control

SPControl System with HDMI

On :	Turns the projector on. It will take approx. a minute for the projector to warm up
Off :	Turns the projector off. It will take a few minutes to cool down and will not power on again until it has finished its cooling cycle. Please turn the projector off when finished.
CPU :	Projects the image that is on the Instructor computer screen.
Laptop :	Projects the image that is on the laptop screen. The laptop must be connected to the designated laptop connection on the wall with a VGA cable.
Auxiliary Video :	Projects the image from the Auxiliary Video Device. Please make sure the device is plugged into the 3 component connections on the wall.
Black Screen HDMI :	Displays a black screen without powering the projector off. If any component is plugged into the HDMI connection on the wall, it will display this input when selected.

Please call **x6852** from the red phone in the hallway with any questions, comments or concerns.
