

Registering on the UMSL TritonNet Network

Step By Step Instructions

1. Connect to the **TritonNet SSID** (Service Set Identifier)
2. Open your Web Browser. If it doesn't go to the registration page, go to **https://portal.umsl.edu**.
3. Read and Check the UMSL Acceptable Use Policy box and Click **NEXT**.
4. Make sure to read the instructions and requirements sections and **scroll down** to the bottom of the page.
5. The registration form at the bottom needs to be filled out with:
SSO ID
Password
Device Type
Then Click **DOWNLOAD**.
6. Once the "File Download—Security Warning Window" pops-up Click **SAVE or Run**. To save the program to your desktop.
7. On the "Internet Explorer—Security Warning Window", Click **RUN**. Or go to the desktop and **double click the CSA Application**.
8. The program should start running automatically and little pop-ups will tell you what it is scanning. At the end of the scan, a pop-up will say either passed or failed. Either a success or failed page will load. **If the computer passed, you can reboot your system and access the network.**
9. If the computer fails, you will be required to install whatever programs and patches that are listed. Simply **CLICK** on the name of the program and follow the instructions.
10. Once the programs are updated, **Double Click the CSA Application** on your desk top to re-scan your system.

Frequently Asked Questions

Cannot see the Failed Results or Success pages?

Check for Pop-ups or Warnings in your web browser. You may need to re-run the CSA tool to see results.

Running Microsoft Vista?

Make sure you are Admin on the computer before registering.

How do I get a Guest Wireless Account?

Have your Campus Sponsor create you an account or visit our Technology Support Center.

Having Problems with registering?

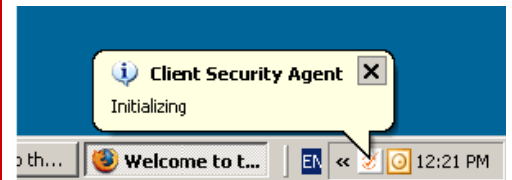

Call the Technology Support Center at 516-6034 or visit their office In Lucas Hall Rm 211.
