E-Mail Quota Policy

The purpose of this policy is to establish the standards for e-mail storage and quota management.

Audience

University of Missouri – St. Louis Computer Users

Policy Statement

It is the policy of University of Missouri – St. Louis Information Technology Services to establish and monitor e-mail quotas for the purpose of e-mail system efficiency and cost minimization while meeting needs for email storage and planning for growth of storage required for the legitimate business needs of our users.

It is the responsibility of the data owner to work with Information Technology Services in complying with said policy.

Processes

All active faculty and staff of the University of Missouri-Saint Louis will receive a mailbox quota size of 300MB during the initial creation of the email account.

The initial email quotas are set to send an informational warning message when a user's mailbox reaches 290 MB.

Users whose mailboxes are set to the default mailbox quota size of 300MB will be unable to send email when the mailbox size reaches 300MB.

If the mailbox size reaches over 310MB, the user will be unable to send or receive email.

Deleted email will be retained for fourteen (14) days and then permanently purged from the system.

When the user is notified that their mailbox has neared, met, or exceeded their quota, ITS encourages the user to perform mailbox management by moving messages into *.pst files instead of storing them on the Exchange servers. ITS encourages the user to work with the TSC initially on mailbox management, and if necessary the TSC will escalate the issue to a system administrator for further resolution.
