

Application for Conservation Biology Internship (Biology 4299(347), Practicum in Conservation)

Students participating in an internship should complete the following form prior to registering for Biology 4299(347). The form should be approved by the appropriate Internship Coordinator at UM-St. Louis (currently, Dr. Patrick Osborne, International Center for Tropical Ecology (ICTE)).

Student: _____

Internship Organization: _____

Contact Person at the Internship Organization (provide: name, address, phone, and e-mail):

Dates of Proposed Internship: _____

Upon completion of your internship, you should submit a final report describing your internship. This report should include the goals of the internship, summary of results, and your evaluation of the impact of the internship on your career goals. Include copies of any products from your internship (e.g., maps, web pages, research papers, etc).

Summary of Proposed Internship (include objectives and final product of proposed internship):

Attach as separate page.

I agree to provide a final report of the internship (approximately 5 pages; this may include a written report or other product for the internship sponsor) to the Internship Coordinator within 1 month of completing the internship. I understand that a grade cannot be awarded in Biology 347 until this report has been accepted as satisfactory by the Internship Coordinator.
