Mission

The mission of the College of Nursing at UMSL is to shape the future of nursing practice through education, research and service. Through innovative baccalaureate, masters, doctoral and professional programs, we develop nurses who are dedicated to excellence and leadership. We leverage strategic partnerships to generate, translate, disseminate and apply knowledge that will improve health, with an emphasis on our metropolitan region.
Core Values

Diversity

We recognize, celebrate and incorporate the value of the diversity in thought and culture in our environment.

Intellectual Discourse & Rigor

We encourage excellence and continuous improvement along with free and open discussion, dialogue and debate of ideas.

Caring

We offer ourselves through empathy, nurturing and mentoring.

Professionalism

We hold ourselves accountable to the standards of professional performance, practice and ethical behavior.

Mutual Respect and Support

We respect the importance of individual strengths and contributions, and support each other to ensure the success of our mission. We have an abundance mentality that drives us to work together to create the future vision we desire.

Transparency

We maintain open and honest organizational and interpersonal communication.
Philosophy

Curriculum Committee Approved Mar. 09

The philosophy of the nursing faculty at the College of Nursing is congruent with the missions of the College of Nursing and UMSL Faculty and staff are dedicated to providing nursing education that prepares graduates as professionals to practice in generalist nursing roles, advanced nursing roles, and as nurse scientists in all health care systems. All academic programs reflect the faculty's beliefs about nursing, clients, health, environment, and nursing education.

The faculty believes that nursing is a profession and an academic discipline possessing a scientific body of knowledge that requires critical thinking, problem solving, and informatics. The primary function of nursing is to educate and assist the client to promote, protect, maintain, restore, and support health, or, to provide for a peaceful death. As a profession, nursing encompasses moral, ethical, legal, and scientific dimensions. Nurses are accountable to society for their practice and responsible for functioning within economic, legal, and moral/ethical parameters. Nursing practice is both theory and evidence based, using theories from nursing and other related disciplines. Nurses synthesize and apply knowledge from the arts, sciences, and humanities in nursing practice utilizing interpersonal communication to meet the complex and multidimensional needs of the client in a variety of health care settings throughout the metropolitan area and beyond. Through leadership and strategic partnerships, this knowledge is further integrated into nursing as research is conducted, disseminated, and used to guide nursing practice, improve healthcare outcomes, and to advance nursing science.

Each human being is unique and complex, with physiological, psychological, spiritual, and socio-cultural developmental characteristics. Individuals respond to their environment differently based on these characteristics, as well as their personal attitudes, values, beliefs, and perceptions. Nurses provide care to the client (individuals, families, communities, and populations) during all of life’s phases. Therefore, nursing practice requires rigorous education with focus on provision of evidence-based, holistic and culturally competent care.

Health is a multidimensional state that requires adjustment to environmental stressors and balance of the physiological, psychological, spiritual, and socio-cultural developmental characteristics. It consists of both subjective and objective components and may be viewed differently by health care providers and clients. Health care involves those activities designed to promote, protect, maintain, restore, and support an optimal state of health though the life span.

Teaching and learning are both dynamic and interactive processes of education. Learning is the active, continuous process of acquiring knowledge and skill that brings about actual or potential changes of behavior. It includes both formal and informal experiences. Learning builds on previous experiences. It is facilitated when the goals and purposes of the new knowledge are clear and relevant to the learner. The goals of learning are defined mutually by the learner and the teacher.

Teaching involves using a curriculum that fosters effective communication and knowledge acquisition. In the rapidly changing health care system, new, innovative, and technologically
competent curriculum models are designed to meet the needs of a global society, including the greater St. Louis metropolitan area, the state of Missouri, and beyond. Effective teachers guide, direct, mentor, and evaluate learning while encouraging critical thinking, self-direction, creativity, and independence.

Nursing education guides the learner to attain the knowledge, skills, and attitudes required to practice professional nursing. It is designed to meet the needs of students who have unique and diverse backgrounds. Nursing education best occurs in a non-threatening, supportive environment that fosters student growth and professional development. Preparation for nursing practice includes providing health care experiences to clients from diverse cultural backgrounds, across the life span, and in a variety of settings.

Professional nursing education is a lifelong endeavor, consisting of formal and continuing educational strategies and should be available to individuals with diverse cultural, experiential, and academic backgrounds. Baccalaureate education prepares the nurse generalist for professional nursing practice. Master's education focuses on the integration of advanced knowledge and skills within a particular practice context to improve the health care of individuals and populations through the provision of nursing care that is scientifically, ethically, and holistically grounded. In addition to a mastery of their specialty content, master's level nurses are critical thinkers who have advanced knowledge and skills in the areas of leadership, informatics, health care policy, and research utilization for evidence based practice.

Doctoral level nurse scientists use theory and implement research methods to improve nursing practice and science. Doctoral level nurse clinicians improve health outcomes through the translation of research into advanced nursing care of patients, families, communities, and populations.

Approved 2009 by Faculty Association
Introduction

Although attending classes, learning, and earning good grades are the most important activities you will engage in at the College of Nursing, there is just a bit more to negotiating University life successfully. Understanding the information and guidelines in this handbook will enhance your life as a student.

This handbook, produced by the Office of Student Services at the College of Nursing, will assist you with administrative details, College services, and University life. When you begin your first clinical (Pre-licensure track) or enter your initial Nursing class (BSN-Completion track or the Graduate Program) you will receive an additional handbook, the Student Information Guide, which will offer academic guidance through your curriculum.

We hope you find this handbook helpful.
Office of Student Services

The Office of Student Services is here to serve you.

Student Services Staff can assist you in a variety of ways. Advising, registration, and referrals to University services are offered to nursing students through Student Services. Should you have a problem or a conflict of any kind, please come to the Office of Student Services. If the staff at Student Services cannot resolve it, they will refer you to the person who can. Questions about the curriculum, prerequisites, and course requirements should always be directed to an advisor in Student Services.

Student Services is located on the South Campus of the University in the Nursing Administration Building, 1st floor.

Transcript Evaluation

Pre-licensure & Completion Students

General education courses taken at another college or university are evaluated for transfer by the appropriate faculty or the Degree Audit Reporting System (DARS). Freshman students who have taken courses while in high school must submit official transcripts from the college or university through which the courses were taken.

Nursing courses taken at another nursing school are evaluated for transfer by the College of Nursing faculty member who teaches the course. It may be necessary to bring in syllabi from the nursing courses for evaluation.

Students can request a degree sheet listing all transfer and/or UMSL courses applicable to the program from an advisor in Student Services. A DARS report, which is an automated record of degree progress, is available from an advisor or online at http://www.umsl.edu/services/dars/

Students dismissed from other nursing programs are not eligible for admission to the College of Nursing at UM-St. Louis. In addition to transcripts, a student applying for transfer must submit a letter stating that he/she resigned from the other program in good standing.

All transferable college level work will be included in computation of the cumulative grade point average (GPA). For courses that have been repeated, both the original and the subsequent grade will be calculated.

Graduate Students

A student wishing to transfer courses during the first one-third of the program must submit syllabi and course descriptions for faculty evaluation.
Advising and Registration

New Students

Students who are attending the College of Nursing pre-licensure track are required to meet with an advisor through their first academic year. The advisor will review all course requirements and evaluate transcripts, if applicable.

International or Permanent Resident Students

Students with International status are required to take English as a Second Language (ESL) assessment at the University. Based upon the assessment students may be required to complete recommended ESL courses prior to enrolling in Nursing courses.

Outreach Students

After the first semester, students attending classes at outreach sites will receive an email with registration instructions from Veronica Hayes.

Current Students

We hope to make the registration process as easy as possible for you. Shortly before registration time, you will receive two emails; one from the registrar and one from the College of Nursing, both sent to your UMSL email address. The email from the Registrar will include your registration date and time, which are assigned by class standing: graduate students and seniors first, juniors next, etc. Be aware that it is not an appointment. It will be impossible for you to register officially until the date and time assigned by the Registrar; however, when the schedule of courses is available online, you may pre-register on or after the first date of registration in the Office of Student Services by an appointment with an advisor. Depending on your program, you will register in one of the following ways:

<table>

</tr>
</tbody>
</table>
Prelicensure BSN Program: Students will be allowed to pre-register in Nursing anytime on or after the first day of official registration. All nursing courses require a special consent number, so you must register in one of the manners listed below.

Please note these special circumstances:

- Students who have not sent final transcripts from all schools attended cannot register.
- Students registering for any clinical course must make an appointment to see an advisor. Express registration is not available for clinical registration.

To Register with an advisor:

1. Make an appointment with an advisor (516-6066). You may preregister to hold your space in nursing courses or wait for your assigned date and time.
2. Before your appointment, view the course schedule on the web site at www.umsl.edu/curriculum/COURSES/. Print and complete the following course request form.
3. Bring your completed course request form to your advising appointment. If you are preregistering, the advisor will hold your course request form until your assigned date and time, register you, and then you can view and print your schedule on MyView. Your fee statement will be sent to your UMSL email address by the Cashier's office.

To Express Register for preclinical courses only:

1. View the course schedule on the web site at www.umsl.edu/curriculum/COURSES/. Print and complete the following course request form.
2. At the bottom of the course request form, check Express Registration, sign, date, and drop off the form in Student Services anytime on or after the beginning of pre-registration.
3. An advisor will approve your schedule, register you for classes, you can view and print your schedule on MyView. Your fee statement will be sent to your UMSL email address by the Cashier's office. IMPORTANT: If you request a course section which is closed or a course for which you have not met the prerequisites, an advisor will telephone you. She will not automatically substitute another section or course.
Senior Level Students
Undergraduate

Seniors must make an appointment to meet with an advisor for an advising audit during the semester prior to graduation to verify that all requirements will be completed by the anticipated graduation date.

Students will not be permitted to register for their final semester until all transcripts from colleges/universities they have attended, other than UM-St. Louis have been received and all proficiency requirements and/or tests have been passed. Any video courses taken in the final semester must be completed before the last regular day of classes.

Graduate Students

One year prior to graduation, graduate students must make an appointment to meet with an advisor for an advising audit that will verify that all requirements will be completed by the anticipated graduation date.
Degree Requirements

BSN Pre-licensure

Satisfactory/Unsatisfactory (Pass/Fail) Grading
Undergraduate nursing majors may not take required prerequisite general education or nursing courses on a satisfactory/unsatisfactory basis.

General Education
The following courses satisfy the general education requirements of the University as well as those of The College of Nursing. All prerequisites for these courses must be met.

Communications
EN 1100 English Composition (3)
Interpersonal Communications (3)

Junior Level Writing
EN 3100 or 3110 (3)

Managing Information Skills
Health Profession Chemistry (or its equiv.) (4)

Valuing Skill
Economics (3)

Social and Behavioral Sciences Knowledge
General Psychology (3)
Human Growth and Behavior (3)
Social Science Elective* (3)
American History/Government (or its equiv.) 3½ Missouri State Requirement (3)

Humanities & Fine Arts
Philosophy (3)
Humanities elective** (3)
Humanities elective** (3)

*3 credit hours from any of the following areas: Sociology, Psychology, Anthropology, History, Geography, Criminology, Political Science

**Humanities
9 hours (minimum) Philosophy (3 credits) and two designated courses (6 credits) from the following areas: art history or appreciation; literature; music history, theory or appreciation; philosophy & logic; theater history or appreciation. (Applied art and music do not meet requirement.)
Mathematics & Life/Natural Sciences
College Algebra (or its equiv.) (3)
General Biology (3)
Anatomy & Physiology I (4)
Anatomy & Physiology II (4)
Microbiology (3)

Nutrition
NS 2103 (or its equiv.) (3)

Statistics
SOC 3220 or NS 3799 (or its equiv.) (3)

Please Note: Effective Spring 2006 clinical courses must be completed within 5 semesters from beginning the clinical sequence. Students who have not taken a clinical course for 4 semesters will be required to repeat all clinical courses previously taken.

Clinical Major Application
Spaces for the clinical nursing major are assigned on a competitive basis for each admission period. Applicants must meet the following criteria:

- Minimum 2.5 cumulative GPA (4.0 scale) GPA calculated on all attempts of all transferable coursework.
• Completion of all prerequisite courses
• *Minimum 2.5 cumulative GPA in Chemistry, Anatomy and Physiology I and II, and Microbiology *first attempt calculated only
• Required science courses completed within 10 years prior to enrollment

Application Process for Clinical Major
To be considered for the clinical major, students must file a separate application available through the College's website or the Office of Student Services. Students should complete an application for clinicals during their last semester of enrollment in prerequisite coursework and send the following:

* Completed College of Nursing clinical application

Application deadlines: For fall semester clinicals, apply by February 1st; for spring semester clinicals, apply by October 1st.

Clinical Experiences
Students provide their own transportation for clinical experiences and do not choose their clinical sites. Although most clinical experiences are scheduled Monday through Friday, there are exceptions. For example, students enrolled in N4310, Senior Synthesis, have day, evening, night, and/or weekend clinical experiences that often include 12 hour shifts.

A student's progression through the program varies depending on course availability and the number of general education requirements, which need to be met. Nursing classes for the BSNC track may be offered only once per year.
Graduate Program - MSN

The following four (4) pages represent suggested plans of study for graduate students pursuing their degrees full or part time. The nurse practitioner programs require 43 credit hours for graduation. The nurse educator program (shown in second matrix) requires 33 credit hours for graduation. *Please note:* Study plans are samples. A student's progression through the program may vary.

Other Advising Issues

To Add and/or Drop Course(s)

General Education Courses
It is recommended that students who wish to add or drop a general education course should check with their advisor to verify what effect, if any, this action may have on their progression.

Nursing Courses
To drop or add nursing courses students must meet with an advisor.

1. Withdrawal from individual courses must be completed by the student following the guidelines outlined in the University Bulletin. (Cessation of course attendance alone is NOT considered official withdrawal from course work.) In order to withdraw passing, the withdrawal must occur before the specified dates as outlined in the Schedule of Classes online. It is suggested that students meet with faculty if withdrawing from a course after the specified dates outlined in the Schedule of Classes as faculty have a choice of allowing you to withdraw with an Excused grade (EX), or with a grade of F. The grade you receive will depend on your progress in the course at the time of withdrawal.

2. Students may NOT enter a nursing course after the first week of the term. No credit will be allowed for a course in which the student is not formally registered.

3. See Fee Reassessment section of the Cashiers web page for Refund Policy.

Withdrawal from the University

If a student finds it necessary to withdraw from all courses, the student must see an advisor to complete the appropriate forms.

Grade Modification

When the grade received in an initial attempt in an undergraduate course at UM-St. Louis is a D+, D, D- or F, the grade may be replaced in the calculation of the GPA by the grade received in a second or subsequent attempt of the same course at UM-St. Louis. All grades received in second and subsequent attempts will be included in GPA calculations. A maximum of 15 hours may be dropped from the calculation of the students GPA. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation, which states that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated and grade modified.

Please note: Grade modification is NOT automatic. After completing the second or subsequent attempt of the course to be modified, students must process the necessary paperwork with an academic advisor.
Please note: When calculating the GPA for admission to the BSN Clinical Major, all attempts of all courses taken at the University and transferable course taken at other institutions will be calculated in the GPA regardless of grade modification.

**Independent Study Guidelines**

Independent study is available as an elective means of increasing knowledge within the student’s content area. The course number - NS 3873 (Undergraduate level) or N 6875 (Graduate level), is listed in the course schedule with names of available faculty. The following guidelines are to be followed:

1. The student is responsible for identifying and initiating contact with a faculty member in whose content area the student is interested.
2. The student and faculty member must establish mutually agreed upon course objectives and evaluation criteria. The agreement is to be recorded on a form, which may be obtained from an academic advisor. This form must be completed PRIOR to registering for the course.
3. The faculty member provides guidance as needed throughout the course; the degree of independence will vary with student learning objectives.
4. Credit allocation can vary from one (1) to three (3) credits per semester depending on the nature of the objectives and content requirements. Credit value is calculated as one (1) classroom hour per week = one (1) semester credit. No more than six (6) independent study credits may be used to meet graduation requirements.

**Delayed Grades**

Delayed grades may be given when a student’s work is of passing quality but is incomplete because of circumstances beyond the student’s control. Although delayed grades do not affect a graduate student’s grade point average, they are an important factor in evaluating academic progress. Delayed grades must be removed within one academic semester for undergraduate students or two academic semesters for graduate students after the time recorded or they automatically become F grades. In such cases, course instructors may subsequently change F grades to other grades on their progress in a sequential course and indicate that a grade will be assigned at the end of the sequence.

Please note:

1. It is the student’s responsibility to request the delayed grade. Faculty may choose to deny the request.
2. Incomplete grades in prerequisite courses must be removed before enrollment in course work for which the prerequisite is required.
Mathematics Requirement - Undergraduate

The math requirement is dependent on the semester you originally enrolled as a degree-seeking student at the University. This may not be the same semester you began your nursing courses. For example: you may have entered the University Fall Semester, 1995 as an undeclared student in the College of Arts & Sciences. In the Fall Semester, 1996 you made a division change and were accepted into Nursing. Your math requirement would be consistent with the requirements for Fall Semester, 1995.

Requirement Beginning Fall Semester 1998

Proficiency in the basic mathematical skills area will be demonstrated by obtaining either:

1. A grade of C- or better in a college-level mathematics course having at least intermediate algebra as a prerequisite, or
2. A 26 or above on the Missouri Math Placement Test. The test may be taken, at most, twice.

Please note: You must take the Placement/Proficiency test and fulfill the math requirement within your first year of enrollment at the University of Missouri-St. Louis. A sample of the test may be found at [http://www.umsl.edu/services/css/testing_center/index.html](http://www.umsl.edu/services/css/testing_center/index.html). Dates and times of the test are in the current course schedule.

UMSL Math Placement Test
If you score below 16, you need to enroll in Math 0001 or 0002

New Prerequisites for Math 1020 and Math 1030

**Math 1020**
A score of 22 or higher on the ACT Math sub-test; or grade of C or better in a two or four year college intermediate algebra course; or a score of 16 or higher on the UMSL Math Placement Test, Obtained in the six month prior to enrollment in this course

**Math 1030**
A score of 22 or higher on the ACT Math sub-test; or grade of C or better in a two or four year college intermediate algebra course; or a score of 22 or higher on the UMSL Math Placement Test, Obtained in the six month prior to enrollment in this course

Residency Requirements

BSN students must be in residence for at least 24 of the last 30 hours of graded credit. (Exclusive of courses graded on Satisfactory/Unsatisfactory basis), except under unusual circumstances to be decided by the Dean.

MSN students must complete the final 2/3 of their curriculum at UMSL
Taking Courses at Another Institution

Students are required to meet with an advisor before registering for a course at another College/University while attending UM-St. Louis. The advisor will complete an approval form (see appendix) that lists the course and its UM-St. Louis equivalent.

Re-entry Admission for Undergraduate Students

1. Students who do not attend UM-St. Louis continuously (i.e. miss one semester) must submit a request to re-enroll form (see appendix) to the Admissions Office. A 2.5 GPA is required for re-admission. If another college/university has been attended during the students absence from UM-St. Louis, current transcripts must be submitted. (Students who reenroll must meet the admission criteria required at the time of reenrollment.)

2. If a student withdraws from college course work, he/she will enter into the nursing curriculum in effect at the time of re-entry. If there have been curriculum changes during his/her absence, the student will need to consider those changes in plans for graduation.

3. Students must complete all clinical courses within a five year period. A student who has not taken a clinical course for four semesters must repeat the entire clinical sequence (Semester V through Semester VIII).

4. If a student is deployed into the United States Armed Services while enrolled in clinical courses, spaces will be available in the same clinical courses when the student returns from military duty.

Re-entry Admission for Graduate Students

Students who do not attend UM-St. Louis for one academic year must submit a re-enrollment application to the Graduate Admissions Office.

Division Change

Any student currently enrolled in the College of Nursing who wishes to change his or her major must submit a Division Change Form (see appendix) to the appropriate College or School at UM-St. Louis. Likewise, any student who is a current UM-St. Louis student, but has not been accepted into Nursing and wishes to, must fill out a Division Change Form to be presented to the Office of Student Services at the College of Nursing.
Retention Services

Clinical nursing coursework is a unique academic experience. The College of Nursing wants to provide all students with the tools and support necessary to maintain academic performance expectations and remain in the program. Within the College of Nursing, retention services are provided by the Retention Coordinator. Services include information and guidance for students who are at risk for course failure or who are not achieving their full potential. Students who feel they are having difficulty with the academic challenges of the clinical nursing semesters are encouraged to seek the assistance of the Retention Coordinator as early in the semester as possible. Faculty refer students directly to the Retention Coordinator if they identify a student to be at risk for course failure. In addition to individual student appointments, multiple workshops throughout the semester provide students with information vital to successful academic performance. The Retention Coordinator works closely with the program directors, student services staff, and resources across the campus to provide academic support to all nursing students. Students may contact the office of Student Services at (314) 516-6066 to schedule an appointment.
Student Academic Policies

Undergraduate Student Policies

Academic Alert Course Referral
The University of Missouri - St. Louis utilizes an electronic Academic Alert system that allows faculty to refer students to academic supports early in the term. When a faculty member recognizes early signs of course failure, he/she can initiate an Academic Alert. Referrals steer students to campus resources and academic supports designed to help them successfully complete the course. An Academic Alert referral is not noted on campus transcripts; it is a mechanism to support learning and provide students with direct access to campus resources.

1. Every undergraduate nursing course will provide a syllabus that details the specific evaluation criteria and methods. Students in the College of Nursing are expected to meet those criteria to successfully achieve the objectives of the course.
2. To be successful, students must achieve a theory grade of C (76%) or better on exams/tests as well as maintain satisfactory progress in the clinical/laboratory in order to successfully pass the course.
3. An Academic Alert referral will be completed by the course faculty on any student who is near or below the criteria of a theory grade of 76%, is not meeting performance standards for the course, or is not satisfactorily meeting the clinical requirements of a course. An Academic Alert referral is designed to make students who are having academic difficulty aware of the variety of resources available within the College of Nursing and across the campus.
4. An electronic copy of the Academic Alert referral completed by the faculty will be forwarded to the student, the Center for Student Success, and the College of Nursing Retention Coordinator. The student is expected to meet with the faculty member completing the Academic Alert form and the Retention Coordinator for further assistance. In addition, the Director of the BSN program and Academic Advisors will have access to the system and be able to view Academic Alert referrals.

Testing

Many schools of nursing administer one or more standardized examinations to students enrolled in their basic nursing program(s). The faculty of the College of Nursing has implemented a standardized examination plan to test all students enrolled in the pre-licensure track of the BSN Program. This examination plan seeks to achieve the following goals:

1. Assess student progress in achieving a professional nursing knowledge base as measured against a national pool of other baccalaureate-nursing students;
2. Identify those students with a deficient nursing knowledge base and assist them to develop strategies to improve this knowledge base;
3. To identify those students whose nursing knowledge base precludes their continuation in the College's baccalaureate program;
4. To strengthen students' performance on the national nurse licensure examination (NCLEX-RN). Updated Standardized Testing Policy - Fall, 2009

Nursing Content Examinations

Students enrolled in clinical nursing courses will take standardized content area examinations for designated courses. The Director of the BSN Program and the Standardized Testing Coordinator, in consultation with faculty teaching in the BSN Program, will determine those courses and standardized tests to be administered. The content areas to be tested will include, but may not be limited to:

- Fundamentals of Nursing
- Pharmacology
- Adult Health Nursing
- Mental Health Nursing
- Nursing of Women and Childbearing Families
- Nursing of Children
- Community Health Nursing
- Management and Leadership in Nursing

For nursing courses associated with a standardized testing exam, **no student will be given a course grade until the stipulated examination for the nursing content area has been completed.** Course faculty will electronically verify completion of the exam prior to submitting the final grade.

While standardized content examinations are not a component of any particular course, faculty have the option of including the standardized content examination in the calculation of the course grade for the content area tested. If the examination is not included as a component of the course grade, students are still required to complete the standardized testing examinations as a component of the BSN program. Proficiency standards for each content examination are an expected outcome regardless of whether the exam is used as the course final. Course grades are not equivalent to proficiency standards.

**Rationale:**

Each content area examination is designed to measure the student's knowledge of a specialized area of professional nursing practice. The examination measures each student's knowledge of a content area and compares the student's performance with a national pool of nursing students also completing the examination.

**Related Procedure:**

1. Standardized content examinations are administered in the Online Testing Center. During the semester in which each exam is to be completed, the Standardized Testing
Coordinator will communicate to students and the course faculty the dates the examination may be taken. **Students are responsible for scheduling a test time in the Online Testing Center to complete the exam.** Courses utilizing the corresponding ATI Content exam as the course final are the exception to this process. Students are to complete the ATI exam as instructed by course faculty.

2. When students enrolled in the course have completed the designated examination(s), they will receive the result report electronically. The class composite results will be assimilated electronically and reviewed by the BSN Program Director and the Standardized Testing Coordinator. Individual and normative scores will be shared with course faculty of record.

**Importance of Testing Outcomes for Student**

1. Proficiency levels have been established by the faculty for each of the content areas tested. Proficiency reflects a student's "fairly certain" predicted probability of passing the NCLEX-RN exam.

2. Any student who does not achieve proficiency on any standardized content area examination will be required to complete a remediation process for that content area as assigned by the Standardized Testing Coordinator.
   - For each ATI content exam below proficiency, the student is to complete the assigned standardized remediation process. Details of the remediation process will be communicated to students via the campus email system.
   - Deadlines for the completion of the remediation process will be approximately two weeks prior to the subsequent semester's registration date.

3. Any student who does not complete the assigned remediation process by the established deadlines will not be allowed to register for the upcoming semester. Course registration will be held until all components of the remediation process have been completed.

4. Students who remain out of compliance with the remediation policy and process at the beginning of the following semester will not be allowed to enroll.

5. For students who are graduating and remain out of compliance with the remediation policy and process, release of student's transcript to the State Board of Nursing will not occur until all phases of the remediation process are completed.

**Comprehensive Nursing Content Examinations**

Students enrolled in NS 4310: Senior Synthesis will be required to take standardized computer-based exit examinations as stipulated by the Director of the BSN Program and the Standardized Testing Coordinator in consultation with faculty teaching in the BSN program. The first comprehensive examination will be completed within the first four weeks of the semester and the second comprehensive examination will be completed in the final two weeks of the semester.

**Rationale:**

This test assesses the student’s comprehensive nursing knowledge of selected nursing practice areas (e.g., adult, children’s, women’s, and mental health). Detailed score reports are provided for individual as well as group performance.
Importance of Testing Outcomes for Student

1. The first comprehensive exam is designed to assess the student's level of NCLEX-RN preparedness at the beginning of the final semester. If the student receives a score that predicts marginal performance or less as the likelihood of success on the NCLEX-RN licensure examination, the student will be required to engage in a learning contract aimed at addressing areas of individual deficiencies. The learning contract must be completed according to the contract timeframe set in coordination with the Standardized Testing Coordinator.

2. Proficiency standards for the predicted probability of passing NCLEX-RN are set according to the following guidelines for the first attempt at the ATI Comprehensive Predictor exam:
   a. 91% or above - no remediation
   b. 85-90% - create and review Focused Review of exam, complete each of the ATI NurseLogic modules with a minimum of 2 total contact hours, complete ATI "RN Comprehensive Online Practice: Rationales 2010A" with a score of at least 90%, complete NCLEX Final Exam (150 ques) in ATI Learning System module with score of 90% or better; Standardized Testing Coordinator will track progress via the ATI website to ensure you satisfy the program remediation requirements - you do not need to print and turn in your score sheets
   c. 75-84% - remediation as above and meeting with faculty to create Learning Contract for review; one follow-up meeting to ensure completed
   d. 74% and below - remediation as above and meeting with faculty to create Learning Contract for review; bi-weekly meetings to track progress on Learning Contract

3. Authorization for the student to take the NCLEX-RN will not be provided until the student has completed the learning contract with the Standardized Testing Coordinator and the BSN Program Director has been notified.

4. The second comprehensive exam is designed to assess the student's level of NCLEX-RN preparedness at the completion of the final semester.

5. Proficiency standards for the predicted probability of passing NCLEX-RN are set according to the following guidelines for the second attempt at the ATI Comprehensive Predictor exam:
   a. 95% or above - no remediation
   b. 90 - 94% - NCLEX review course of his/her choosing
   c. 89% or below - In-class NCLEX review course focusing on nursing content and meeting with faculty to create Learning Contract for review
   d. Students who are remediating the second attempt at the ATI Comprehensive Predictor exam are strongly encouraged but not required to schedule a meeting with the standardized testing coordinator to establish a post-graduation Learning Contract that further prepares the student for the NCLEX-RN

6. Release of student's transcript to the State Board of Nursing will not occur until all phases of the remediation process are completed.

Related Procedure:
1. The test is administered in the Online Testing Center. The Standardized Testing Coordinator will communicate to students and the course faculty the dates the examinations may be taken. Students are responsible for scheduling a test time in the Online Testing Center to complete the exams.

2. When students enrolled in the course have completed the designated examinations, they will receive the result report electronically. The class composite results will be assimilated electronically and reviewed by the BSN Program Director and the Standardized Testing Coordinator. Individual and normative scores will be shared with course faculty of record.

**Student Counseling Form**

1. The Student Counseling Form is a warning notice that is issued to alert the student of a situation that may lead to course failure and/or program dismissal.
2. The Student Counseling Form provides a written description of the situation as it relates to course objectives or program policies.
3. The Student Counseling Form will identify remedies to resolve the problem.
4. A date for re-evaluation of the student behavior/situation will be provided.
5. The faculty, Student Services, the Program Director, and the Retention Coordinator will maintain copies of the Student Counseling Form.

**Probation - Undergraduate**

Students will be placed on probation if their cumulative grade point average falls below 2.5. The Office of Student Services will notify students:

1. When placed on probation
2. When removed from probation.

While on probation students will **NOT** be allowed to enroll in clinical courses, however, students may continue in non-clinical nursing courses. Students are allowed to continue on probation for two (2) semesters excluding summer.

**Probation - Graduate**

Graduate students will be placed on probation if the transcript GPA based on a minimum of 3 courses (9 hours) falls below 3.0, or if the College of Nursing regards progress as unsatisfactory. The student will be placed on probation for one semester; during which time progress will be formally reviewed by the appropriate departmental committee. After one semester the student will be removed from probation, continued on probation, or dismissed. A student may not continue on probation for more than one calendar year without permission of the Dean of the Graduate School. Probation letters will be sent out by the College, with copies sent to the Graduate School.
Dismissing - Undergraduate
Dismissal from the College of Nursing at UM-St. Louis occurs for the following:

1. Failure to complete a probationary period satisfactorily.
2. Irresponsible, unsafe or unprofessional behavior as determined by the College or University. (See Program Requirements and University Student Conduct Code)
   a. Failure of any three general education courses which serve as prerequisites to nursing courses; General education courses, which are required for University graduation but are not prerequisites to nursing courses may be satisfactorily completed with a grade of D. Examples are American History, Political Science, Humanities (other than Philosophy) or their equivalents and do not count towards repeated failures.
   b. Effective, Fall 2003, Failure of two nursing courses. All courses with an "N" prefix are included in this policy. Failure is defined as receiving a grade of "D" or "F" in nursing courses, or general education courses that serve as prerequisites to nursing courses.
   c. Failure of one nursing and two general education courses (which serve as prerequisites to nursing courses)
3. 
   a. Failure to earn a satisfactory grade (C or above) in a required nursing course which he/she is repeating.
   b. Failure to earn a satisfactory grade (C- or above) in a general education course, which is a pre-requisite to a nursing course which he/she is repeating.
4. The falsification of any information provided to the College or University on any record.

Dismissal - Graduate
A graduate student can be dismissed from the Graduate School on the recommendation of the College and the concurrence of the Graduate School. A student can be dismissed for failing to maintain a 3.00 GPA and for receiving a C+ or less in two graduate courses or in one graduate course twice. The Graduate School will send out dismissal letters with copies sent to the graduate advisor and the Admissions Office. The Graduate School will send notification to the Registrar's Office.

Problem Resolution/Appeals
Grade Appeal Procedure
On each campus of the University of Missouri it is the Chancellor who is ultimately responsible to the President and the Board of Curators for all campus programs, policies and activities. On the University of Missouri-St. Louis campus, the Chancellor has delegated responsibility for overseeing the grade appeal process to the Provost. The Provost is therefore responsible for assuring that grade appeals are handled in a fair and timely manner. More specifically, that officer is responsible for seeing that the procedures outlined below are appropriately followed.
Application of this Policy:

Students are responsible for meeting the standards established for each course they take. Faculty are responsible for establishing the criteria for grades and evaluating students' academic performance.

The grade appeal procedure is to allow only the review of allegedly capricious grading. It is not intended as a review of the instructor's evaluation of the student's academic performance.

Capricious grading is defined as any of the following:

a. The student's grade was assigned on the basis of factors other than performance on the graded material (e.g. homework, examinations, papers) or performance in the course (e.g. class participation, absences).

b. The student's work was graded with more demanding standards than were applied to equivalent students in the course; (Note: Different grading criteria are expected of graduate students enrolled in 4000-level courses.)

c. The instructor assigned a grade using standards that were substantially different from those previously announced or stated in the syllabus.

Informal Procedures

At any time after the awarding of a grade, for a course or an assignment in a course, a student may discuss the grade with her or his instructor and request that the instructor review the grade.

Formal Procedures

The following procedures apply if the above informal procedure does not resolve a dispute concerning a grade to the student's satisfaction and if the process is initiated within thirty working days of the start of the first regular semester (fall or spring) following the semester for which the grade was given, or thirty days after the assignment of the grade (whichever is greater).

1. If the student has not already done so, he or she discusses the contended grade fully with the course instructor (1). The student should prepare for this meeting by taking all relevant written work (test, reports, etc.) with her/him. If the issue is not resolved, and the student wishes to pursue the appeal, she or he should consult the level Program Director of the department (BSN, BSN-C, MSN, Ph.D.) housing the course in question. (This will normally be someone below the level of the Dean.) The Program Director will discuss the appeal with the course instructor and will inform the student of the result of this discussion. (That result may be the instructor's agreement to change the grade, her or his refusal to change the grade, or her or his agreement to discuss the case further with the student.) The Program Director may require that the student put the appeal in written form before the Program Director discusses it with the instructor.
2. If the matter remains unresolved, the student may, within 10 working days of being notified of the result of the discussion between the Program Director and the instructor, or within 10 working days of her or his last discussion with the instructor, submit a detailed written statement of the complaint to the Program Director. The Program Director will refer it to the Student Affairs Committee composed of at least three faculty members from the College of Nursing. This Committee will investigate the matter, meeting, as it may deem necessary with the student, the instructor, and possibly others. Following its inquiries and deliberations, but prior to making its final recommendations, the Student Affairs Committee will submit a copy of its findings to the course instructor. If the course instructor elects to comment on the findings of the Committee, this must be done in writing within 7 working days. After further consideration, but within 30 working days after receiving the student's statement, the Student Affairs Committee will submit its findings with its recommendations and reasons for those recommendations directly to the course instructor, with a copy to the Program Director.

3. If the Student Affairs Committee recommends that the grade be changed, the Program Director will ask the instructor to implement the recommendation. If the instructor declines, the Program Director will change the grade, notifying the instructor and the student of this action. Only the Program Director, upon the written recommendation of the Student Affairs Committee, will effect a change in grade over the objection of the instructor who assigned the original grade.

4. If the Student Affairs Committee recommends that the grade not be changed, the Program Director will notify the student of this action. The student may then appeal to the Dean of the College of Nursing who will determine whether the above procedures have been properly observed. If the Dean determines that the procedures have not been appropriately followed, and that their not being followed may have substantively affected the outcome, the case will be returned to the Student Affairs Committee for review by the same, or, if the Dean so determines, by a different committee.

5. If the Dean denies the procedural appeal the student may ask the Vice Chancellor for Academic Affairs, acting as the Chancellor's designee, to conduct a procedural review. The Vice Chancellor is not obligated to conduct such a review and will normally do so only where there is compelling evidence of procedural irregularities. If the Vice Chancellor finds the procedures have not been appropriately followed, and that their not being followed may have substantively affected the outcome, the case will be returned to a lower level for re-review. As the Vice Chancellor is acting as the designee of the Chancellor, there is no appeal beyond this level.

¹ If the instructor is deceased, cannot be located, or is otherwise unable or unwilling to reconsider the grade, the student should consult directly with the level Program Director of the College of Nursing. The remaining procedures here specified will be followed except that the Program Director and the Student Affairs Committee will not consult with the instructor if she or he is unavailable.

² Under current campus policy, transcript notation of "DL" automatically becomes an F after one regular semester. This change, which the Registrar is mandated to make, is not considered grade changes and are consistent with this Grade Appeal Policy. Students may appeal this change provided the appeal is initiated within 30 working days of the notification of the change.
Grievance Concerning Discrimination

Any grievance or complaint (informal grievance) that alleges discrimination based on race, color, religion, sex, national origin, age, or disability - especially concerning admission to and retention within the College of Nursing shall be treated according to policy of the board of Curators entitled "Discrimination Grievance Procedure for Students". Students claiming a grievance under this policy are referred to the Office of the Vice Chancellor for Student Affairs for the specific procedures to be followed in the event of such a grievance.

Grievance Concerning Other Issues. See University Bulletin

While the problem resolution procedure is in process, the student may remain enrolled in the program.

Student Responsibilities

Program Requirements

The following are program requirements for students. Each student will be expected to meet these requirements or be subject to disciplinary action and may be ineligible for program progression.

1. Professional appearance may be defined as, but is not limited to:
   a. Maintenance of professional attire and appearance
   b. Adherence to agency dress-code requirements
   c. Display of appropriate professional and University identification

2. Professional conduct may be defined as, but is not limited to:
   a. Protection of patient rights and privacy
   b. Maintenance of patient confidentiality
   c. Academic Honesty (see Student Responsibility)
   d. Delivery of safe nursing care
   e. Prompt reporting of mistakes, errors, accidents or unusual circumstances to supervising faculty and appropriate health team staff
   f. Adherence to policies of clinical agencies and those of individual courses.
   g. Functioning under the specific direction of faculty
   h. Courteous and respectful interpersonal interactions
   i. Prepared, present and punctual

A faculty member has the authority to remove a student from an academic activity if the student's behavior is irresponsible, unsafe or unprofessional.
E-Mail/Internet Access/Password

As part of the computing fee, all students are provided with a free e-mail account automatically upon enrollment. No additional registration is necessary. E-mail can be accessed at any computer lab on campus. Student e-mail addresses are in the following format: yoursoid@studentmail.umsl.edu …where “your soid” is your own SSOID. Default passwords for SSOIDs have been created using a combination of birth date and social security number*. The format of the new password is yydd9999 where:

yy = year of birth; dd = date of birth; 9999 = last 4 digits of SSN
Computer Labs
Computing facilities at the University of Missouri provide access to powerful computing resources, which are available to students, faculty, and staff for educational, research, and administrative needs. Access to local facilities is provided by the Student Computing Fee. Six Advanced Technology Classrooms (ATC's) are available in the Computer Center Building. Each room is equipped with a state of the art projection system and a computer at each student desk. Two rooms contain Apple Macintoshes, three rooms are equipped with DOS systems and the remaining room has Sun workstations. One ATC, equipped with Apple Macintoshes, is available on the South Campus. Other computer labs are available throughout the campus:

SSB 103
Benton Hall 232
Clark Hall 419
South Campus Computer Building 200
Thomas Jefferson Library 234
SSB 409 (Writing Lab)
SSB425 (Math Lab)
SSB 452

Computing Services office telephone number is 516-6000. Questions concerning open student labs and general information should be directed to the Help Desk at 516-6034.

Computer Proficiency Requirement

The College of Nursing requires all students to be computer proficient prior to entering their clinical courses.
Students must indicate proficiency in the following:

- Logging on to the University's portal (mygateway.umsl.edu)
- Send, receive, and respond to web-based email on and off campus
- Attach a document/file to an email message
- Familiar with using a graphical interface to access programs (use of Icons on the desktop)
- Start up and switch between multiple programs/windows
- Copy, move, rename and delete files
- Create, move, rename and delete folders
- Able to use a web browser to access the Internet
- Able to create and organize bookmarks in web browser
- Be familiar with several different search engines to find information
- Use the Internet to collect and print information
- Able to download programs from the Internet to their computer (e.g., readers and plug-ins)
- Able to save, copy, and incorporate Internet information into a word processing program
- Create a document using a word processor
- Able to save, edit, and print a document in a word processing program

Preferred, but not required:

- Able to create, edit, enter formulae for calculations, and create graphs using a spreadsheet
- Able to create PowerPoint presentations (including adding video clips, sounds, and links to other presentations)

The College of Nursing has adopted:

- Windows/PC as its operating system;
- Microsoft Word as its standard for word processing; and
- APA, the latest edition, as the standard manuscript style. (The University bookstore has APA disks available for Word and WordPerfect.)

The University has adopted:

- Netscape as its standard browser; and
- Blackboard as its course management software.

Resources for computer literacy proficiency:

- Computer course
- Computer lab training
- Other
University Student Services

Center for Student Success, MSC 225, 516-5300

- Assessment and counseling for students who are undecided about a major or career
- Information and guidance about University policies and procedures that affect progress towards degree
- Support for students who are at risk or have received grades below their expectations
- Structured programs for students who have been placed on academic probation
- Support to academic units in designing interventions to encourage success in specific majors or degree programs
- Connections to campus support services critical to academic success

The Writing Lab (409 SSB - 516-5950)

This lab offers tutorial assistance to students working on papers for their classes. No appointment is necessary, and tutors are prepared to help both undergraduate and graduate students in all the disciplines. Some of the issues covered in the lab include organization, sentence clarity, development, grammar, and usage. The Writing Lab houses 24 Macintosh computers for student use, and tutors provide computer assistance. There is no charge for any Writing Lab service.

Supplemental Instruction

Student assistants (SI Leaders) conduct study groups for specific courses. Course content and study skills are reviewed several times a week at scheduled sessions. Students participate on a voluntary basis without charge for the service.

Mathematics Lab (425 SSB - 516-5190)

This lab offers free individual assistance on a walk-in basis to students needing help with any mathematics from basic math through calculus or any course involving mathematical skills. In addition, the lab offers on-site use of videotaped lessons that accompany some mathematics courses, computer packages covering certain topics, and mathematics textbooks and worksheets on several basic topics. **Students or prospective students who are preparing to take the Mathematics Placement Test may come to the lab for help.** Review materials for this test are available on general reserve in the Thomas Jefferson Library.

Counseling Services

Counseling Services offers professional counseling regarding personal, social, and educational concerns. Services include individual and couples counseling, a range of psycho-educational workshops as well as group counseling.

Counseling Services houses the Helping Hand African American student-mentoring program and the Horizons undergraduate peer educators. Counseling Services also provides training and
supervision for graduate student interns. For information about participating in any of these programs, call 516-5711.

The Counseling Services receptionist will arrange an appointment with a counselor. There are some evening appointments available. In an emergency, however, students can be seen almost immediately. For more information, call 516-5711 or visit Counseling Services office at 126 MSC. Visit their web site: http://www.umsl.edu/services/counseling

Scholarships and Financial Aid

Information is detailed on the financial aid web site at www.umsl.edu/services/finaid. Additional scholarship opportunities are posted on the nursing website at www.umsl.edu/nursing.

You must re-apply for most scholarships and Traineeships each year. See the Office of Student Services or the nursing website for applications, information and deadlines for scholarships. You must also reapply for need based Financial Aid each year.

Additional scholarship or loan information will be posted on the bulletin board in the Student Lounge in Seton Center.

Libraries

The University Libraries support the educational objectives of the University and meet the teaching, research, and informational needs of the campus community. Housed in two locations - the Thomas Jefferson Library (North Campus 516-5290), the Ward E. The Library which houses both the Education and the Health Sciences Libraries (on South Campus 516-5576) - the libraries' collections consist of more than 845,000 volumes, 2,900 periodical subscriptions, one million U.S. Government documents, and over one million items in microform. Effective March 3, 1997, the St. Louis Mercantile Library became part of the UM-St. Louis Libraries.

Materials from all University of Missouri libraries can be identified through MERLIN, the online catalog. Interlibrary Loan provides fast delivery of materials from other libraries across the country. Many automated databases are available, in both online and CD-ROM formats.

The libraries are open more than 85 hours per week during regular sessions. Specific hours for various library services are posted in all libraries.
Miscellaneous Student Information

Student Representatives on the College of Nursing Committees

The College of Nursing at the University of Missouri-St. Louis requests student representatives on the following committees:

Student Affairs

The Student Affairs Committee functions as a recommending body to the Deans Office of the College of Nursing by reviewing policies and procedures related to pre- and post- licensure nursing students, by making recommendations regarding student problems to the Associate Dean and by implementing policies and procedures related to progression, dismissal and graduation, by recommending students and alumni for awards and scholarships, and by reviewing and recommending revisions to policies in the Nursing Student Handbook.

Curriculum

The Curriculum Committee reviews nursing curricula to ensure compliance with the University general education requirements, the minimum standards of the Missouri State Board of Nursing, national accreditation criteria for baccalaureate and master’s degree programs. The Committee also develops/reviews course evaluation tools and recommends appropriate revisions in curricula, including program philosophy and conceptual framework.

Nursing Alumni Association

The Nursing Alumni Association offers graduates opportunities to support and provide input to the College of Nursing and to be part of a growing network of professional nurses.

See the Office of Student Services for more information or to volunteer to serve on a committee.

The College of Nursing Student Nurses' Association (CNSNA)

The College of Nursing is a constituent of the national Student Nurses' Association. The purpose of this organization is to provide nursing students, in the basic baccalaureate program, the opportunity to connect with the nursing profession prior to licensure.
Black Student Nurses' Association (BSNA)

The College of Nursing is also a constituent of the Black Student Nurses' Association. The purpose of this organization is to provide black nursing students in the basic baccalaureate program the opportunity to serve as a support group for African-American students, collaborate with other African-American groups to compile archives relevant to African-American Nurses and to promote participation in interdisciplinary activities.

Sigma Theta Tau

The College of Nursing was granted chapter status (Nu Chi) of Sigma Theta Tau in Spring 1994. Membership is offered by invitation to those students graduating in the upper third of their class and to those recognized as outstanding community nursing leaders. Professional presentations are held twice each year and feature leaders in the nursing profession. Information regarding eligibility is distributed each Spring.

Health Insurance

All students need health insurance coverage and are financially responsible for any injuries. (needle sticks, falls, illnesses, etc.)

Immunizations

Please review the individual policies in your program specific Student Information Guide

Web Site

There is additional information regarding course schedules and course descriptions, as well as faculty and administration on the College of Nursing at UM-St. Louis Home Page. The address is: http://www.umsl.edu/~nursing
Graduation

Prior to registration for your final semester, fill out a graduation application (see appendix) in the Office of Student Services. You must then make an appointment with your advisor for a thorough graduation check when signing up for your final semester classes. Early in that semester, review the graduation list outside the advisors offices for your name.

BSN Pre-licensure Track

A meeting will be held early in your final semester to give you information regarding the applications for the NCLEX RN exam and licensure by exam in Missouri. If you are seeking licensure by exam in a state other than Missouri, you should indicate that at this meeting.

RN-BSN Track

All RN to BSN Program students must come to campus to take the Academic Proficiency and Progress exam prior to graduation. Dates and times are available from the Student Services Office. This is a University requirement for all students graduating from UMSL. Students must also complete the NLN exam. This exam will be administered during the student’s final semester and in conjunction with NS 4911 Synthesis in Nursing course. Online students are required to come to campus the Saturday prior to graduation to complete both the NLN and Academic Proficiency and Progress exams.

MSN Program

M-1 form should be completed approximately 2/3 through the program. The form is available online: http://www.umsl.edu/divisions/graduate/formsregs/mastforms.html

Latin Honors

To graduate with Latin honors, students must have attended the UMSL for at least 56 graded hours and must meet the following qualifications: cum laude 3.2 to 3.49 grade point average; magna cum laude 3.5 to 3.79 grade point average; summa cum laude 3.8 to 4.0 grade point average. If a student has the necessary GPA at UM-St. Louis to qualify for Latin honors but has fewer than 56 graded hours at UM-St. Louis, all credit hours and the associated grades earned within the UM system (UM-Columbia, Rolla or Kansas City) will be included when the total credit hours earned in the UM system are at least 80 graded hours. In determining one's eligibility for Latin honors, all graded hours will be considered, including the original grade in each grade-modified course. No Latin honor higher than that, which is consistent with the UMSL grade point average, will be awarded.

The University Latin Honors policy specifies only courses taken within the University system qualify for Latin Honors. Courses taken at one of the University's Residential Centers (e.g., St. Charles Community College, University of Rolla, or Portageville) can apply toward Latin
Honors. Please refer to the University Bulletin. The University Latin Honors policy excludes coursework taken at another institution. Transfer credits from a previous college or university cannot count toward Latin Honors.

**Deans Honors**

A College of Nursing student who has more than 45 hours and a cumulative 3.2 grade point at UM-St. Louis is awarded Dean's Honors. Deans Honor recipients are listed in the Commencement Program for the University.
