

Level II privileges are permitted for Center faculty that provide patient care services that require additional specific credentials, training and/or experience, depending on the services provided. These include:

- sensory motor evaluation
- vision therapy /orthoptics
- developmental and perceptual assessment
- eikonometry
- ocular photography
- electrodiagnosis
- low vision evaluation and related services
- ultrasonography
- scanning laser polarimetry
- urgent and emergent management of complicated non-surgical ocular conditions
- management of more difficult and complex ocular diseases and conditions
- co-management of more difficult and complex ocular diseases and conditions
- co-management of refractive surgery

Please indicate which clinical privileges you wish to apply for. You may be asked to provide additional information before privileges are granted.
