

You're invited to see our future scientists at work...

and join in supporting high school students who completed research in the sciences, technology, engineering or mathematics

Visit www.jshs.org

To learn about the

National JSHS, April 30 – May 4, 2008, Orlando

Apply by contacting the JSHS regional symposium serving your state or area.

JSHS is a national program sponsored by the research offices of the military and held in cooperation with nationwide colleges and universities. JSHS aims to encourage and support the future pool of trained scientific and engineering talent. At each symposium, science-oriented students may:

- Participate in a forum honoring exceptional academic work in the sciences, technology, engineering, or mathematics
- Compete for significant scholarships and other awards
- Interact with practicing scientists and engineers to look beyond high school to future post secondary education
- Develop higher-order thinking skills and integrated learning across disciplines through the process of scientific inquiry, writing a scientific paper, and delivering a presentation – all skills that will benefit students future post secondary and graduate pursuits
- Participate in a scientific conference, visit research and development laboratories, and have their work published

To apply to the Missouri region, please go to www.jshs.org/regioncontacts.html

Or contact, Dr. Charles R. Granger
University of Missouri, St. Louis
