As in the past, some graduates may have to accept positions in areas outside of their field of interest or for which they feel overqualified. Some recent law school graduates who have been unable to find permanent positions are turning to the growing number of temporary staffing firms that place attorneys in short-term jobs until they are able to secure full-time positions. This service allows companies to hire lawyers on an “as needed” basis and permits beginning lawyers to develop practical skills while looking for permanent positions.

Due to the competition for jobs, a law graduate’s geographic mobility and work experience assume greater importance. The willingness to relocate may be an advantage in getting a job but, to be licensed in another State, a lawyer may have to take an additional State bar examination. In addition, employers increasingly seek graduates who have advanced law degrees and experience in a specialty such as tax, patent, or admiralty law.

Employment growth for lawyers will continue to be concentrated in salaried jobs, as businesses and all levels of government employ a growing number of staff attorneys, and as employment in the legal services industry grows in larger law firms. Most salaried positions are in urban areas where government agencies, law firms, and big corporations are concentrated. The number of self-employed lawyers is expected to decrease slowly, reflecting the difficulty of establishing a profitable new practice in the face of competition from larger, established law firms. Moreover, the growing complexity of law, which encourages specialization, along with the cost of maintaining up-to-date legal research materials, favors larger firms.

For lawyers who wish to work independently, establishing a new practice will probably be easiest in small towns and expanding suburban areas. In such communities, competition from larger established law firms is likely to be less keen than in big cities, and new lawyers may find it easier to become known to potential clients. Some lawyers are adversely affected by cyclical swings in the economy. During recessions, the demand declines for some discretionary legal services, such as planning estates, drafting wills, and handling real estate transactions. Also, corporations are less likely to litigate cases when declining sales and profits result in budgetary restrictions. Some corporations and law firms will not hire new attorneys until business improves and may even cut staff to contain costs. Several factors, however, mitigate the overall impact of recessions on lawyers. During recessions, for example, individuals and corporations face other legal problems, such as bankruptcies, foreclosures, and divorces requiring legal action.

Earnings
In 2000, the median annual earnings of all lawyers was $88,280. The middle half of the occupation earned between $60,700 and $130,170. The lowest paid 10 percent earned less than $44,590; at least 10 percent earned more than $145,600. Median annual earnings in the industries employing the largest numbers of lawyers in 2000 are shown below:

<table>
<thead>
<tr>
<th>Industry</th>

<tr>
<td>Fire, marine, and casualty insurance</td>
<td>$82,170</td>
</tr>
<tr>
<td>Local government</td>
<td>$66,280</td>
</tr>
<tr>
<td>State government</td>
<td>$64,190</td>
</tr>
</tbody>
</table>

Median salaries of lawyers 6 months after graduation from law school in 2000 varied by type of work, as indicated by table 1.

Salaries of experienced attorneys vary widely according to the type, size, and location of their employer. Lawyers who own their own practices usually earn less than do those who are partners in law firms. Lawyers starting their own practice may need to work part time in other occupations to supplement their income until their practice is well established.

SOURCE: National Association for Law Placement

Most salaried lawyers are provided health and life insurance, and contributions are made on their behalf to retirement plans. Lawyers who practice independently are covered only if they arrange and pay for such benefits themselves.

Related Occupations
Legal training is necessary in many other occupations. Some of these are paralegal and legal assistant; law clerk; title examiner, abstractor, and searcher; arbitrator, mediator, and conciliator; judge, magistrate judge, and magistrate; and administrative law judge, adjudicator, and hearing officer.

Sources of Additional Information
Information on law schools and a career in law may be obtained from:

- American Bar Association, 750 North Lake Shore Dr., Chicago, IL 60611. Internet: http://www.abanet.org
- The Law School Admission Council, P.O. Box 40, Newtown, PA 18940. Internet: http://www.lsac.org

Information on obtaining a job as a lawyer with the Federal Government is available from the Office of Personnel Management through a telephone-based system. Consult your telephone directory under U.S. Government for a local number or call (912) 757-3000; Federal Relay Service: (800) 877-8339. The first number is not tollfree, and charges may result. Information also is available from the Internet site: http://www.usajobs.opm.gov.

The requirements for admission to the bar in a particular State or other jurisdiction also may be obtained at the State capital, from the clerk of the Supreme Court or the administrator of the State Board of Bar Examiners.

Paralegals and Legal Assistants

(O*NET 23-1101.00)

Significant Points

- While some paralegals train on the job, employers increasingly prefer graduates of postsecondary paralegal education programs, especially graduates of 4-year paralegal programs or college graduates who have completed paralegal certificate programs.

- Paralegals are projected to grow faster than average, as they increasingly perform many legal tasks formerly carried out by lawyers.

- Stiff competition is expected, as the number of graduates of paralegal training programs and others seeking to enter the profession outpaces job growth.
While lawyers assume ultimate responsibility for legal work, they often delegate many of their tasks to paralegals. In fact, paralegals—also called legal assistants—continue to assume a growing range of tasks in the Nation’s legal offices and perform many of the same tasks as lawyers. Nevertheless, they are still explicitly prohibited from carrying out duties which are considered to be the practice of law, such as setting legal fees, giving legal advice, and presenting cases in court.

One of a paralegal’s most important tasks is helping lawyers prepare for closings, hearings, trials, and corporate meetings. Paralegals investigate the facts of cases and ensure that all relevant information is considered. They also identify appropriate laws, judicial decisions, legal articles, and other materials that are relevant to assigned cases. After they analyze and organize the information, paralegals may prepare written reports that attorneys use in determining how cases should be handled. Should attorneys decide to file lawsuits on behalf of clients, paralegals may help prepare the legal arguments, draft pleadings and motions to be filed with the court, obtain affidavits, and assist attorneys during trials. Paralegals also organize and track files of all important case documents and make them available and easily accessible to attorneys.

In addition to this preparatory work, paralegals also perform a number of other vital functions. For example, they help draft contracts, mortgages, separation agreements, and trust instruments. They also may assist in preparing tax returns and planning estates. Some paralegals coordinate the activities of other law office employees and maintain financial office records. Various additional tasks may differ, depending on the employer.

Paralegals are found in all types of organizations, but most are employed by law firms, corporate legal departments, and various government offices. In these organizations, they may work in all areas of the law, including litigation, personal injury, corporate law, criminal law, employee benefits, intellectual property, labor law, bankruptcy, immigration, family law, and real estate. Within specialties, functions often are broken down further so that paralegals may deal with a specific area. For example, paralegals specializing in labor law may deal exclusively with employee benefits.

The duties of paralegals also differ widely based on the type of organization in which they are employed. Paralegals who work for corporations often assist attorneys with employee contracts, shareholder agreements, stock-option plans, and employee benefit plans. They also may help prepare and file annual financial reports, maintain corporate minute books and resolutions, and secure loans for the corporation. Paralegals often monitor and review government regulations to ensure that the corporation operates within the law.

The duties of paralegals who work in the public sector usually vary within each agency. In general, they analyze legal material for internal use, maintain reference files, conduct research for attorneys, and collect and analyze evidence for agency hearings. They may then prepare informative or explanatory material on laws, agency regulations, and agency policy for general use by the agency and the public. Paralegals employed in community legal-service projects help the poor, the aged, and others in need of legal assistance. They file forms, conduct research, prepare documents, and when authorized by law, may represent clients at administrative hearings.

Paralegals in small and medium-sized law firms usually perform a variety of duties that require a general knowledge of the law. For example, they may research judicial decisions on improper police arrests or help prepare a mortgage contract. Paralegals employed by large law firms, government agencies, and corporations, however, are more likely to specialize in one aspect of the law.

Computer use and technical knowledge has become essential to paralegal work. Computer software packages and the Internet are increasingly used to search legal literature stored in computer databases and on CD-ROM. In litigation involving many supporting documents, paralegals may use computer databases to retrieve, organize, and index various materials. Imaging software allows paralegals to scan documents directly into a database, while billing programs help them to track hours billed to clients. Computer software packages also may be used to perform tax computations and explore the consequences of possible tax strategies for clients.

Paralegals investigate the facts of a case and organize the information that lawyers use to determine how the case should be handled.
Training, Other Qualifications, and Advancement

There are several ways to become a paralegal. Employers usually require formal paralegal training obtained through associate or bachelor's degree programs or through a certification program. Increasingly, employers prefer graduates of 4-year paralegal programs or college graduates who have completed paralegal certificate programs. Some employers prefer to train paralegals on the job, hiring college graduates with no legal experience or promoting experienced legal secretaries. Other entrants have experience in a technical field that is useful to law firms, such as a background in tax preparation for tax and estate practice, or nursing or health administration for personal injury practice.

Over 800 formal paralegal training programs are offered by 4-year colleges and universities, law schools, community and junior colleges, business schools, and proprietary schools. There are currently 247 programs approved by the American Bar Association (ABA). Although this approval is neither required nor sought by many programs, graduation from an ABA-approved program can enhance one's employment opportunities. The requirements for admission to these programs vary. Some require certain college courses or a bachelor's degree; others accept high school graduates or those with legal experience; and a few schools require standardized tests and personal interviews.

Paralegal programs include 2-year associate's degree programs, 4-year bachelor's degree programs, and certificate programs that take only a few months to complete. Many certificate programs only require a high school diploma or GED for admission, but they usually are designed for students who already hold an associate or baccalaureate degree. Programs typically include courses on law and legal research techniques, in addition to courses covering specialized areas of law, such as real estate, estate planning and probate, litigation, family law, contracts, and criminal law. Many employers prefer applicants with specialized training.

The quality of paralegal training programs varies; the better programs usually include job placement. Programs increasingly include courses introducing students to the legal applications of computers. Many paralegal training programs include an internship in which students gain practical experience by working for several months in a private law firm, office of a public defender or attorney general, bank, corporate legal department, legal-aid organization, or government agency. Experience gained in internships is an asset when seeking a job after graduation. Prospective students should examine the experiences of recent graduates before enrolling in those programs.

Although most employers do not require certification, earning a voluntary certificate from a professional society may offer advantages in the labor market. The National Association of Legal Assistants, for example, has established standards for certification requiring various combinations of education and experience. Paralegals who meet these standards are eligible to take a 2-day examination, given three times each year at several regional testing centers. Those who pass this examination may use the designation Certified Legal Assistant (CLA). In addition, the Paralegal Advanced Competency Exam, established in 1996 and administered through the National Federation of Paralegal Associations, offers professional recognition to paralegals with a bachelor's degree and at least 2 years of experience. Those who pass this examination may use the designation Registered Paralegal (RP).

Paralegals must be able to document and present their findings and opinions to their supervising attorney. They need to understand legal terminology and have good research and investigative skills. Familiarity with the operation and applications of computers in legal research and litigation support also is increasingly important. Paralegals should stay informed of new developments in the laws that affect their area of practice. Participation in continuing legal education seminars allows paralegals to maintain and expand their legal knowledge.

Because paralegals frequently deal with the public, they should be courteous and uphold the ethical standards of the legal profession. The National Association of Legal Assistants, the National Federation of Paralegal Associations, and a few States have established ethical guidelines for paralegals to follow.

Paralegals usually are given more responsibilities and less supervision as they gain work experience. Experienced paralegals who work in large law firms, corporate legal departments, and government agencies may supervise and delegate assignments to other paralegals and clerical staff. Advancement opportunities also include promotion to managerial and other law-related positions within the firm or corporate legal department. However, some paralegals find it easier to move to another law firm when seeking increased responsibility or advancement.

Job Outlook

Paralegals and legal assistants are projected to grow faster than the average for all occupations through 2010. Employment growth stems from law firms and other employers with legal staffs increasingly hiring paralegals to lower the cost and increase the availability and efficiency of legal services. The majority of job openings for paralegals in the future will be new jobs created by rapid employment growth, but additional job openings will arise as people leave the occupation. Despite projections of fast employment growth, stiff competition for jobs should continue as the number of graduates of paralegal training programs and others seeking to enter the profession outpaces job growth.

Private law firms will continue to be the largest employers of paralegals, but a growing array of other organizations, such as corporate legal departments, insurance companies, real estate and title insurance firms, and banks will also continue to hire paralegals. Demand for paralegals is expected to grow as an increasing population requires additional legal services, especially in areas such as intellectual property, healthcare, international, elder, sexual harassment, and environmental law. The growth of prepaid legal plans also should contribute to the demand for legal services. Paralegal employment is expected to increase as organizations presently employing paralegals assign them a growing range of tasks, and as paralegals are increasingly employed in small and medium-sized establishments. A growing number of experienced paralegals are expected to establish their own businesses.

Job opportunities for paralegals will expand in the public sector as well. Community legal-service programs, which provide assistance to the poor, aged, minorities, and middle-income families, will employ additional paralegals to minimize expenses and serve the most people. Federal, State, and local government agencies, consumer organizations, and the courts also should continue to hire paralegals in increasing numbers.

To a limited extent, paralegal jobs are affected by the business cycle. During recessions, demand declines for some discretionary legal services, such as planning estates, drafting wills, and handling real estate transactions. Corporations are less inclined to initiate litigation when falling sales and profits lead to fiscal belt tightening. As a result, full-time paralegals employed in offices adversely affected by a recession may be laid off or have their work hours reduced. On the other hand, during recessions, corporations and individuals are more likely to face other problems that require legal assistance, such as bankruptcies, foreclosures, and divorces. Paralegals, who provide many of the same legal services as lawyers at
a lower cost, tend to fare relatively better in difficult economic conditions.

**Earnings**

Earnings of paralegals and legal assistants vary greatly. Salaries depend on education, training, experience, type and size of employer, and geographic location of the job. In general, paralegals who work for large law firms or in large metropolitan areas earn more than those who work for smaller firms or in less populated regions. In 2000, full-time, wage and salary paralegals and legal assistants had median annual earnings of $35,360. The middle 50 percent earned between $28,700 and $45,010. The top 10 percent earned more than $56,060, while the bottom 10 percent earned less than $23,350. Median annual earnings in the industries employing the largest numbers of paralegals in 2000 were as follows:

<table>
<thead>
<tr>
<th>Industry</th>
<th>Median Annual Earnings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Federal Government</td>
<td>$48,560</td>
</tr>
<tr>
<td>Legal services</td>
<td>$34,230</td>
</tr>
<tr>
<td>Local government</td>
<td>$34,120</td>
</tr>
<tr>
<td>State government</td>
<td>$32,680</td>
</tr>
</tbody>
</table>

According to the National Association of Legal Assistants, paralegals had an average salary of $38,000 in 2000. In addition to a salary, many paralegals received a bonus, which averaged about $2,400. According to the National Federation of Paralegal Associations, starting salaries of paralegals with 1 year or less experience averaged $38,100 in 1999.

**Related Occupations**

Several other occupations call for a specialized understanding of the law and the legal system, but do not require the extensive training of a lawyer. These include law clerks; title examiners, abstractors, and searchers; claims adjusters, appraisers, examiners, and investigators; and occupational health and safety specialists and technicians.

**Sources of Additional Information**

General information on a career as a paralegal can be obtained from:
- Standing Committee on Legal Assistants, American Bar Association, 541 North Fairbanks Court, Chicago, IL 60611. Internet: [http://www.abanet.org](http://www.abanet.org)
- Information on a career as a paralegal, schools that offer training programs in a specific State, and standards and guidelines for paralegals, contact:
- Information on the Certified Legal Assistant exam, schools that offer training programs, job postings for paralegals, the Paralegal Advanced Competency Exam, and local paralegal associations can be obtained from:
- National Federation of Paralegal Associations, P.O. Box 33108, Kansas City, MO 64114. Internet: [http://www.paralegals.org](http://www.paralegals.org)
- Information on paralegal training programs, including the pamphlet “How to Choose a Paralegal Education Program,” may be obtained from:

**Life Scientists**

**Agricultural and Food Scientists**

(O*NET 19-1011.00, 19-1012.00, 19-1013.01, 19-1013.02)

**Significant Points**

- A large proportion, about 41 percent, of salaried agricultural and food scientists works for Federal, State, and local governments.
- A bachelor’s degree in agricultural science is sufficient for some jobs in applied research; a master’s or doctoral degree is required for basic research.

**Nature of the Work**

The work of agricultural and food scientists plays an important part in maintaining the Nation’s food supply by ensuring agricultural productivity and the safety of the food supply. Agricultural scientists study farm crops and animals, and develop ways of improving their quantity and quality. They look for ways to improve crop yield with less labor, control pests and weeds more safely and effectively, and conserve soil and water. They research methods of converting raw agricultural commodities into attractive and healthy food products for consumers. Agricultural science is closely related to biological science, and agricultural scientists use the principles of biology, chemistry, physics, mathematics, and other sciences to solve problems in agriculture. They often work with biological scientists on basic biological research and on applying to agriculture the advances in knowledge brought about by biotechnology.

Many agricultural scientists work in basic or applied research and development. Others manage or administer research and development programs, or manage marketing or production operations in companies that produce food products or agricultural chemicals, supplies, and machinery. Some agricultural scientists are consultants to business firms, private clients, or government. Depending on the agricultural or food scientist’s area of specialization, the nature of the work performed varies.

**Food science.** Food scientists and technologists usually work in the food processing industry, universities, or the Federal Government, and help meet consumer demand for food products that are healthful, safe, palatable, and convenient. To do this, they use their knowledge of chemistry, microbiology, and other sciences to develop new or better ways of preserving, processing, packaging, storing, and delivering foods. Some food scientists engage in basic research, discovering new food sources; analyzing food content to determine levels of vitamins, fat, sugar, or protein; or searching for substitutes for harmful or undesirable additives, such as nitrates.
