### Justification for request:

Several courses on the previous list are no longer available 100% online/asynch. This change adds courses that meet that requirement for this 100% online program, while not removing the old courses (in case a student wants to take a course in-person/hybrid). This action is taken in consultation with the MGMT dept.

All additional courses meet the ("D") CAP alignment standard for the program outcomes "Demonstrate critical thinking and problem solving abilities regarding organizational challenges within the chosen emphasis area" and "Use tools specific to the chosen emphasis area to manage systems and organizational resources"
