Justification for request:

The changes are part of the broader Bachelor of Science in Business Administration (BSBA) program redesign effort. Emphasis Area modifications are intended to enhance the program's focus on career development, ensuring that students gain skills that are directly applicable to various business functional domains. Additionally, the revisions support compliance with the new Missouri Core-60 regulations. This alignment facilitates smoother transfer pathways for students transitioning from two-year institutions into the BSBA program. The change removes the "pick any" model and replaces it with 4 required courses with the option to further specialize in Management sub-domains. The two tracks (Strategic Leadership and Talent Management) are proposed to facilitate a closer alignment with one of two Management career paths. Curriculum Maps and new PLOs are attached.
