Chemistry BS

The St. Louis metropolitan area has long been a major center for industrial chemistry, and in the past decade it has also become vibrant in life sciences research and development. A bachelor’s degree in chemistry provides a student with the professional training needed to contribute to this dynamic industry. The B.S. degree is THE professional degree in chemistry, and students who earn the B.S. degree are well prepared for a career in the chemical industry, graduate work in the chemical sciences, medicine, business or law. The department provides opportunities for undergraduates to become involved in ongoing research projects.

Career Outlook

Our graduates are heavily recruited by the local chemical and biotechnology industry. Our alumni have led innovation at large companies like MilliporeSigma, Bayer (formerly Monsanto), Boeing, and Pfizer.

Our graduates are regularly accepted into well-regarded graduate and professional schools, including many top 20 institutions. Still others have forged their own way in business and law. This breadth reflects the value of chemistry training in a wide array of professional settings.
