Information Systems & Technology, MS

The Master of Science (Information Systems and Technology) is designed to provide students the technical and managerial knowledge to work successfully in careers associated with the design, development, and management of information systems. The MSIST is a 30-credit hour STEM designated degree in which students gain advanced knowledge and skills in application development, business intelligence, cybersecurity, cloud computing, and other emerging areas that impact organizational information systems strategies. MSIST students interact extensively with their peers as well as with industry executives in a carefully curated academic environment that provides them numerous growth opportunities and enables them to specialize in areas of interest to them.

Career Outlook

The US Bureau of Labor Statistics projects double-digit growth in IT jobs over the coming decade. MS (Information Systems and Technology) graduates are prepared with advanced skills to apply IT and business knowledge to understand the technology landscape, help organizations streamline their business processes with the aid of technology and enable the alignment of IT plans with business plans. Due to the value they bring, graduates are hired by local and national companies and quickly rise in technology management roles. They enjoy high job satisfaction and compensation in their careers.

Future Career Options

- Application developer
- Business analyst
- Business intelligence analyst
- Chief Information Officer
- Cloud architect
- Computer network architect
- Cybersecurity analyst
- Database administrator
- IT manager
