

The **Bachelor of Science** in **Mathematics**

Think analytically to solve problems.

Math plays a central role in science, technology, finance, aviation, communications and countless other industries. Many of today's knowledge-based careers require excellence and aptitude in mathematics and quantitative reasoning. These careers also emphasize logical problem solving, critical thinking and decision making, skills honed through the study of math.

The Bachelor of Science in Mathematics

The Bachelor of Science in Mathematics provides a substantial background in mathematics, statistics and computer science to produce graduates who can work as mathematicians. Optional courses enable students to focus on areas of interest like pure or applied mathematics.

Students seeking to major in mathematics are first designated as "pre-mathematics majors" until they have completed both MATH 1900 and MATH 2000 or equivalent courses with grades of C or better.

Upon completion of the BS in Mathematics, graduates will be able to write clear, logically consistent proofs; read, understand and assess the veracity of logical arguments or mathematical proofs; and reformulate problems or questions in relevant mathematical terms; interpret, formulate and solve applied problems in probability and statistics; and interpret, formulate and solve applied problems in mathematics relating to annuities, bonds and derivative investments.

BS in Secondary Education with an Emphasis in Mathematics

Mathematics majors interested in teaching math in secondary schools may obtain teacher certification in cooperation with the College of Education by fulfilling the BS with certain prescribed courses in mathematics.

2+3 BS/MA Dual Degree Program

The Master of Arts in Mathematics is also offered in the 2+3 program format. This unique 2+3 dual degree program provides a pathway for students to earn both a bachelor's and a master's degree in Mathematics with fewer total credit hours than would be required to complete each degree independently. Once all requirements have been met, students will be awarded both a BS and an MA and are able to enter the job market with a competitive edge.

Transforming Lives

The Bachelor of Science in Mathematics at UMSL is earned through our College of Arts and Sciences, the academic core of the University of Missouri–St. Louis. Through academic programs offered on- and off- campus, traditional and nontraditional students gain knowledge, skills and intellectual leadership for a variety of career paths, advanced study and research in many academic disciplines.

Graduates are known for their professionalism on the job and their strong sense of civic responsibility. Students in our programs engage in creative and critical thinking, learn to analyze evidence, to appreciate patterns of complexity and to reflect on important issues that impact our daily lives. Students gain skill sets to prepare for a changing workplace that requires flexible, dynamic, and well-educated employees.

The Department of Mathematics and Statistics conducts pivotal research in areas such as data science, computational mathematics, topology, probability and statistics. Many faculty members have received international recognition for contributions to their fields. The Math Academic Center provides free individual assistance to all students. The Math Technology Learning Center (MTLC) is a resource dedicated to our math students where they can access study space, do homework online, take advantage of various resource materials or get help from an instructor or student teacher.

Serious education. Serious value.

The Bachelor of Science in Mathematics is designed to provide specialized knowledge, skills and training in a flexible format, with classes available in person, online and in a hybrid format. You'll learn from highly qualified educators and researchers who hold terminal degrees from some of the world's most prestigious academic institutions.

The University of Missouri–St. Louis provides the knowledge, resources, tools, skills and support students need to be successful in our programs. Our comprehensive student support services include workshops, tutoring and career services to help you develop skills and strategies to be successful in the classroom and beyond. UMSL welcomes transfer students and our transfer specialists will assist you with getting the most transfer credits possible. We're also committed to increasing access to higher education, which is why UMSL is consistently ranked number one in affordability in the St. Louis region.
