

The **Bachelor of Science** in

# Psychology

## **Understand human behavior.**

Psychology is the science of mind and behavior. This exciting field increases understanding of ourselves while developing critical thinking skills. You'll understand human relationships, appreciate human development, be a better communicator and develop a new perspective on mental illness while working with scientific methods.

## **The Bachelor of Science in Psychology**

The BS in Psychology involves the application of foundational knowledge and skills from math and the natural sciences to the study of behavior. Students can concentrate their advanced coursework in a specific disciplinary subfield including behavioral neuroscience, child psychology, clinical psychology, health psychology/pre-health, business and work psychology. Students earning a Bachelor of Science degree in psychological sciences learn to analyze data, communicate complex information, understand human behavior and think and write scientifically.

Upon completion of the BS in Psychology, graduates will be able to demonstrate an integrative understanding of psychological concepts, theories, research and historical trends and predict behavior across the scientific sub-disciplines; summarize and explain use of the scientific approach to solve behavioral problems and articulate how behavioral explanations rely on critical thinking, scientific reasoning, weighing evidence and tolerating ambiguity; evaluate and identify appropriate research methods in psychology and at least one other STEM discipline, including research design, data analysis and interpretation; communicate clearly and concisely; demonstrate a respect for members of diverse groups with sensitivity to issues of power privilege and discrimination while adopting social and ethical values that build community; and display professionalism and ownership of professional growth and learning through an evolving career development plan tailored to an accurate self-assessment of abilities, achievements, motivations and work habits.

## Transforming Lives

The Bachelor of Science in Psychology at UMSL is earned through our College of Arts and Sciences, the academic core of the University of Missouri–St. Louis. Through academic programs offered on- and off- campus, traditional and nontraditional students gain knowledge, skills and intellectual leadership for a variety of career paths, advanced study and research in many academic disciplines.

Graduates are known for their professionalism on the job and their strong sense of civic responsibility. Students in our programs engage in creative and critical thinking, learn to analyze evidence, to appreciate patterns of complexity and to reflect on important issues that impact our daily lives. Students gain skill sets to prepare for a changing workplace that requires flexible, dynamic, and well-educated employees.

The Psychology Department offers students opportunities to do research in several human experimental laboratories furnished with various psychophysiological equipment. Research topics consist of human learning, cognitive and emotion processes, trauma studies, clinical and community psychology and social psychology, as well as neuroscience. Additionally, the department operates three facilities—Community Psychological Services, the Center for Trauma Recovery, and Children’s Advocacy Services of Greater St. Louis—which provide training opportunities for students in psychology while providing psychological assessment services for citizens of the region.

## Serious education. Serious value.

The Bachelor of Science in Psychology is designed to provide specialized knowledge, skills and training in a flexible format, with classes available in person, online and in a hybrid format. You’ll learn from highly qualified educators and researchers who hold terminal degrees from some of the world’s most prestigious academic institutions.

The University of Missouri–St. Louis provides the knowledge, resources, tools, skills and support students need to be successful in our programs.
