- ✓ This plan was designed for students who plan to apply to medical school after their Junior (third) year of college with plans to begin medical school right after graduation. This plan is for a first-time college student. For students transferring credits, plans may differ.
- ✓ If you are not a biology major, you can meet with your major advisor to create a specific plan for your degree. Please keep in mind the activities and timeline for MCAT preparation and testing. Depending on when you are applying to medical school, all pre-regs should be completed before taking the test.
- ✓ Please keep in mind that each medical school may have their own set up specific requirements. You should contact the school of your choice to get a list of requirements that are needed for admission into their program.

^{*}Required before taking the MCAT
