  July 5, 6, 7, 2023 |

* OSCE: Objective Structured Clinical Exam. Students will perform the OSCE on live actors/actresses called “standardized patients” (SPs)

- Intensives 1, 2, and 3 will have a Canvas course site for all relevant materials and assignments to be completed during the time allotted for the Intensive. The Intensive Canvas courses will be available at the beginning of the semester of the Intensive.
- Intensive 2 (Fall Intensive) will require some on-campus training.
- Intensive 4 (DNP Defenses) is dependent on the number of students who will be prepared to defend their clinical scholarship projects in July (summer). A schedule of students and their projects will be available approximately one-month prior to the defense dates. In the case of students who complete their projects in the fall or spring semesters, a special one- or two-day defense date may be scheduled in April (spring) or November (fall) depending on the number of students completing their projects in the spring and fall semesters.
