How to Share & Embed Videos from Google Drive into Canvas

Make sure you are using Google Chrome either for Windows or Mac for these steps.

Upload your video to Google Drive folder using these instructions:
Computer | iPhone/iPad | Android

Once your video is uploaded to the Google Drive folder, right click on your video and click on Get a sharable link in the submenu and the following window appears:

Click on Sharing settings and then the following window will appear and click on Advanced
Once you click on Advanced, you will see this window and click on **Anyone with the link can edit**

![Share with others](https://drive.google.com/file/d/0BzvK9C9hZ2mqcFc3UEpSeXVIIdVE/view?usp=sharing)

Once this clicked, you will see the following options as seen in the next screenshot:

![Share with others](https://drive.google.com/file/d/0BzvK9C9hZ2mqcFc3UEpSeXVIIdVE/view?usp=sharing)

For our purposes, click on **Anyone at University of Missouri St. Louis with link can view** and click **Done**
After you have completed changing your sharing settings, double click on the video icon to launch the video;

![Video Information](image1)

Click on the icon for “popup” window on the top of the page;

![Popup Icon](image2)

In the new window, find a three-dot icon, which will show “more actions” when your cursor moves over it:

![Three-Dot Icon](image3)

Choose “embed item”;

![More Actions Menu](image4)

(continued on next page)
Double click in the field below “paste HTML to embed in website”, when highlighted, copy the codes (Control + C if you are using Windows, or Command + C if you are using Mac.)

Now log in to Canvas and open your course to the specific discussion board where you want to embed your video.

Click on Reply to make a new entry in the discussion board.

Once the text editor appears, click on “HTML editor”;

In the HTML editor mode, paste the codes you just copied, and then click on “save”.

Now you have a page with your video embedded from Google Drive!
