

*You're invited to attend an Advanced Summer Institute*

On July 16<sup>th</sup> and 17<sup>th</sup>, GWP Teacher Consultants have the opportunity to attend an advanced institute focused on the value of close reading, classroom discourse, the Common Core Standards, and, of course, **writing!**

The ultimate goal will be to create a unit that suits your needs in the classroom. Using the model of teachers teaching teachers, we will create units for classroom use that focus on best practices aligned with the CCSS. We will work through the process together while incorporating the 250<sup>th</sup> birthday celebration of our fine city of St. Louis.

We will meet at the St. Louis Regional Arts Commission in the U-City Loop and are planning other 'field trips' around the city to enrich our experience through community resources. Small groups will form around common interests and may plan additional meetings for continued support. A fourth meeting is planned during the school year to discuss the impact of our work.

This is a **FREE** opportunity for GWP's Teacher Consultants. Please reply if you would like to sign up. Registration documents will follow.
