

UMSL Enters Bidding For Clayton Site

by Steven L. Brawley
editor

The University of Missouri-St. Louis has indirectly entered the bidding process to purchase the County Hospital facility in Clayton.

In a joint effort, UMSL and real estate developers Cabot, Cabot and Forbes have put together a joint proposal to develop the 23 acre tract of land in downtown Clayton.

According to Chancellor Marguerite Ross Barnett, the developers entered a bid with UMSL's knowledge and consent.

"UMSL does have a bid in indirectly with Cabot, Cabot and Forbes," Barnett said Tuesday at the November meeting of the campus senate.

As first reported in the Current last September, UMSL has been considering various uses of the former hospital complex.

The joint proposal was one of six submitted to the county for review.

Jim Lahay, administrative assistant to County Executive Gene

McNary, has said that a committee of people outside county government will probably be appointed by McNary to review the various proposals submitted.

Lahay said no timetable has been set for establishing the committee or choosing a proposal.

Other bids were submitted by J.L. Mason Realty and Investments Inc.; Abrams Rothman and Co., Turley Martin Co. and Barnes Hospital; Linclay Corp.; The Forsyth Group Inc.; and The Lieberman Corp.

A spokesman for Barnes Hospital said their bid with Turley Martin Co. is made to the county with a "mixed use" purpose of the site in mind. He declined further comment on the hospital's proposal until a review is made by the county.

Barnett said details on the financial aspect of the proposal with Cabot, Cabot and Forbes will have to be worked out.

"We are serious, but we are not ready to present a purchase price," Barnett said.

She said UMSL hopes an arrange-

Cedric R. Anderson

HIGHEST BIDDER: The County Hospital Complex in Clayton may soon be the site for campus expansion, if the county accepts a joint

ment with the developers, to put up most of the purchase price, can be worked out.

The Chancellor also said she doesn't see UMSL having to go to the

state legislature for funds to acquire the property.

A cost analysis for renovating the facility for the university's use ranges from \$5 to \$10 million.

proposal by UMSL and a real estate developer. The university is among six investors, interested in the complex for development.

Barnett said the campus would need to get support of the state legislature if financial assistance is needed to renovate the facility.

She also emphasized that even

though a fundraising project for the joint proposal will be implemented, it shouldn't jeopardize present efforts to raise funds for the library

Carnegie Report:

Colleges In Need Of Dramatic Overhaul

(CPS) — American colleges are in need of a dramatic overhaul, a report issued by the Carnegie Foundation said.

Among other things, the foundation urged colleges to stop requiring students to take standardized tests, to make all students take a "core curriculum" of courses, and to have all students write and defend a "senior thesis" before getting their degrees.

A number of educators, moreover, say there's a good chance colleges may adopt many of these suggestions in the near future. Still others say the recommendations are impractical and much too expensive.

In pushing the three-year-old school reform movement up to the college level, the foundation asserted colleges are "driven by careerism and overshadowed by graduate and professional education."

As a result, "many of the nation's colleges are more successful in credentialing than in providing a quality education for their students," the report said.

In early October, U.S. Secretary of Education William Bennett levelled essentially the same charges, adding colleges sometimes are so concerned with finding money to operate that they don't educate students well.

In response, Harvard President Derek Bok, Educational Testing

Service President Gregory Anrig, and American Association of University Professors General Secretary Ernst Benjamin, among others, blasted Bennett as being hypocritical or shortsighted.

Bennett later claimed an unnamed educator told him that, if he continued such criticisms, no college would rehire him as a professor after he leaves the Department of Education.

The response to the Carnegie Foundation's version of the same

criticisms has been considerably milder.

"We are always open to discussion," said Dr. Thomas Brewer of Georgia State.

Some administrators were quick to claim such reforms — especially in admissions tests and requiring senior theses — would be good for others, but not for them.

"Our view is that Dr. (Ernst) Boyer (the report's author) is primarily addressing smaller undergraduate schools," says Dr. Ber-

nard Cohen, vice chancellor of academic affairs for the University of Wisconsin-Madison.

Georgia State's Brewer adds, "we would devise other admission standards" if the foundation's case for doing so is good enough.

Both Brewer and Cohen agree Boyer's suggestion to make seniors write and defend theses in front of a panel of faculty members would cause a "logistical nightmare."

"We would have lots of logistical problems. The big universities, the Universities of Texas of the world, admit about 14,000 freshman each year," Brewer says.

"There's no way to do that," Cohen says emphatically. "Our graduating classes are about 4,000 to 5,000 now. To staff and schedule the small seminars (at which seniors would defend their theses) would be an extraordinary cost."

The Carnegie Foundation also proposed making all collegians demonstrate English language proficiency to graduate, and pass a core of English, art, history and science courses.

The proposals, says Robert Hochstein of the Princeton-based foundation, were reached after three years of interviewing at 29 colleges of differing size and mission.

"Our goal is to make college bet-

See CARNegie, Page 4

Local Reactions Mixed

by Patricia M. Carr
news editor

Local educators have had mixed reactions to the recent Carnegie Foundation report on the status of higher education.

"College: The Undergraduate Experience in America," is considered to be the most systematic study ever done of four-year colleges.

The report took three years and \$1 million to complete. The project involved surveys of 5,000 faculty members, 5,000 undergraduates, 1,000 college administrators, 1,000 high school students and 1,000 parents. Twenty-nine campuses underwent inspection by the foundation for the report.

Recommendations of report include:

- Eliminating the requirement for all high school seniors to take a multiple-choice entrance exam unless the scores are used as criteria for admission.

- Scaling back athletic programs that the report says are rife with "shocking abuses" that undermine academic integrity.

- Make all seniors write a senior thesis and orally defend it in a seminar with classmates.

- Ending the requirements that college professors devote themselves to research and promotion of better teaching.

Committee Recommends Non-Smoking Lounges

by Patricia M. Carr
news editor

The Physical Facilities and General Services Committee decided Monday to recommend that all student lounges be made non-smoking areas.

The motion made Student Association President Ken Meyer and seconded by Kevin Lacostelo SA vice president, said, "There will be a ban of smoking in all student lounges excluding the University Center and the J.C. Penney building."

John Perry, vice chancellor for administrative affairs, said, "If the students don't support it, it's not going to work. There will be the problem of clean up if the students have to go into the lounge and get a soda and then go out into the hall to smoke."

John Perry

Lacostelo replied, "It's easier to clean a building than to clean lungs."

The Student Association during its last meeting passed a proposal calling for clearly designated smok-

ing and non-smoking areas. According to the committee the staff association decided not to take up the issue, but would be in support of the designated areas.

Also Monday, the committee discussed handicapped parking and accessibility on campus.

According to Marilyn Ditto, administrator for special student programs, said there are only 52 handicap spaces on campus.

Twenty-six of the available spaces are near Thomas Jefferson Library, but due to the steep incline only eight are accessible to people who use wheelchairs.

Ditto recommended that current handicapped spots be relocated to more convenient locations and that new spots be added.

Ditto also noted the need to make SSB lecture halls more accessible. Right now there is a common

emergency exit. According to Ditto, this could be made into a handicap accessible entrance. Additional handicap parking could be made available along West Drive.

The committee also discussed the overall parking situation on campus.

"We need to try and solve parking problems," said Perry.

"It's not likely that we can get money from the state for parking improvements," he continued.

Rob Dawes, chairman of the committee with Meyer, made a recommendation for changes in the current parking situation.

They used reports by a group of consultants dealing with traffic problems on campus as the basis for their recommendations. The N.C. Roden and P.H. Weis reports deal

Verity Places Emphasis on Public Relations Functions

by Craig A. Martin
managing editor

Fifth in a series

"I guess the title is interim, but I prefer to call myself acting vice chancellor for university relations, because it makes me sound like I'm doing more," said Dennis Verity.

Verity has held his current position since October of 1985.

"I guess that means I have seniority as an interim," he joked.

Verity was hired by chancellor emeritus Arnold B. Grobman as director of development in 1984.

"The responsibility assigned to me at that time was to secure major corporate gifts for the university," he said.

"What we should be doing in university relations is increasing the public's understanding and support of the university. Clearly, support means financial, but not just financial," he said.

Verity explained that many vital functions fall under the vast umbrella of university relations.

"We are charged with providing information, making media (feature) placements, alumni relations, publications and graphics services, the alumni center, development (fundraising), cultural affairs and special events," Verity said.

"What all these components have in common is public relations, he said.

A search committee has been formed and has accepted applications for the position Verity holds on an interim basis.

"I have applied for the position, but I wouldn't want to speculate," he said.

Verity has several projects which currently fill his busy schedule.

"The first thing is survey research," Verity said.

The survey was taken earlier this year by graduate-level students to determine what the image of UMSL was, both on and off-campus.

"Terry Jones, George McCall and I did that collaboratively, and they really haven't really received enough credit for the tremendous amount of work they did," he said, "We didn't feel that we knew

Dennis Verity

In The Interim

enough about the way the public perceived us to make decisions or spend money on PR activities until we knew."

"We are using the results of that survey to raise the visibility of the campus and take the product to the people," Verity said.

"One good example of this is the Premier Performances at the Sheldon. Virginia Edwards, director of cultural affairs, has done a magnificent job of identifying and getting these top-notch performers."

"Tom Barclay from KWMU told me about the Sheldon, and when we went down to look at it, we realized that this is the place to take the product to the people," he said.

Another example is the recent success of the Shadow Ball.

"The idea for the Shadow Ball appeared before the findings of the survey were released, but they confirmed that we needed to do more to raise the visibility of the optometry school," Verity said.

"The Shadow Ball was an excellent way to do this, and we raised \$35,000 for the Optometric

Page 9

Soccer Team Left Out

For the first time in 15 years, the Rivermen soccer team will not participate in the National Collegiate Athletic Association Division II playoffs.

Despite their 15-3 record, the best in the school's history, soccer coach Don Dallas and his team were slighted by the NCAA selection committee.

Never mind that no other team in the 12-team NCAA field had more victories than UMSL. Never mind that the team was passed over for two teams that had five losses each. And never mind that UMSL was the only team invited to the playoffs every year since the inception of the Division II tournament in 1972.

NCAA officials contend that three factors are considered when selecting teams for playoff berths. These include won-loss record, strength of schedule, and, if possible, head-to-head competition.

The road block to the Rivermen's bid, according to NCAA officials, was its schedule.

The strength of a team's schedule is determined by a numerical formula and the results are reviewed weekly by the national committee. At the end of the season, the rankings are totalled to yield a final power ranking.

It was said that UMSL's schedule didn't match up as well as the other school's did.

The Central Region schools that made the playoffs were Gannon (Pa.), Lock Haven (Pa.), East Stroudsburg (Pa.) and Oakland (Mich.).

Coach Don Dallas is bewildered over how a schedule's strength could outweigh a team's won-loss record.

Apparently, the NCAA thought the schedule factor could decide a team's playoff fate.

Before the final decision was made, the Central Region selection committee, one of four in Division II that recommends three teams to the national committee for playoff consideration, picked Gannon, Lock Haven and UMSL for playoff spots.

However, the national committee overruled the regional committee and dropped UMSL and added Oakland. This left UMSL in a position for a single at-large playoff berth. However, the national committee picked East Stroudsburg for the spot.

In the end, the Rivermen were left out in the cold with their best record ever.

The one reason UMSL's schedule may not have appeared as strong as the other teams was the changes in regional zones made after the 1986 schedules were set.

UMSL had been in a region that had included teams from the West, but was moved to a region of Midwest teams that included the Pennsylvania Athletic Conference.

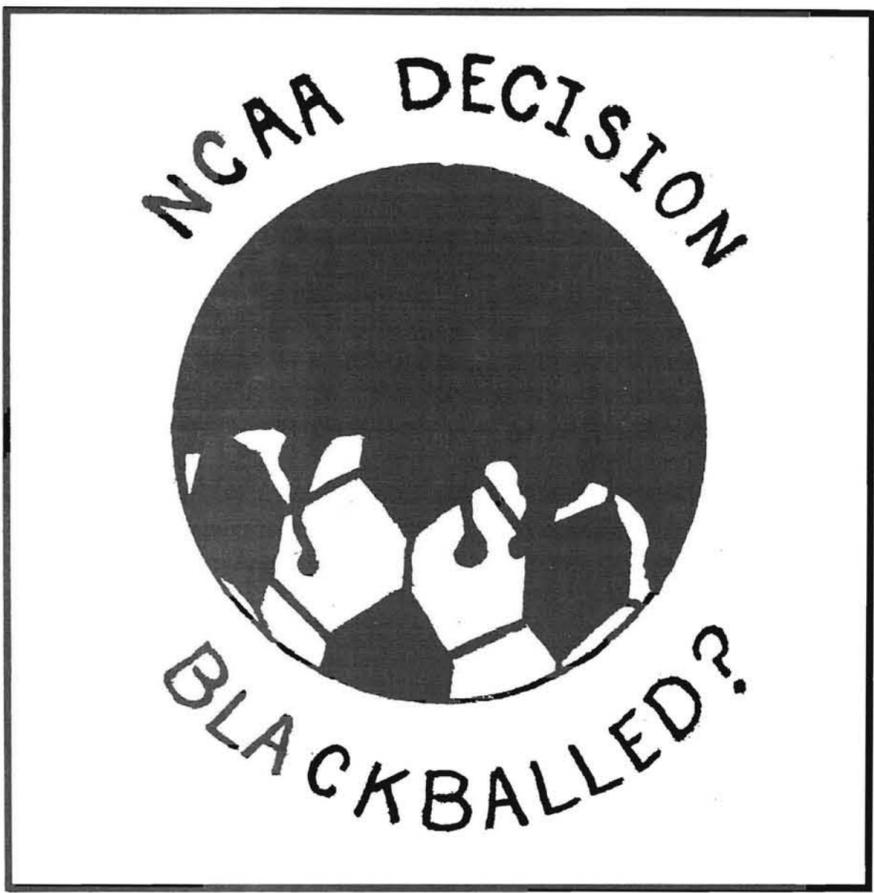

The committee should have taken this change into consideration. If power rankings are going to be used, then don't make it tough to compare one school to the next.

To be fair, in past years other teams have argued that UMSL didn't always deserve playoff spots it had obtained.

However, the committee must take a serious look at its selection process. If teams, such as UMSL are going to be subjected to political haggling, then the NCAA should just make the selection a popularity contest.

Dallas said he will appeal the decision that excluded UMSL. It is unlikely an overruling of the selections will occur, but maybe it will cause an investigation into the NCAA and its selection process.

In all, the campus should be proud that the Rivermen end the season with a positive record, despite the negative outcome.

LETTERS TO THE EDITOR

Star Wars

Dear Editor:

If there is no sword, there is no need for a shield. This was the cold, simple, logic of the Union of Soviet Socialist Republics through the politician Gorbachev at Reykjavik, Iceland.

If all the nuclear weaponry can be bilaterally and verifiably eliminated in the U.S. and the USSR by the millennium, why do we need a trillion dollar bonanza for the military-financial-industrial complex in the form of the Star Wars program.

It is an insult to the peoples on the seven continents of mother earth as it was to the quintessential intellectual W.E.B. DuBois who was jailed as an octogenarian to answer the charge leveled at him by the U.S. government that he was "an agent of foreign principal" because he dared to embrace peace in spite of the fact that the USSR and a "saving few" had the courage to do so in these cowardly United States of America.

Can we meet the Soviets halfway for the sake of peace today?

Can one work for peace today with the peoples of the world without becoming an indicted criminal?

Can nature and anthropological nature survive on mother earth?

Sincerely

W.E.E. Lacy

South Africa

Dear Editor:

The only way the racist, fascist, outlaw government of South Africa can be called socialist is if one places the adjective national before it, thereby labeling it national socialist, which is fascist, in spite of what one David L. Williams seems to think.

Further, no misinformed, uniformed, fascist tinged diatribe shall divert the fighting peoples of Southern Africa from defending themselves from fascist governments like that of South Africa.

Lastly, I do not "hint that not repaying your student loan is a way to protest government policy."

I stated that the Reagan Administration takes sanctions against those who would do so against National Socialism in South Africa and also against poor students in these racists United States of America.

Sincerely,

E.E.W. Clay

UAW

Dear Editor:

This letter is primarily addressed to Republicans and pro-life readers of the newspaper.

Has anyone ever taken a good long look at the political candidates endorsed and funded by the United Auto Workers?

They are nearly all liberal Democrats. In their newsletters they portray Republicans as some sort of satanic monsters.

These liberal Democrats are nearly all pro-abortion. If the UAW doesn't want our point of view of our political candidates, I guess they don't want our money either.

You hear the slogan "buy American" and it sounds good. The problem is that the UAW has a monopoly on the U.S. auto industry.

If you build cars for a living, you must pay dues to this leftist rathole or get fired.

For the above reasons, it is more patriotic to boycott the UAW than to contribute to their subversive cause.

Sincerely,

David L. Williams

UM Curators Need Budget

Recent articles concerning the UM Board of Curators and their spending patterns have upset quiet a few people. They are however, looking only at the surface of the problem.

A spending witch hunt shouldn't be called for, but an analysis of spending patterns should be developed.

According to curator Bert Bates, board members loose income because of their involvement on the board and the time they must spend away from their real job.

Maybe that is where the real problem lies. The Curators do not consider what they do for the university a real job.

Maybe the university should adopt a new policy in which the curators would receive a check each month to cover reasonable expenses. By setting a limited amount of money aside each month for each curator, they would have to work within a budget and would feel that being curator was a real job.

Reasonable expenses would include the standard 21 cents per mile for travel to and from regularly scheduled and emergency meetings. The meeting should be arranged in advance, as they usually are, so that each curator would have ample time to make necessary travel arrangements.

If the curator wishes to charter a plane to the meeting, the cost would come out of his or her monthly check. If the amount the university allocates will not cover the expense of the flight, it will be the responsibility of the curator to pay the balance.

Spouses of the curators are not a necessary expense. Although it is a homey touch to have a husband and wife attend university functions together, the family treatment doesn't always "benefit the university".

There are times when the spouses could be paid for, but this should be on rare occasions. When there are functions in which spouses attendance is considered to be of the utmost importance, their expenses will be included in the monthly check.

Room and board while attending curators meetings are necessary expenses. This again will come out of the monthly check. Once again however, it comes down to personal preference, if the curator wants to drink French wine, great, they can pay for their own. If they want to stay in a reasonable hotel and eat reasonable food, their monthly check will cover all their expenses.

The curators must keep in mind that although the university does appreciate all they do for the university as a whole, the state of Missouri is not noted for its support of higher education.

When they agreed to be curators of the University of Missouri, they agreed to do a public service. True, they should be shown appreciation, however, appreciation can only cost so much.

LETTERS POLICY

The Current welcomes all letters to the editor. The writer's student number and phone number must be included. Non-students also must sign their letters, but only need to add their phone number. Letters should be not more than two typed pages in length.

No unsigned letters will be published. Names for published letters will be withheld upon request, but letters with which the writer's name is published will receive first preference.

Responsibility for letters to the editor belongs to the individual writer. The Current is not responsible for controversial material in the letters, but maintains the right to refuse publication of letters judged by the editorial staff to be in poor taste. No letters with libelous material will be published. Letters may be edited for space limitations.

Letters may be dropped off at the Current offices, 1 Blue Metal Office Building, or the University Center Information Desk. They may also be mailed to Letters to the Editor, Current, 1 Blue Metal Office Building, 8001 Natural Bridge Road, St. Louis, Mo. 63121.

FACULTY EDITORIALS

Faculty members who are interested in writing guest editorials are invited to contribute to the editorial page on a weekly basis.

Editorials, on specific current events and issues, can be drawn from specific fields of study in all academic fields.

Faculty should contact the editor of the

Current if interested in submitting an essay. Editorials may be edited or excluded due to space limitations. Editorials should be submitted in writing no later than 12:00 Noon Monday prior to the date of publication.

Editorials must be signed and no editorial will be published without giving due credit to the author.

I Couldn't Hear The Speech Over The Planes

INSIDE SCOOP

by Steven L. Brawley editor

Fall semester graduates, do you really think you will remember who spoke at your commencement exercises?

This is a question most seniors could care less about. What's more important is going out into the harsh real world (in which most of us at a

commuter campus live in already), and going into debt for a house, car and college trust for our 2.3 children.

Do you think that you will remember the words of wisdom that the commencement speaker offered your graduating class?

Most likely not. However, they give us that last worldly lecture.

UMSL has had its fair share of speakers, ranging from state senators, U.S. congressmen, state governors, and judges, to area leaders of business and industry, educators and even the mayor of St. Louis, who sat through a commencement of his own at this university.

They all give words of advice and then the graduating class ventures out into the real world and discovers there is some truth to that wit and

wisdom offered to them on graduation day.

Last spring, TV star Bill Cosby told seniors at the University of South Carolina-Columbia that they have to make their own world, and that no degree can prepare one for maturity.

Well established institutions like Washington University draw big names, such as Bob Hope, to their commencements. As this campus continues to grow and mature, big names like Hope and Cosby might follow.

William F. Buckley, a sought after graduation speaker, has said he thought most graduating collegians don't pay attention to commencements, but that its kind of a final obstacle to their emancipation.

Many graduates use commencement to make statements about social concerns.

Last spring at the University of Michigan, 300 students demonstrated against the regents' refusal to grant an honorary degree to jailed South African Black Leader Nelson Mandela.

Here at UMSL, the festivities in the Mark Twain Gym are less controversial.

Though it is understandable that advanced preparation is necessary and that inclement weather might occur, UMSL could do better, aesthetically, with an outdoor ceremony of some sort.

If I am going to sit through a ceremony I won't remember anyway, I would rather watch the planes come and go over campus.

Network Links UM Campuses

The University of Missouri's new state-of-the-art telecommunications network linking together all four of its campuses through voice, data and video transmissions is scheduled to be completed in early December.

The network will allow the campuses and the centrally administered units of the university to communicate using nearly every technology available. It replaces less sophisticated facilities that cost the University about \$400,000 annually, according to Coleman Burton, director of University telecommunications.

Burton says the new network will save the university \$100,000 annually. The UMKC to UMC to UMSL part of the intercampus network has been functioning since late September using fiber optics. The final leg of the network, a microwave system to transmit voice, data and video between UMR and UMC, is scheduled for completion December 1.

The new intercampus network will feature 20 voice channels and intercom calling to every campus and metropolitan area. All campuses can have access to uplink capability at the UMR satellite earth station.

"It will be two-way interactive," says Burton. "Students in St. Louis will not only be able to see and hear the instructor but ask questions from the students in the Rolla classroom. This is a state-of-the-art system."

Burton says the course will mark the start of the most exciting part of the intercampus network. "Once people see the possibilities, they're going to suggest uses for the network not even thought of yet."

The intercampus telecommunications network will enhance education and collaboration throughout the university, allowing classes and continuing education programs to reach audiences in separate locations. The network, when it is enhanced, will provide teleconferencing capabilities that could reduce the necessity for travel between campus locations.

The University has requested a \$2.4 million appropriation from the General Assembly to enhance the new system.

"So far, the University has funded the new system entirely from its own resources," Burton says. "We're going to need some help to meet tomorrow's requirements though."

"But the potential enhancement that is the most promising is the four-campus teleconferencing capability."

UM is taking advantage of deregulation of the American telephone industry and long-distance toll service to develop its own less costly advanced technology communications system. As part of the telecommunications upgrade, each campus is installing a new telephone system to take full advantage of the technology being made available.

UMKC's telephone system was completed in July and is expected to net a 10-year savings of \$2,855,000. The Columbia campus telephone system will be completed December 29 with an expected 10-year net savings of \$17 million.

The UMSL telephone system is scheduled to be completed in the early months of 1987 according to Burton. The 10-year net savings is expected to be \$1 million dollars.

By mid-1987, Burton says, UMR will complete its telephone system, which will be 50 percent larger, and has an expected 10-year net savings of \$691,000.

Debate Team Has Successful Tournament Season

The UMSL Debate/Forensics squad is beginning to show signs of success.

At the Joe C. Jackson Memorial Debate Tournament held Nov. 7-8 at Central State University in Edmond Oklahoma, the team of Suzan Harris and Darrell Farhat placed second in a field of 34 teams.

The team of Mark Haynes and Kathy Dyer placed fifth in the same tournament.

The Virginia Craig Tournament held at Southwest Missouri State University was also a success for the team. Freshman Lance French placed fifth out of 51 in impromptu competition.

Northwest Missouri State University in Maryville hosted the Mid-America Forensic league tournament where junior Karen Reilly placed sixth out of 29 in persuasive speaking competition.

Reilly and French are now qualified in their respective events to represent UMSL at the National Forensic Association's national tournament to be held in April in Mankato, Minnesota.

CLAYTON

from page 1

addition and the science complex.

If the joint proposal is accepted by the county, the university has developed several uses for the facility.

Barnett said the university would consider relocating the Continuing Education-Extension program and KWMU to the Clayton site.

Barnett also said Tuesday that KETC-TV has expressed an interest in renting space at the facility. She said this would be compatible with KWMU's organization and could offer a large number of internship possibilities for students.

Also, the university is considering offering some student housing and the possibility of establishing a weekend college at the Clayton site.

Barnett said the Clayton campus wouldn't distract from the main campus' being the "heart of academic programming."

Details about use of the site and financing would have to be approved by the UM Board of Curators.

"The only thing that stands in our way is the small matter of purchase price," Barnett quipped.

Marguerite Ross Barnett

The facility was evaluated by a Chancellor's Ad-Hoc Committee last summer.

Since the hospital became part of the St. Louis Regional Medical Center system in 1985, developers have evaluated potential uses for the facility.

PHYSICAL

from page 1

with motor and pedestrian traffic.

Dawes, Meyer and several faculty members supported asking for a bond issue to pay for parking lot improvements and possibly a new garage near Benton Hall.

The estimated total for the bond issue would be \$3.7 million. This figure includes \$2.2 million for the 400 car parking garage near Benton.

According to Meyer and Dawes, it would cost \$393,000 a year for 15 years to pay back the bond principal and interest at a 5.5 annual percent rate. If the garage were not included it would be almost \$164,000 a year.

Meyer and Dawes included recommendations for payment. They suggested a 66 percent increase in parking fees for students, faculty and staff.

The increase would charge students \$2.90 per hour, up from the current \$1.75 per hour. Part time

faculty and staff would pay \$5 a month, full time would pay \$10 a month.

According to committee members, there has not been an increase in parking fees for almost 15 years.

There would also be an increase of 50 percent in daily parking from 50 cents a day to 75 cents.

Included in the recommendations was a reduction in positions in the Police Department paid for from parking revenue.

Perry said he would not be comfortable with reducing the number of officers currently employed by the university.

The meeting concluded with the decision that another meeting was necessary to draft an action proposal for the December 9 Senate meeting. The next committee meeting will be held December 1 at 2:30 p.m.

Bugg Lake Committee Makes Final Recommendations

Jason A. Kinsley
associate news editor

At the last meeting of the Bugg Lake Committee the committee's official recommendation for the new Bugg lake site was announced.

The motion called for two sites to be designated, one as a biological lake, and one as a purely aesthetic lake.

Site A, located on the South campus, was identified in the official recommendation "to be developed as a teaching and research lake specifically designed for use by the Biology department."

Site C, the former location of Bugg Lake, was recommended for the purpose of serving "primarily as an aesthetic lake with minimum teaching possibilities."

The committee decided to have UM Facilities and Planning Director Jim Edson make the necessary minimum construction guidelines available to the committee.

He is presently working with a consultant to decide the feasibility of the recommended sites.

According to Lowe MacLean, vice chancellor of student affairs, the feasibility study for the sites will cost approximately \$2000. The studies will be paid for by the Chancellor's office.

Bids on construction of the lakes will not be accepted until the feasibility statements are concluded.

During the meeting, the committee discussed possible ways to fund construction of the lakes.

Suggestions for Site A included seeking out federal, state and private corporation grants; support from local conservation groups; donations from biology department alumni and the UMSL Alumni Association; and assistance from the Missouri Park Service.

The Park Service would be interested in partially funding the proposed lakes, because they have land adjacent to the proposed biological lake.

John Mruzik of the Biology Department said he thought the possibility of receiving funds from local conservation groups, such as the Nature Conservancy, was an excellent one. He was also enthusiastic about the proposal to work with the Park Service.

"Because St. Vincent's Park is adjacent to the proposed lakesite," said Mruzik, "I think we should look into whether or not they would be interested in working out an arrangement in which we jointly use the property."

"If we did this, it would be the only wildlife preservation area in an urban setting that I know of in the world. There is already an enormous amount of wildlife at the Park, foxes, raccoons, possums and it would only expand with the addition of the Bugg Lake site," said Mruzik.

Site C would receive some money from the Student Association budget; additional grants from the

Alumni Association; a possible portion of the Student Services Fees

Committee budget; and support from the Normandy Municipal Council.

Campus wide fundraisers would also be organized to fund the aesthetic lake site.

"Biology Department Chairman Charles Granger would be contacted to put together an ad hoc committee in association with the Department of University Relations to look into possible financial resources," said Kathy Grosheim.

Money for maintenance of the lakesites after their construction would come out of the five year plans.

Paul Elsea, director of the Physical Plant, said, "Site A should not result in any on going maintenance costs because of its wildlife setting nature."

MacLean will deliver the report to Chancellor Barnett shortly.

NEWSBRIEFS

Applications are now being accepted from high school students and science teachers wishing to participate in the 14th annual Missouri Regional Junior Science, Engineering and Humanities Symposium at UMSL, March 12-14.

About 350 high school students are expected to attend. Students will compete for scholarships and the opportunity to attend the national conference at an eastern college in the spring.

The symposium will feature student presentations of original research, industrial field trips to area research facilities, and lectures by well-known scientists.

The U.S. Army Research Office, which sponsors the symposium with UMSL, awarded a grant for the event.

Interested students should contact their science teachers or call Nancy Diley at 553-6226.

□ □ □

Steve Givens, editor of UMSL News for the past two years, has been promoted to Senior Information Specialist in the Chancellor's Office.

Serving as interim editor is Jim Rygelski, a former UMSL Public Information Specialist and reporter for the Globe-Democrat.

□ □ □

The University Singers under the direction of Bruce Vantine will present their third annual Festival of Thanksgiving concerts at 8 p.m., Saturday, November 23, at Christ Church Cathedral, 13th and Locust streets.

The concerts are entitled, "And Crown Thy Good with Brotherhood." They will weave narration (by KMOX radio's Anne Keefe and Metropolitan Opera baritone Robert McFerrin), musical interludes, and choral pieces into a Thanksgiving theme. Donations at the concerts will again benefit the Interfaith Partnership of Metropolitan St. Louis.

□ □ □

Louise B. Robbert, history, was elected 1986-87 president of the

Midwest Medieval Conference at its annual meeting October 17-18 at Case Western Reserve University in Cleveland, Ohio.

□ □ □

David Garin, chemistry, has received a grant from the Missouri Committee for the Humanities for a program, "Responsibility of the Scientist in a Technological Age." This will be the second part of a four-program series on science policy co-produced by the UMSL Chemistry Department and St. Louis University's Science, Technology and Society Program.

□ □ □

A farewell reception will be held for Ron Krash, director of libraries, Friday at the lobby of the Thomas Jefferson Library from 3-5 p.m. The reception is open to the general public.

Mr. Krash is retiring for health reasons.

REACTION

from page 1

college of arts and sciences at Washington University, said she had high regard for the foundation, but thought the report painted a rather inaccurate and grim picture of undergraduate education.

Reverend Thomas R. Fitzgerald, president of St. Louis University, was a little less critical of the study.

"I would say that these comments are based on excerpts from the study, and since none of us have seen the study, we have to be cautious of what we say."

"When we see the study we may find that accounts of the report oversimplify or overemphasize points of the study."

C. Peter Magrath, UM president said, "I do not personally believe we're in trouble. I welcome anything that spurs us to take a look at how we're teaching."

Chancellor Marguerite Barnett has said she worries about making certain the university is providing the scope and level of knowledge for a person to develop throughout their career.

CARNEGIE

from page 1

ter for all students, period. If in doing so, the colleges become better known and more successful, so be it," he says. "We are driven by a concern that the next generation be adequately prepared to meet their responsibilities to not only students, but adults as well."

After years of previous school reform reports from the Carnegie Foundation, the U.S. Department of Education, the National Commission of Education in the States and almost a dozen other bodies,

Clinic in the process," he said.

"The second thing I started working on when I took office was alumni relations. The position of manager of alumni relations had been vacant since June 1 of last year, and I found that to be intolerable," Verity said.

Enter Kathy Osborne, UMSL alumnus.

"She has the kind of experience and sensitivity to alumni that we need," he said.

A third project, after the survey research and improving alumni

however, many schools feel they're already on the road to what the report called "an American college renewal."

"We don't find a lot of surprises in this report," says Dr. Robert Edington of Clarion University of Pennsylvania.

"This merely reinforces what we're already doing. I believe this report is going to have a very positive impact. Carnegie is a prestigious organization that everyone listens to," Edington explains.

relations, was communication within UM.

"I felt very strongly that the basic nature of the relationship between UM campuses was adversarial, and anything I could do to reverse that would help the chancellor," Verity said.

"I think getting along would be better than fighting," he said.

"I've tried to be really involved. To be successful, it takes collaborations and teamwork to accomplish what needs to be done," Verity said.

Madrigals Create Festive Spirit

by Christopher A Duggan reporter

As he stepped from the warmth of his car into the cold December air and walked across the parking lot through the darkness of early evening, a thought occurred to him. What did the evening have in store?

Opening the door to the hall, he saw walls hung with brightly colored banners and tables laden with fruit and greenery.

There were jesters, jugglers, lords and ladies dressed in colorful costumes greeting the other astonished guests.

He hadn't gone back in time. He'd gone to the Holiday Madrigal Feast, and what he had in store was an evening in Renaissance England.

The Holiday Madrigal Feast is a dinner put on every year by the UMSL Madrigal Ensemble. The ensemble is a class and a student activity under the direction of John Hylton, professor of music.

The group's main function is to put on the feast every December, but they do perform elsewhere. This year, they have appeared at the UMSL Eldercare Center, at the Bridgeton Community Center, and at a number of banquets.

The ensemble supports themselves entirely through the feast and other appearances, with the exception of a modest amount of money they receive from student activities fees and the university.

"The university has been very supportive in other ways," Hylton said. "For instance, when we first got started, they granted us a substantial amount of money for our costumes."

The Madrigal Ensemble was activated in 1983, and their first feast was in 1984.

"We spent the first year in preparation for the feast," Hylton said. "The first feast was held in the Summit lounge in the University Center. People told us that we would go to all the trouble of putting it on, and nobody would show up. As it turned out, we were sold out five or six weeks beforehand."

The feast has been sold out every time since then. This year's feast is already sold out on December 5th and 7th (Friday and Sunday), and is well on its way to being sold out on Monday the 8th.

This year, the feast will be held at the Glen Echo country club, on Lucas and Hunt south of Natural Bridge road. The building housing the feast was built in Tudor architecture, which is perfectly suited to the ensemble's purpose.

A great deal of preparation goes into the feast each year.

"We rehearse from the end of August to the beginning of December," Hylton said. "We also have to line up auxiliary performers, such as jesters and jugglers. Food preparation also takes quite a bit of time."

"Our costumes are designed by a professional costume designer," Hylton said. "Some people who sing on the University Chorus sew them together at no charge."

This year, the feast will cost \$10,000 to produce.

"The idea of the feast," Hylton

MADRIGAL: A servant pours refreshment for a member of the madrigal ensemble while another member to his left looks imperious and members to his right feed on grapes. (Bottom Left) Members of the ensemble carry in the boar's head in a procession. (Bottom Right) A member of the ensemble juggles to entertain guests. Photos of last year's madrigal feast were supplied by the music department.

said, "is to re-create an evening in renaissance England.

This is something the Madrigal ensemble has a fair amount of success doing.

At the start of the evening, the guests are greeted by members of the ensemble dressed in costumes of the period.

They mingle with the guests and make toasts; a holiday punch bowl called a Wassail bowl is available.

The formal evening begins with fanfares from the brass section, and holiday songs called Wassailing songs are sung by the ensemble.

From there, the whole group moves to the banquet hall, where the Lord of the manor presents the rules of etiquette which are very humorous.

A boar's head—not a real one—is then presented in a procession, accompanied by a boar's head carol.

An elaborate banquet is laid out for the guests; during the meal, jesters go from table to table, entertaining the guests.

After the main course, a flaming plum pudding is brought in, and as one might guess, there's a song for that too.

A concert of Elizabethan music follows the meal. The brass section performs, as well as a harpsichordist, but the highlight of the concert is the Madrigal ensemble itself.

Since madrigal music was not confined to England, they sing songs from many different nationalities. The concert lasts for about 40 minutes.

Madrigal music is music that is performed without accompaniment. There is a secular text, and the lyrics generally have to do with love and nature.

It originated in Italy, and was pic-

ked up in Elizabethan England, as well as other European countries.

The songs evolved in homes and castles, where lords and ladies would sing to entertain themselves.

"That's what we're doing here," Hylton said. "It's a group of lords and ladies indulging in an evening of

entertainment. There just happens to be 200 other people watching.

"The idea," he continued, "is to draw in the guests and get them to share in the warmth of the evening."

What does the ensemble do after

see MADRIGAL page 7

Ensembles Offer Concerts of Holiday Music

Instrumental and choral ensembles from the university will present concerts of holiday music on Sunday, November 30 and Tuesday, December 2.

The November 30 concert will be held at Faith United Methodist Church, 2950 Droste Road in St. Charles, and the December 2 concert will be held at St. Mark's United Method Church, 315 Graham Road in Florissant. Both concerts will begin at 7:30 p.m. Admission is free.

Participating UMSL ensembles are: the Brass Ensemble, directed by Gregory Fox; the Orchestra,

directed by James Richards; and the University Chorus and Madrigal Ensemble, directed by John Hylton.

The Brass Ensemble will present a medley of holiday songs and carols prior to the formal opening of the concert.

To begin the program, the Orchestra and Chorus will combine to present Vivaldi's "Gloria," featuring soloists Mary DeFrank, Kathy Ackmann and Nancee Ott.

Next, the Madrigal Ensemble will present excerpts from their upcoming Holiday Madrigal Feasts that will be presented at Glen Echo

Country Club on December 5, 7 and 8.

This ensemble will be making a concert tour to England from December 26 to January 4.

The concert will continue with selections by Petzel, Purcell and Grillo by the Brass Ensemble.

To conclude the concert, the University Chorus will perform popular holiday selections, including "Still, Still, Still," by Norman Luboff, "Sleigh Ride," by Leroy Anderson, and "Do You Hear What I Hear?" by Regney and Shayne.

For more information, call the Music department at 553-5980.

'Forest Park' Offers New Perspectives On St. Louis

The story of the St. Louis park made famous by the 1904 World's Fair is told in "Forest Park," a book published this fall by the University of Missouri Press.

The book's authors, Caroline Loughlin and Catherine Anderson, and other members of the Junior League of St. Louis spent five years conducting research for the book.

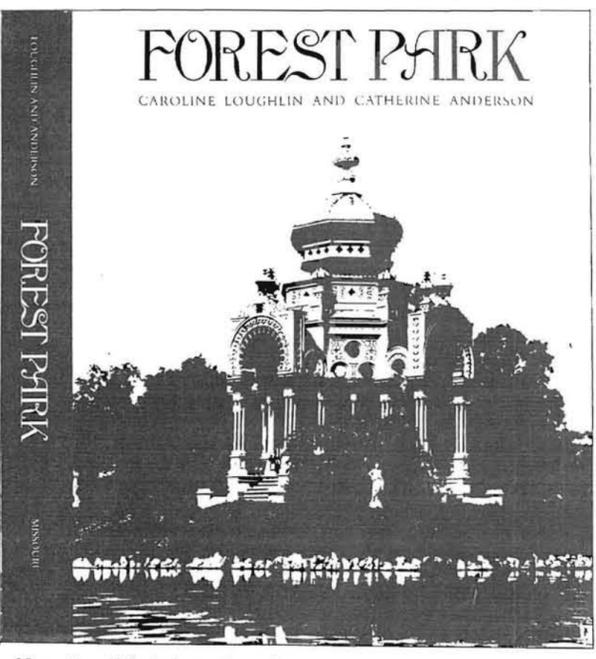

Forest Park is visited each year by more than 4 million people who visit the zoo, the art museum, the historical society and the science center or skate, play golf, attend performances at the Muni Opera or enjoy the landscape.

"Forest Park" is an account of the people—such as carriage drivers of the 1870's—and the events—such as rock concerts a century later—that shaped the park's history.

The park resulted from the late nineteenth century boosterism that encouraged the establishment of green spaces in many major cities.

Forest Park was the center of attention during the world's fair and years later when Charles Lindbergh's triumphant return to St. Louis after his 1927 trans-Atlantic flight attracted more than 100,000 people to the park.

During its first century, the park has been shaped by many forces still at work, such as city-county conflicts and financial pressures. Therefore, a book about the park's past offers a new perspective on the history of the city while providing a basis for future decisions about the park.

More than 250 photographs and drawings illustrate the book. The authors are active members of the community. Loughlin has served on the Forest Park Master Plan Advisory Task Force and on the board of the St. Louis Zoo Friends Association. Anderson has been an officer of the League of Women

Voters of St. Louis County. "Forest Park" has a list price of \$29.95. Additional information is

available from the University of Missouri Press, 200 Lewis Hall, Columbia, Missouri 65211. The book is also available at the UMSL Bookstore.

Afro-American Holiday Is More Than A Celebration

by Andrea Stewart reporter

Kwanzaa is a week long Afro-American holiday celebrated between December 26 and January 1. The holiday reflects the dual character of the identity and experience of the Afro-American people.

Kwanzaa celebrates 20 years of rediscovering, rescuing and reconstructing black Americans' Africinity, a practice that is celebrated by millions of black people at various socio-economic levels.

In 1966, Dr. Maulana Karenga, an activist, scholar and theorist of the black movement, created the practices and customs of Kwanzaa.

Kwanzaa reaches back to African roots but is structured around the needs and life of Africans—not on the continent of Africa, but in the United States.

The core principles of Kwanzaa are the "Nguzo Saba"—the Seven Principles developed by Karenga. The principles are: unity, self-determination, collective work and responsibility, cooperative economics, purpose, creativity, and faith. The Nguzo Saba are social

principles dealing with how Afro-Americans relate to each other and how they build their lives.

The holiday was derived from and inspired by the harvest celebrations of agricultural Africans. Kwanzaa is a time for black Americans to gather and celebrate themselves and their achievements, impelling them to reaffirm dedication to greater achievements and strive for fuller, more meaningful lives.

Like all holidays, Kwanzaa is both a cultural and a political expression. Culturally, it is the expression of a people conscious of their history; politically, it is a projection of power that carries from the unity and self-determination of black Americans to establish and celebrate such a holiday.

The first Kwanzaa was celebrated between December 26, 1966 and January 1, 1967 as an effort to escape the commercialism, alienated activity and expensive gift-giving of Christmas.

Kwanzaa is not a religious holiday or a substitute for Christmas, but a celebration that honors black history and the black struggle for liberation and a higher level of human life.

Kwanzaa has symbols that instruct and inspire. Seven basic symbols and two supplementary symbols include: crops; a mat; a candle holder; ears of corn; gifts; a unity cup; and seven candles. Supplementary symbols are the seven principles and a national flag or standard.

The symbols are both traditional and modern; they reflect traditional and modern concepts which evolved out of the life and struggle of Afro-American people.

By its origins and practices, Kwanzaa reinforces the fact that black Americans are an African people who, through the hazards and hassles of history find themselves in America.

Kwanzaa helps to ensure that the black community never loses its name or denies its African origins, regardless of its life and history in America.

Kwanzaa is a life experience, not simply a celebration. As a living social practice, it is a week of remembering, reassessing, recommitting, regarding and rejoicing. Kwanzaa is a wholly Afro-American holiday and is the only nationally celebrated non-heroic Afro-American holiday in the United States.

Here's Today's Daytime Dilemma

TRUST ME

by Ann Richardson associate features editor

I love attending college. I am eager to obtain new and intriguing knowledge from learned professors. I enjoy organizing study groups and participating in UMSL related activities. But what's most important are the opportunities open to college students. Not just the opportunity for a challenging career after graduation. There's a more important one, I refer to the opportunity of getting out of class in time to watch daytime TV.

I have spent many hours in front of the tube during Zone Out Time. This is the period that occurs when you don't want to start your homework yet because your brain still hurts from use during classtime. Instead you choose to embrace the doctrine of couch potatoes everywhere by watching a semi-successful businessman yell, "big bucks, no whammies!" at a lighted game board.

Just because you're beached in front of the TV does not mean that your grey matter is not getting any exercise. Don't let Mom, Dad or sociologists fool you into believing that television inhibits learning. On the contrary, it promotes it. I have learned more history from "Jeopardy" than from any history class I have attended. Chances are that you probably participate more when you watch game shows than at school—no one makes you feel stupid if you miss a question.

There is, however, one game show that I dislike. It's "Wheel Of Fortune." And no, it's not because I am jealous of the lovely Vanna White, I hate it because I can never solve the puzzles. I know people who have it solved just by seeing the 3-second teaser for the show that day. I'm lucky to get it if all of the letters are turned, and sometimes I don't even get it then. Whoever I am watching the show with, has solved the puzzle and picked out their merchandise before I am finished wondering how Vanna's dress got by the censors.

It's enough to make me watch "Divorce Court."

University Singers Present 'Festival of Thanksgiving'

The third annual "Festival of Thanksgiving" concert presented by the University Singers, will be held at Christ Church Cathedral, 13th at Locust at 8:00 p.m. Saturday, November 22 and 2:00 p.m. Sunday, November 23.

Written and conducted by Dr. Bruce Vantine, the program consists of narration, and musical interludes as well as choral and instrumental pieces by Bach, Handel, Copeland, Joubert and others woven together to center on the

DR. BRUCE VANTINE: Vantine wrote and conducted the concert, entitled "And Crown Thy Good With Brotherhood." Pieces by Bach and Handel will be presented in the festival of Thanksgiving concert.

Thanksgiving theme, "And Crown Thy Good With Brotherhood."

Vantine has selected texts from statesmen, educators, philosophers and religious leaders to emphasize the message of Thanksgiving and the inherent good in American democracy.

Metropolitan Opera baritone Robert McFerrin will also be a featured narrator and will sing Handel's "Thanks Be To Thee" and solo with the University Singers on the spiritual "Soon-ah Will Be Done." McFerrin provided the voice for

Sidney Portier in the movie version of "Porgy and Bess."

In addition the the University Singers, the Saturday evening performance will feature the Landolfi String Quartet, the Bel Canto Chorus of St. Louis, the St. Louis Children's Choir, and the UMSL High School Honors Choir, which includes over 80 high school students selected by their choral directors to represent twenty-one area schools.

Also appearing will be the Children's Community Choir sponsored by the First Presbyterian Church of St. Louis, the choirs of Concordia Lutheran Church of Kirkwood, Our Lady of Providence Catholic Church, and Girl Scout Troop 2392.

The University Singers have appeared in concert halls and on community artist series throughout the country. Representing broad campus participation, the fifty-five select voices perform a variety of sacred and choral music as well as carols, spirituals and folk melodies.

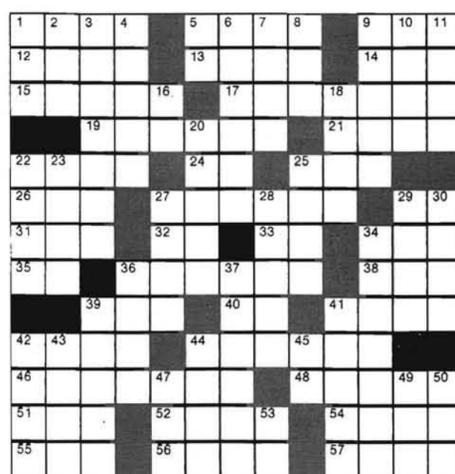

Tickets will be available at the door for a five-dollar suggested donation. Proceeds will go to benefit the many activities for the Interfaith Partnership of Metropolitan St. Louis.

Interfaith Partnership is a broad-based volunteer organization that deals with community issues of hunger, housing, health care, youth, family, and the elderly.

NARRATOR: Robert McFerrin will narrate portions of the festival of Thanksgiving concert. McFerrin, who is a baritone with the Metropolitan Opera, will also sing solo and with the University Singers.

the feast has been successfully carried out? Normally nothing.

The feast usually marks the end of their season; they spend the time planning the next season.

This year, however, the ensemble will be travelling to England for ten days where they will do six concerts in the London area. They will leave on December 26th, and return on January 4th.

"The students raised the money themselves," Hylton said. "They even contributed some out of their own pockets."

They will visit such places as Westminster Abbey, Stratford upon Avon, and Oxford.

There the Madrigal ensemble will perform for the English people and for the ghosts whose memory they preserve.

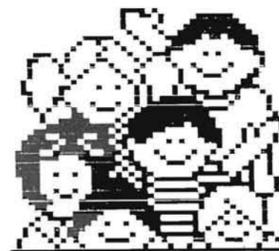

"Students In Support Of Children" Organize Group Here

by Phyllis Allen features editor

A new organization "Students In Support Of Children," is being formed on campus in cooperation with the University Child Development Center.

The organization is open to all UMSL students interested in young children. The main focus of Students in Support of Children is to serve child advocates by arranging seminars, workshops and other activities which provide information and services to parents of young children, students interested in the needs and welfare of young children, and children in the University Child Development Center.

The organization sponsored a free

seminar, "Selecting Appropriate Toys for Children" on Wednesday, November 19 from 7 to 8:30 p.m.

Topics discussed were "Safety Considerations in Toy Selection," "Selecting Developmentally Appropriate Commercial Toys," and "Toys You Can Make At Home."

Linda Estes, supervisor at the Child Development Center indicated that tentative plans call for a seminar in January on selecting software for preschool and young children.

Later seminars will, according to Estes, alternate between providing information on educational and health matters regarding young children.

Students in Support of Children meets the first Wednesday of each month in Room 101 South Campus Classroom Building from 1 to 2 p.m. Membership is open to all interested students. No membership fees are required.

Dr. Lori Geismar-Ryan, Director of the University Child Development Center and Assistant Professor of Childhood Education is the organization's faculty advisor.

Rivermen Ready For 1986-87 Season Tip-off

Cedric R. Anderson

The Outlook

Under normal circumstances losing your top two scorers gives a college coach a few worries, but head coach Rich Meckfessel believes the 1986-87 Rivermen will be better than last year's team, despite the loss of Ron Porter and Dellondo Foxx.

"If we haven't misjudged the capabilities of our new players," he said, "then we have replaced our losses and improved ourselves in every other area."

Foxx and Porter combined for almost 40 points a game last year and provided most of the offense for the Rivermen.

"Last year, if Foxx or Porter were off then we had a hard time scoring," Meckfessel said. "This year we will be more balanced."

That balance will come from a team made up of five returning lettermen, three junior college transfers, one redshirt center, one standout freshman recruit and two walk-ons.

Returning starters are Mike Strater, a 6-5 senior forward, and Duane Young, a 6-2 senior guard. Strater provides outside shooting ability and some inside power as he averaged 10.7 points and 5.3 rebounds per game. He will be the Rivermen's biggest threat to score from three point range. Young will be expected to be a leader on the floor and to run the offense. He averaged 6.8 points a game in 1986-87.

Other returning lettermen for the Rivermen are forwards Kevin Morganfield and Mark Stanley and guard Jeff Wilson. Morganfield averaged 4.5 points per game in limited action and had his biggest game of 15 points in a starting role against Southeast Missouri. Stanley, at 6-6 the second biggest man on the squad, averaged 3.8 points and 2.4 rebounds per game. His best performance came when he picked up 10 points against Missouri-Rolla. Wilson also scored 18 points - his career high - against Missouri-Rolla.

After a season without a true center, Meckfessel may have solved the problem this year with 6-10 junior center Jim Gregory. Gregory was red-shirted last year after transferring from Arkansas State. If Gregory can establish himself in the center he should provide both a scoring threat and some rebounding power.

Meckfessel dipped into the junior college ranks and came up with three players from the tough Jayhawk League of Kansas. Kevin Brooks, a 6-5 power forward, averaged 15 points and 12 rebounds a game at Cowley County Community College. Eric Love, a 6-1 guard, picked up 18.5 points and dished out 3.5 assists per game at Pratt Community College. Derek Thomas, a 6-3 guard, averaged 16.2 points a game for Kansas City (Kan.) Community College. All were Jayhawk League All-Stars.

Meckfessel sees a bright future for his only freshmen recruit, 6-4 freshman Von Scales. Earlier this year, Meckfessel said he believes Scales is as good as Ron Porter was in his freshman season. As a senior at DeSmet High School he averaged 18 points and 10 rebounds per game. He also shot an amazing 68 percent from the field to establish a new school record.

Sophomore Brian Shipp and freshmen Terry Dodd are both walk-ons. Shipp played at Northside High School in Tennessee, while Dodd played his high school ball at Pattonville High School.

If the squad can provide a balanced attack the Rivermen may be able to sneak up on a few teams as they were picked to finish sixth in the MIAA preseason coaches' poll.

Head coach Rich Meckfessel and assistant coach Chico Jones

Former player Dellondo Foxx

MISSING: Former player Ron Porter will be missed this season. However, he will be stalking the sidelines as a student assistant coach.

Kevin Brooks, 6-5, Junior Forward

Transfer from Cowley County (Kan.) Community College... averaged 15 points and 12 rebounds per game a year ago... Jayhawk League All-Star... Northeast High School (N. Little Rock, Ark.) graduate... lead the Rivermen with 20 points and 12 rebounds in exhibition game with Yugoslavian team.

Terry Dodd, 6-3, Freshman Forward

Walk-on to 1986-87 team... Pattonville High School graduate.

Jim Gregory, 6-10, Junior Center

Red shirt last season... expected to provide rebounding power at the center spot this season... transfer from Arkansas State... Ritenour High School graduate.

Eric Love, 6-1, Junior Guard

Transfer from Pratt (Kan.) Community College... scored 18.5 points per game while shooting 53 percent from the field last season... averaged 3.5 assists... Jayhawk League All-Star... Northwest High School (Wichita, Kan.) graduate.

Kevin Morganfield, 6-4, Sophomore Forward

One of three returning sophomores... averaged 4.5 points and 2.4 rebounds per game coming off the bench a year ago... put in 15 points against 1985-86 Division II tournament runner-up Southeast Missouri... was a first-team All-State pick... Luthern North High School graduate.

Von Scales, 6-4, Freshman Forward

All-Metro player last year... shot 68 percent from the field while averaging 18 points last year... averaged 10 rebounds per game... DeSmet High School graduate.

The Coaches

Coach Rich Meckfessel returns for his fifth season at UMSL. In four years at UMSL he has compiled a record of 50-60 and now has a career record of 300-228.

A native St. Louisian, Meckfessel played basketball and earned his bachelor's degree at Washington University. He then served as an assistant coach there for five years before being appointed as athletic director and head basketball coach at Morris Harvey College in Charleston, West Virginia. Meckfessel led the team to the NAIA national tournament three times and to the semi-finals in 1967. Meckfessel came to UMSL in 1982 and compiled a 15-13 record in his first season.

In 1985, Meckfessel received MIAA and NCAA South Central Region "Coach of the Year" honors.

Meckfessel will be assisted again this season by Chico Jones, Paul Ellis and player-turned-coach Ron Porter. This will be Jones' eighth year as an assistant at UMSL. He also teaches at Normandy Junior High School. Ellis is the fulltime assistant on the team. He was the head coach at Lewis and Clark Community College before joining the UMSL staff last year. Ron Porter finished his playing career at UMSL by finishing third in both career rebounding and scoring. He is a student assistant coach while he is finishing his degree in secondary education.

Riverwomen Shoot For Top In 1986-87 Season

The Outlook

The Riverwomen should be more optimistic going into the 1986-87 season after last year's 15-13 record and a 6-6 conference mark, the first winning season since 1980-81. Coach Mike Larson returns eight letterwinners, including all five starters, to form the nucleus for a team that is picked to finish third in the MIAA in the preseason coaches poll.

Leading the team again this year will be UMSL all-time leading scorer Gina Gregory. The 5-9 senior forward has recorded 1,299 career points and needs only 100 rebounds this season to become the career leader in rebounds. A fourth team All-America selection by the American Women's Sports Federation last year, she also set a school record by making 82.5 percent of her free throws. She averaged 17.1 points and 6.3 rebounds a game last year. She will be the big gun offensively for the Riverwomen again this season.

Grace Gain, a starting forward a year ago, will begin this season as the backup center, but should see a lot of time at both positions. The 5-10 junior averaged 7.2 points and 5.6 rebounds per game last season.

Anchoring the squad is honorable mention All-MIAA center Kathy Rubach. The 6-1 junior posted 10.5 points and 7.5 rebounds per contest in her sophomore season.

Gain and Rubach will receive inside help when 6-2 transfer Sandy Hill becomes eligible at the end of the semester. Hill played for two seasons at Florissant Valley Community College and her size and experience should benefit the squad.

Head coach Mike Larson sees the inside game as a determining factor for the Riverwomen.

"If we can improve our inside game, then we can only get better," he said. "We have to keep our big people out of foul trouble and we and we need to improve our rebounding."

Larson expects big things from his guards this season. "Our guards should be our strong point," he said. "Kelly O'Neill, Kris Wilmesher, Deb Moreno and Alicia Pierce are all good ballhandlers."

O'Neill is the only recruited freshmen on the team and averaged 16.9 points, 7.4 rebounds and 5.0 assists in her senior season at Parkway Central High School. She turned in an excellent performance in UMSL's only exhibition game and should provide some defensive spark to the team.

Moreno, Pierce and Wilmesher will all play important roles at the guard spot. Moreno was an All-MIAA pick last season as she led the squad in steals with 48 and assists with 132. Wilmesher handed out 76 assists coming off the bench and averaged 13.7 points in the final seven games last year and was selected as a freshmen All-American by the American Women's Sports Federation.

Pierce returns for her final season as a Riverwomen. She picked up 7.6 points and 2.9 rebounds per game last year.

Larson will also have some experience coming off the bench this season. Senior Kaye Klotzer will provide some offense, while sophomore Claudine Mitchell is known for her defensive abilities.

Karen Rudolf, a freshman from Rosary High School, made the squad as a walk-on.

While hoping to improve on rebounding, there are some things which Larson hopes can be good as last year. The squad showed excellent shooting ability last season as they shot a school record 451 from the field and 706 from the free throw line, another school record.

Larson plans to use a variety of offenses this year.

"I think our new personnel will give us more options when it comes to offensive styles this season," he said. "Hill will give us the ability to go inside more often and O'Neill will improve our fast break capabilities."

If Larson can find the right combination of speed, rebounding, shooting and defense, the Riverwomen could make a run at the top of the MIAA.

The Coaches

Head coach Mike Larson returns for his sixth season at the Riverwomen helm. A year ago he led the squad to its best Missouri Intercollegiate Athletic Association conference record with a 6-6 record.

Larson earned a bachelor's degree in physical education from Trinity College in Deerfield, Ill., and also lettered in three sports. He went on to earn a master's degree in Administration of Physical Education at George Williams College in 1977.

Larson began his coaching career at Southeastern Community College in West Burlington, Iowa. In three seasons at Southeastern he compiled a record of 57-20, including back-to-back 20 win seasons in 1979-80 and 1980-81. The team was also undefeated in the Eastern Iowa Conference during both of those seasons.

Larson suffered through four poor seasons at UMSL before leading them to their first MIAA playoff berth in 1986. Larson's career coaching mark now stands at 114-103.

Larson will be assisted again by Ed Harris and Sandy Moriarty. Harris, a former high school coach, returns for his third year as an assistant coach. He is a 1977 graduate of UMSL.

Moriarty is back for her fourth season as an assistant coach after graduating from UMSL in 1983. As a Riverwoman, she received 11 varsity letters.

Cedric R. Anderson

SHOOT FOR THE STARS: Kathy Rubach takes a shot in the Riverwomen's exhibition game against Yugoslavia.

Head coach Mike Larson

All-American candidate Gina Gregory

Kim Clack, 5-9, Senior Forward

Standout goalkeeper for the UMSL soccer team... is new to the collegiate basketball ranks... will see time at both forward and center... has good basketball skills... could be a factor after gaining some experience... L.V. Berkner High School (Dallas, Texas) graduate.

Grace Gain, 5-10, Junior Forward

Returning starter... averaged 7.2 points and 5.6 rebounds per game last season... member of UMSL softball team... received All-State honors in basketball... Hazelwood Central graduate.

Gina Gregory, 5-9, Senior Forward

UMSL's all-time leading scorer with 1,299 career points... needs only 100 rebounds this year to break school rebound record... averaged 17.1 points and 6.3 rebounds per game a year ago... Montgomery City (Mo.) High School graduate.

Sandy Hill, 6-2, Senior Center

Transfer from Florissant Valley Junior College... will be eligible to play after the end of first semester... shot 72 percent from the field while averaging 15 points per game two years ago... expected to improve UMSL rebounding this season... McCluer High School graduate.

Kaye Klotzer, 5-9, Senior Forward

Excellent outside shooter... averaged 4.4 points and 2.5 rebounds per contest last season... transferred from Bethany College (Lindsborg, Kan.) her junior year... second-team All-State selection... Lutheran North High School graduate.

Claudine Mitchell, 5-8, Sophomore Forward

A rare lefthanded shooter... one of the strongest defensive players on the squad... will play a key role coming off the bench... Parkway South High School graduate.

Deb Moreno, 5-7, Senior Guard

Honorable mention All-MIAA in 1985-86... led the team with 132 assists... also led the team in steals with 48... averaged 5.8 points per game... Hillsboro High School (Mo.) graduate.

Kelly O'Neill, 5-8, Freshman Guard

Averaged 16.9 points a game as a senior last year... had an average of 7.4 rebounds and 5 assists... will also provide a defensive spark to the team... Parkway Central High School graduate.

Alicia Pierce, 5-9, Senior Guard

Good outside shooter... averaged 7.6 points and 2.9 rebounds per game her junior year... transferred from Mineral Area Junior College after her sophomore year... Viburnum High School (Mo.) graduate.

Kathy Rubach, 6-1, Junior Center

Honorable mention All-MIAA last year... 10.5 points and 7.5 rebounds per game averaged a year ago... led the team in rebounding last year with 209... first-team All-State pick... Perryville High School (Mo.) graduate.

Karen Rudolf, 5-8, Freshman Forward

One of only two walk-ons on this year's team... did not play basketball her senior year... will need to gain some experience before becoming a factor... Rosary High School graduate.

Kris Wilmesher, 5-5, Sophomore Guard

Freshmen All-America selection by the American Women's Sports Federation last year... averaged 8.8 points per game... averaged 13.7 points the last 7 games of the season... excellent passer... averaged over 20 points per game as a high school senior... All-State high school pick... Linn High School (Mo.) graduate.

Rivermen Receive All-MIAA Honors

Although the Rivermen were overlooked for a playoff bid, they were not overlooked when it came time for Missouri Intercollegiate Athletic Association all-conference picks.

UMSL had six players from their 15-3 squad selected for first team honors and three more picked for the second team.

The UMSL defense, which shutout opponents in 11 of the victories had goalkeeper Jeff Robben and backs Jeff Robinson and Scott Wibbenmeyer named to the first team. Tom Wilson, who played in a record 74 matches as a Riverman, finished his career by being picked for the All-MIAA second team.

Terry Brown and Mark Reiter

were selected as first-team midfielders and Jeff Centerino was selected to the second team.

Mike Malone wrapped up his career at UMSL by being chosen as a first-team forward. Boyd Buchek was a second-team pick.

Brown was chosen as MIAA Most Valuable Player along with Steve Schlichtig of Northeast Missouri. Brown led UMSL in scoring with nine goals and five assists.

UMSL head coach Don Dallas also picked up honors as he shared the MIAA Coach of the Year with Dave Poggi of Northeast Missouri. In 19 years at UMSL Dallas has compiled a record of 175-74-72.

The Rivermen reached a number of milestones this season. Terry Brown scored in seven consecutive

games tying the old mark. Wilson set a new mark for the most games played by a Rivermen. Malone closed out his career as the fourth leading point scorer on the all-time UMSL list. Jeff Robben had 11 shutouts, a new school record, and had the second lowest goals against average with a mark of .70.

Dallas will lose four seniors from this year's team: Malone, Robinson, Wilson and Steve Hoover. An appeal of Terry Brown's eligibility is still pending.

Along with the rest of the squad, midfielder Paul Bielicki is scheduled to return after sitting out this season with a knee injury.

The Rivermen finished the season ranked No. 17 in the final NCAA Division II poll.

Swimmers Improving Every Meet

The UMSL swim team was on a roller coaster ride last weekend as they fell to Missouri-Rolla in a dual meet, but came back and gave an excellent performance at the Washington University Relays, beating MacMurray 77-24, and then losing to a tough Washington University team 131-70.

Tom Adams continued to dominate at Rolla as he won the 50 yard freestyle and finished second in the 100 freestyle.

"The performance of Tom Adams continues to improve," coach Mary Liston said. "I am looking for a major time drop in January."

Many of the swimmers competed in events other than their own, so the team could try out some different line-ups and individual strokes.

The divers, a bright spot at the start of the season, have been sidelined until January. Alan Woodhouse has been injured in an auto accident and will hopefully be back in form by then and Chip Crow will also be eligible for competition.

The women on the team got their first chance to compete against other women and did it in fine fashion. They won the 50 and 100 freestyles and placed second in the 50, 200 and 500 freestyles, the 100 fly, the 100 back and the 100 breaststroke.

Adams won the 50 and 100 freestyle, while Greg Menke scored double wins in the 100 fly and 100 breaststroke and finished second in the 200 individual medley. Tom Lombardo, in a switch from distance

to sprints, won the 200 free and was part of the second place relay team, along with Chris Sanz-agero, Steve Pummer and Adams.

The squad also finished second in the 1000 free and the 100 fly.

"The number of first and second place finishes indicates how strong our team is this year," Liston said.

The squad travels to Grinnell College in Iowa for a meet Nov. 21 and 22, before returning for their next home match against the University of Arkansas-Little Rock. The tough Arkansas-Little Rock team features several foreign swimmers, including a member of the 1984 Turkish Olympic team.

University of Missouri - St. Louis

HOLIDAY FEST 1986

December 1 through December 5

MONDAY, DECEMBER 1

Decoration of the Community Tree
10:00 AM - 2:00 PM
University Center Lobby

Campus departments and student organizations will put decorations representing their area on a special tree in the lobby of the University Center

Film: Miracle on 34th Street
12:00 Noon - 2:00 PM
Summit Lounge

The original 1947 holiday classic will be shown free of charge in the Summit Lounge

Gingerbread House Display
7:00 AM - 7:00 PM
Underground Cafeteria

A holiday Gingerbread House will be on display in the Underground. With every purchase, you may enter your name to win the Gingerbread house. Drawing will be held December 15. You need not be present to win

TUESDAY, DECEMBER 2

Food Drive Collection
10:00 AM - 2:00 PM
University Center Lobby

Campus departments and student organizations will deliver special baskets of food for the needy of St. Louis. The baskets will be taken to the North Side Team Ministries on December 8, but will remain on display in the lobby for the entire Holiday Fest week.

Madrigal Singers Performance
2:00 PM - 3:00 PM
Summit Lounge

UM-St. Louis' own Madrigal Singers will perform holiday songs of the medieval period.

WEDNESDAY, DECEMBER 3

Hand Craft Fair and Sale
10:00 AM - 6:00 PM
University Center Lounge

Display and sales of handcrafted items by local artists. The sale will include pottery, wood carvings, knitted and crocheted items, paper quilling, jewelry, ornaments and more.

Special Holiday Meal
10:30 AM - 1:30 PM and 3:45 PM - close
Underground and Marillac Cafeterias

Sumptuous holiday preparations such as carved roast beef and ham, vegetables, holiday desserts and special holiday beverages will be available in both campus cafeterias.

Harpist, Harvi Griffin
"Bach to Rock"
12:00 Noon - 2:00 PM
Summit Lounge

A special musical event. Harpist Harvi Griffin will perform a variety of musical styles from "Bach to Rock" including jazz, rock, classics and of course some special holiday sounds. Music like you've never heard it. ...You're going to love it.

THURSDAY, DECEMBER 4

Craft Fair and Sale
10:00 AM - 6:00 PM
University Center Lounge

The Craftfair and sale continues for the final day. A great opportunity to purchase that special gift.

Special Holiday Meal
10:30 AM - 1:30 PM and 3:45 PM - close
Underground and Marillac Cafeterias

The second day of special holiday fare.

WE CAN MAKE YOU LAUGH!
12:00 Noon - 2:00 PM
Summit Lounge

A perfect compliment to the Holiday Fest activities and spirit. Three talented New York comedians and one very specially trained dog will try to make you laugh. Contestants will be selected at random to compete against the comedians for cash prizes. Guaranteed to make you quiver like a bowl full of jelly.

FRIDAY, DECEMBER 5

Wrap up the week's activities with a trip through the University Center. Food baskets and the Community Tree will remain on display all day. Drop by to check out the results
