PURPOSE & GOALS
The UMSL Research Awards are designed to strengthen faculty research and creative activities.

- A significant portion of the funds available for faculty research support is based on facilities and administration cost recovery from externally funded grants and contracts. In order to perpetuate the fund, one goal of the UMSL Research Awards is to support faculty whose competitive position for external funding will be improved by such assistance.
- Awards also are given to help faculty in all disciplines maintain an active research program, even if external funding is difficult to obtain. Awards are intended to promote research innovation and the long-term success of an applicant’s program rather than as a vehicle for student support.
- Special consideration, particularly for summer research support, will be given to junior faculty to assist them in establishing a strong research record. Generally, tenured faculty will not be awarded summer salary support.

FUNDING
Funding may be requested for the following:

- Research assistants, equipment, supplies, travel to research locations, and salary support for course reductions, research leaves, and summer research.
- Funds will not be awarded for domestic travel to conferences, but will be awarded for travel to international conferences in conjunction with research-related travel.

The Research Committee will fund proposals in the range of $1,000 to $12,500. The Committee will consider the appropriateness of the budget and may award less than the requested amount.

The Committee encourages applicants, particularly first-time applicants, to meet with faculty from their unit who have formerly served on the Senate Committee on Research (see the Senate web page for a listing).

Examples of successful applications from prior competitions may be available in the Office of Research Administration. Please check with the ORA staff.

ELIGIBILITY & GENERAL GUIDELINES

- Eligible applicants are full-time, benefits eligible faculty, who will remain employed by the University for one full year following the end of the award period.
- Non-tenure-track faculty and professional staff must hold a terminal degree.
- Postdoctoral associates may be supported by their faculty mentor’s awards.
- Faculty with active Research Awards may apply only if the newly proposed project will begin after submission of the final report and closure of the current award account.
- Prior recipients of internal University research funding, including UM Research Board funding, must: 1) have submitted an external funding application subsequent to the most recent internal
funding award, 2) be submitting such an application simultaneously with this UMSL Research Award application, or 3) provide a compelling argument as to why a submission for external funding has been delayed.

- Applications will not be accepted from a faculty member who has any final report(s) outstanding from previous internal University research funding.
- Only one application from a faculty member as principal investigator (PI) or co-principal investigator (Co-PI) is allowed per proposal deadline.
- Applicants may request research leave for one semester or summer salary support, but not both and not research leave for two semesters. Recipients of research leave or summer research support cannot receive other University-funded salary support during the period of the award. Summer-research-support recipients may teach no more than one course during one four-week summer session. Generally, faculty will not receive more than two summer salary awards from this fund prior to receiving tenure at UMSL. The amount requested for research leave must include salary ($4,000) and fringe benefits ($1,425), or $5,425 per course.
- Graduate students cannot be supported on a research award if they simultaneously hold a Dissertation Fellowship, a Graduate School Fellowship, or a Graduate Student Summer Research Fellowship.
- Any recipient who receives external or UM Research Board funding for essentially the same project must return the UMSL Research Award funds to the extent of the overlap.

APPLICATION FORMAT
All pages of the proposal, starting with the Proposal Summary, must be numbered consecutively. The committee recognizes the educational value of preparing a proposal in the style used in the discipline and at a level appropriate for evaluation by disciplinary colleagues.

1) **Completed Application Form** (includes itemized budget).

2) **Proposal Summary** (Maximum of 500 words, 12 pt. font)
   Summarize the objective and significance of the research or creative activity for which UMSL Research Award funding is sought. This summary must be written in a manner that is understandable to colleagues in all disciplines.

3) **Proposal Narrative** (Maximum of seven double-spaced pages, 12 pt. font)
   Please include the following:
   - Objectives and significance of the proposed research or creative activity.
   - Relevant previous work by you and others.
   - Plans for accomplishing the objectives including methods, research design, the roles of all personnel involved and plans for access to any special resources.
   - Tasks to be assigned to any research assistants and the qualifications required.
   - Proposals and manuscripts expected from this project.
   - Preferred starting date (explain if timing is critical).
   - Explicit justification for each budget item. Specific justification for any requested teaching replacement costs.
   - An explanation of why UMSL Research Award funding is required for your project.
   - Other support available or being pursued for this project, including support from the department, school or college, campus or external sponsors (matching funds will strengthen the application).
   - Other supporting material you wish to include (must be included within the seven-page limit).
4) **Literature Cited** (Maximum of two single-spaced pages, 12 pt. font)
   Provide bibliographic references and titles for literature cited in the narrative.

5) **Support Letters**
   Letters are required from research leave institutions and for matching commitments from departments. No other letters are allowed.

6) **Accomplishments** (Maximum of two single-spaced pages the PI and two single-spaced for each of any Co-PIs, 12 pt. font)

   *Research and Professional Experience*
   List in reverse chronological order with dates: academic history; current position; previous employment; honors; awards; and creative works. Also, list in reverse chronological order the titles and complete references (with hyperlinks) to representative publications pertinent to this application. Any publications that are a direct result of prior internal funding should be preceded by an asterisk [*].

   *Previous or Pending University Support*
   List all internal research support (UMSL Research Awards, UM Research Board, Research Leave, UMSL Junior Faculty Travel Grants [previously UMSL Small Grants], UM Interdisciplinary Intercampus Awards, FastTrack) received or applied for in the last five years. For each entry include the following information in this sequence: project title; funding source; Co-PIs; amount requested; amount awarded (if pending, state so here); support time period.

   *Previous or pending external support*
   List all external research support received or applied for in the past five years. For each entry, include the following information in this sequence: project title; funding source; co-principal investigators; amount requested; amount awarded (if pending, state so here); support time period. Precede project title with an asterisk [*], if this funding was a direct result of prior internal support.

   Prior recipients of University research funds should identify scholarly productivity and external funding resulting from previous support.

   If, during the past five years, external support was received for research or creative activities for which you were a co-investigator, or the funds were awarded directly to you and not administered by the University, please give the details for each such award.

**CRITERIA FOR EVALUATION**
The proposal will be evaluated on the following:

- Clarity and persuasiveness of the Summary. The proposal need not be written for a general audience, but the Summary describing the objective and significance must be written in a manner understandable by non-disciplinary colleagues.
- Quality of work, especially the research design, which must be clearly communicated in the proposal.
- Significance of the work to the field and to the applicant's career.
- Feasibility of the project.
- Anticipated improvement of the applicant's position for competitive external funds.
- Scholarly productivity of the applicant relative to academic rank.
- Results from prior University support.
• Proposals and manuscripts to which the requested funds will contribute.
• Strict adherence to application format. The Senate Committee on Research has asked the Office of Research Administration not to forward for consideration any proposals that do not conform to the guidelines given here or are not on the application form.
• Appropriateness of requested budget.

SUBMISSION
Review your application. Check to be sure you included all of the items listed for the Proposal Narrative, that you have followed the Application Format, and that you have thoroughly addressed the criteria for evaluation.

Once you have completed the Application Form (with all the signatures) and the Proposal, send a PDF file of the complete packet to Brenda Stutte at stutte@umsl.edu no later than 5:00 p.m. on February 18, 2019.
