Introduction

The goal of this tutorial is to help users learn the concepts and procedures used for Accounts Receivable and Billing.

At the end of this module, you will be able to perform the following:

- Perform system setup.
- Request a new customer or update an existing customer.
- Create an invoice.
- Create bill adjustments.
- Print an invoice.
- Enter payments.
- Manage credit processes.

System Setup

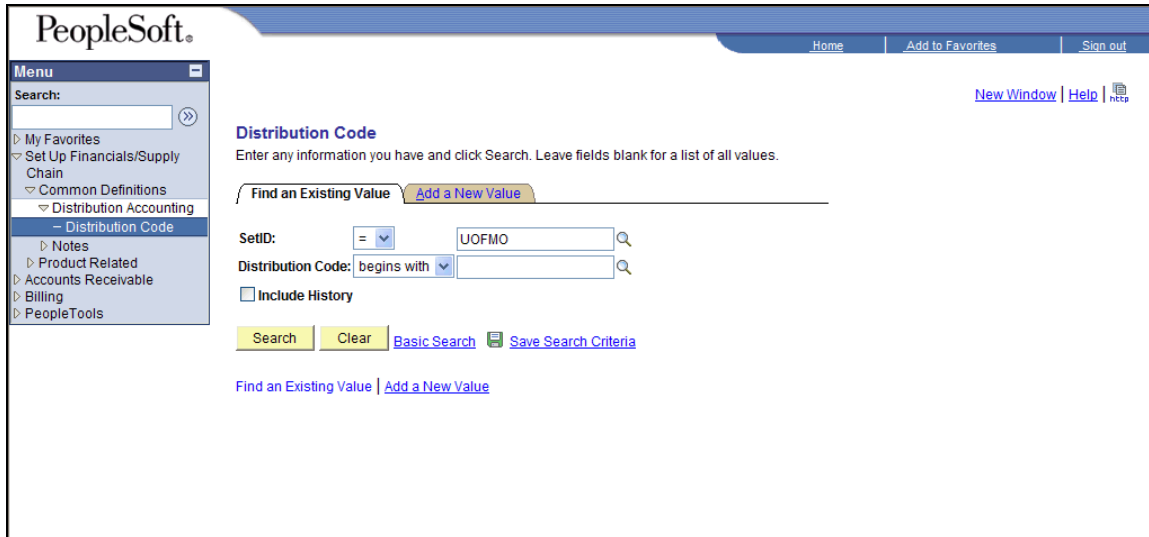

If your operation does a lot of billing, the procedures and system setups in this lesson may be done to save time when invoicing, by creating processes that automatically populate invoice data.

Create Revenue Distribution Codes

The Revenue Distribution Code is used to automatically populate the ChartField string associated with a billing charge line. It represents a valid combination of ChartFields used in crediting an operation. **The only required ChartField is the Account**, but the Fund, DeptID, Program, Class, Project/Grant, and PC Business Unit may be set up as part of the Revenue Distribution Code.

Procedure

**Navigation:** Set Up Financials/Supply Chain > Common Definitions > Distribution Accounting > Distribution Code

Step	Action
1.	Click the Add a New Value tab. 

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
2.	<p>The SetID defaults to UOFMO. Retain the default.</p> <p>Enter the desired information for the Distribution Code field. For this training example, enter "CX51949500".</p>

The Revenue Distribution Code must ALWAYS include your 5-digit MoCode, such as CX519. The code can also include the first 5 digits of the PeopleSoft revenue account number (e.g., CX51949500).

By establishing a distribution code name that includes the MoCode and account number, you are able to set up distribution codes for your DeptID that reflect the various types of revenue your department may receive.

When creating a Revenue Distribution Code for a detail Project, use the project_id 00, complete the process, and send an e-mail to your accounting office with the distribution code and the correct project_id.

Step	Action
3.	<p>Click the Add button.</p> <p></p>

Distribution Code

SetID: UOFMO Distribution Code: CX51949500

Distribution Code Definition

*Effective Date: 10/30/2008 *Status: Active

*Description:

Short Description:

*Distribution Type: AR Unbilled AR Distribution Code:

ChartField Values

*Account	Fund	Dept	Program	Class	PC Business Unit	Project	Activity	Source Type	Category	Subcategory	Affiliate	Statistical Code
1												

Step	Action
4.	<p>The Distribution Code page will display.</p> <p>Change the Effective Date to the first day of the month. For this training example, click the Choose a date button.</p> 
5.	<p>Click the 1 link (first day of the month).</p> 
6.	<p>Enter the desired information into the Description field.</p> <p>For this training example, enter "Disability Services".</p>
7.	<p>Enter the desired information into the Short Description field.</p> <p>For this training example, enter "Voc Rehab".</p>
8.	<p>Click to display the Distribution Type list.</p> 
9.	<p>Click the Revenue list item.</p> 

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
10.	Enter the ChartFields that your Revenue Distribution Code will represent. Enter or select the desired information for the Account field. For this training example, enter " 495000 ".

Do not use **taxable accounts** in the ARBI system; always use a nontaxable account code. Using a taxable account results in loss of revenue to the operation because of the way tax works in this system. Discuss this with your accounting office if clarification is needed.

Step	Action
11.	Enter or select the desired information for the Fund field. For this training example, enter " 0000 ".
12.	Enter or select the desired information for the Dept field. For this training example, enter " C1325004 ".
13.	Enter or select the desired information for the Program field. For this training example, enter " 0 ".
14.	Enter or select the desired information for the Class field. For this training example, enter " 0 ".
15.	In the PC Business Unit field, enter or select the business unit that will use the distribution code. For this training example, enter " COLUM ".
16.	Enter or select the desired information for the Project field. For this training example, enter " 00 ".
17.	Leave the fields to the right of the Project field blank.
18.	Click the Save button to save the information. 

Changes can always be made at a later date using the **Find an Existing Value** page, inserting a row, changing the data, and saving.

Step	Action
19.	You have successfully completed the procedure for creating a Revenue Distribution Code. End of Procedure.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Create Charge Codes

Charge Codes are used for billing any repetitive goods or services. They have predefined units of measure, pricing, descriptions, and revenue accounts. This allows for a minimum of data entry and greatly expedites invoice generation.

Information that defaults to an invoice from a Charge Code can be overridden for added flexibility.

Procedure

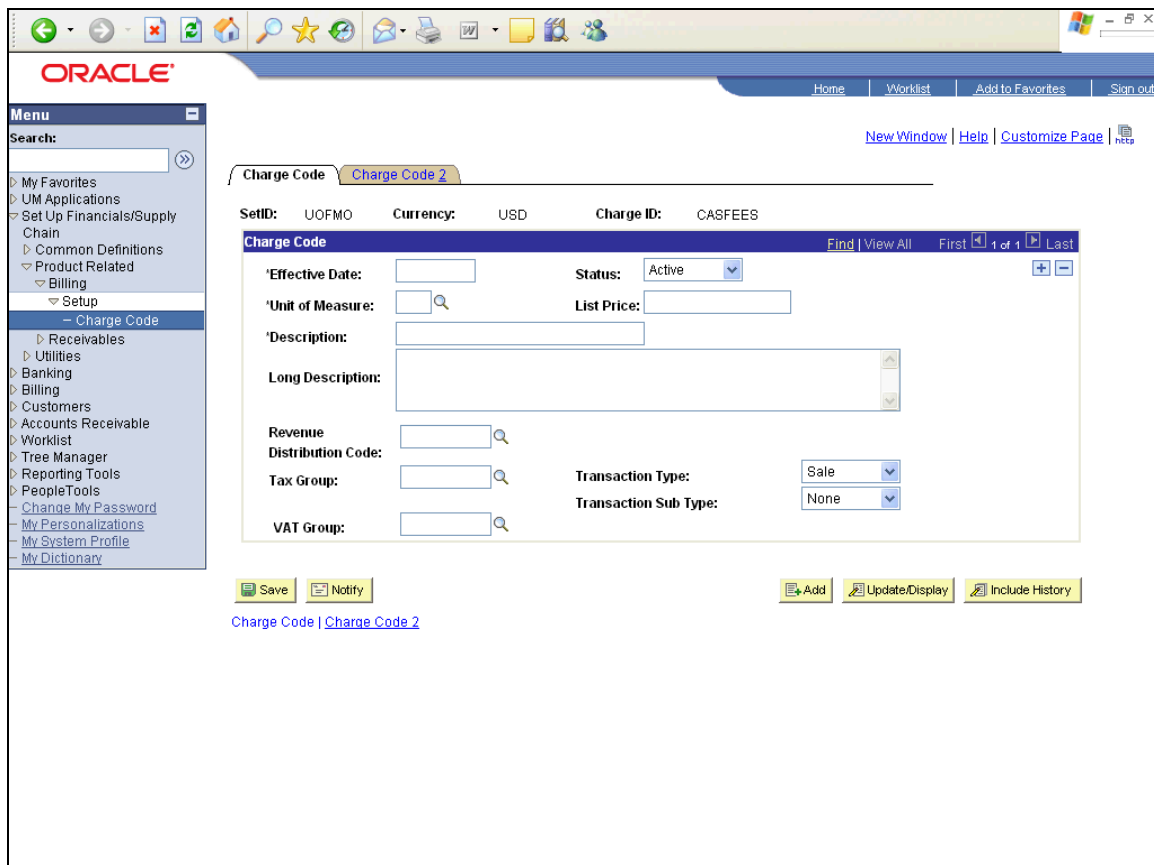

Navigation: Set Up Financials/Supply Chain > Product Related > Billing > Setup > Charge Code

The screenshot shows the Oracle UMSYS FS 9.0 Accounts Receivable and Billing Charge Code setup screen. The interface includes a top navigation bar with the Oracle logo and links for Home, Worklist, Add to Favorites, and Sign out. A left-hand menu displays a tree structure of navigation options, with 'Charge Code' selected under the 'Billing' section. The main content area is titled 'Charge Code' and contains a search form. The search form includes a 'Find an Existing Value' tab and an 'Add a New Value' button. The search criteria fields are: SetID (with a dropdown set to '=') containing 'UOFMO', Billing Currency (with a dropdown set to 'begins with'), Billing Charge ID (with a dropdown set to 'begins with'), and Description (with a dropdown set to 'begins with'). There are checkboxes for 'Include History' and 'Case Sensitive'. At the bottom of the search form are buttons for 'Search', 'Clear', 'Basic Search', and 'Save Search Criteria'. Below the search form, there are links for 'Find an Existing Value' and 'Add a New Value'.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
1.	Click the Add a New Value tab. 
2.	Always accept the defaults of UOFMO for the SetID field and USD for the Billing Currency field.
3.	<p>The recommended naming convention for the Billing Charge ID (Charge Code) is the letter representing your campus, the initials of your department, then your code.</p> <p>Note: It is important for the charge code to be somewhat standardized for ease of use within your department. The Billing Charge ID prints on the invoice.</p> <p>For this training example, enter "CASFEEES" to represent Columbia Accounting Services Fees.</p>
4.	Click the Add button. 

The screenshot shows the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The left sidebar contains a menu with options like My Favorites, UM Applications, Set Up Financials/Supply Chain, Common Definitions, Product Related, Billing, Setup, Charge Code, Receivables, Utilities, Banking, Billing, Customers, Accounts Receivable, Worklist, Tree Manager, Reporting Tools, PeopleTools, Change My Password, My Personalizations, My System Profile, and My Dictionary. The main area displays the 'Charge Code' setup screen for 'Charge Code 2'. The fields are as follows:

SetID:	UOFMO	Currency:	USD	Charge ID:	CASFEEES
Charge Code Find View All First 1 of 1 Last					
Effective Date:		Status:	Active		
Unit of Measure:		List Price:			
Description:					
Long Description:					
Revenue					
Distribution Code:		Transaction Type:	Sale		
Tax Group:		Transaction Sub Type:	None		
VAT Group:					

At the bottom, there are buttons for Save, Notify, Add, Update/Display, and Include History. The URL bar shows 'Charge Code | Charge Code 2'.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
5.	The Charge Code page will appear. Enter the first day of the current month into the Effective Date field. For this training example, enter " 12/01/2007 ".
6.	Enter or select the desired information for the Unit of Measure field. For this training example, enter " EA ".
7.	Entering a List Price is optional. You may want to do so if the price of the item is always the same.
8.	Enter the desired information into the Description field. The Description prints on the invoice. For this training example, enter " Student Consultations ".
9.	Entering a Revenue Distribution Code is optional but will save time by populating the ChartField string also when a Charge Code is selected.
10.	Do not make entries in or change the fields below the Revenue Distribution Code field. Click the Save button. 

Changes can always be made at a later date using the **Find an Existing Value** page, inserting a row, changing the data, and saving.

Step	Action
11.	You have successfully completed the procedure for creating a Charge Code. End of Procedure.

Set Up Standard Notes

Standard Notes contain information you want to reuse. For example, you might have a Standard Note announcing a seasonal promotion or a note to thank customers for a particularly large order. Although you can always write a note at the time an invoice is created, this topic shows you how to create a note that you can select when creating an invoice. This can save time if you will use notes frequently.

In Billing, you can view notes associated with customers by clicking the Notes button that appears beside other command buttons at the top of the panels in Bill Entry and Bill Inquiry.

Procedure

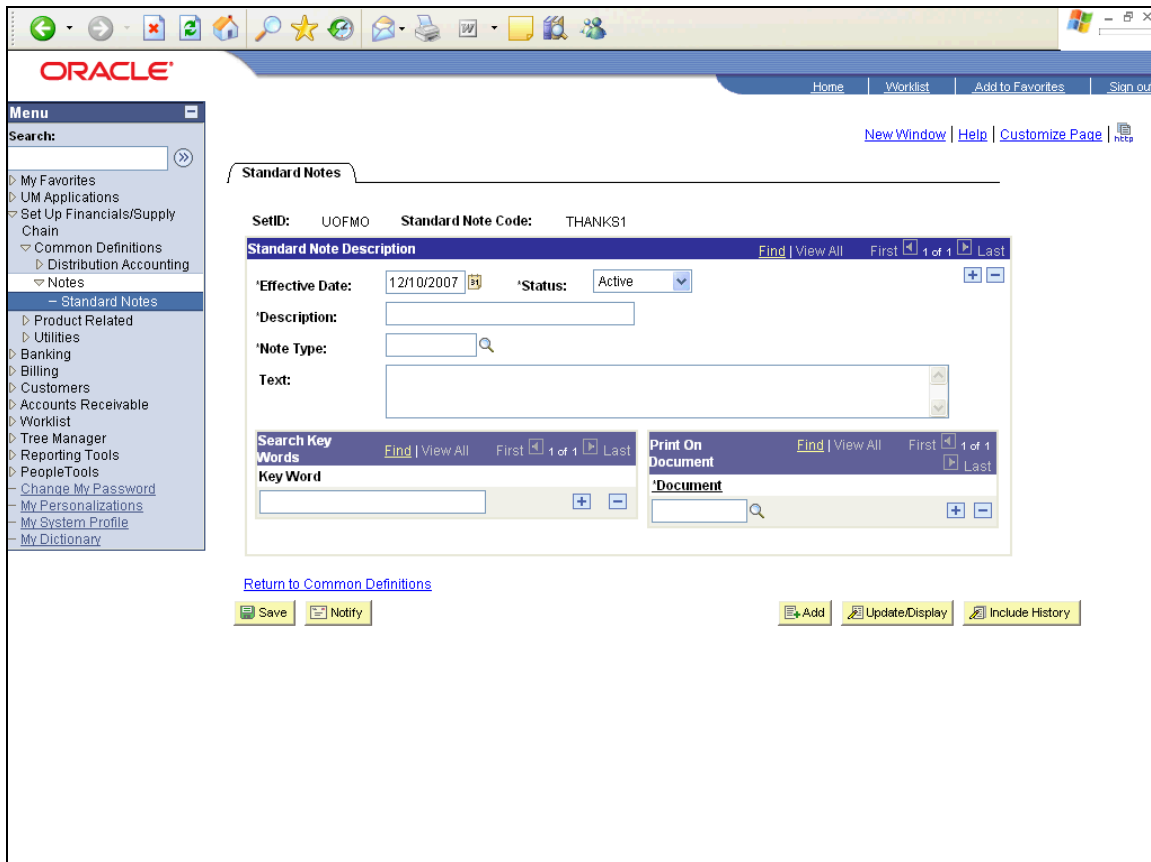

Navigation: Set Up Financials/Supply Chain > Common Definitions > Notes > Standard Notes

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes the Oracle logo, a search bar, and links for Home, Worklist, Add to Favorites, and Sign out. The left sidebar contains a menu with categories like My Favorites, UM Applications, Set Up Financials/Supply Chain, Common Definitions, Distribution Accounting, Notes, Standard Notes, Product Related, Utilities, Banking, Billing, Customers, Accounts Receivable, Worklist, Tree Manager, Reporting Tools, PeopleTools, Change My Password, My Personalizations, My System Profile, and My Dictionary. The main content area is titled "Standard Notes" and includes a search bar with the text "Enter any information you have and click Search. Leave fields blank for a list of all values." Below the search bar are tabs for "Find an Existing Value" and "Add a New Value". The "Find an Existing Value" tab is active, showing search criteria for SetID (UOFMO), Standard Note Code (begins with), Description (begins with), and Note Type (begins with). There are checkboxes for "Include History" and "Case Sensitive". At the bottom of the search section are buttons for Search, Clear, Basic Search, and Save Search Criteria. The bottom of the page features a footer with the text "University of Missouri Division of Information Technology" and "Proprietary & Confidential Page 9".

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
1.	Click the Add a New Value tab. 
2.	Enter or select the appropriate SetID . For this training example, accept the default. Enter a name into the Standard Note Code field. For this training example, enter "THANKS1" .
3.	Click the Add button. 

The screenshot shows the Oracle UMSYS FS 9.0 Accounts Receivable and Billing Standard Notes page. The page has a menu on the left with options like 'My Favorites', 'UM Applications', 'Set Up Financials/Supply Chain', 'Common Definitions', 'Distribution Accounting', 'Notes', 'Standard Notes', 'Product Related', 'Utilities', 'Banking', 'Billing', 'Customers', 'Accounts Receivable', 'Worklist', 'Tree Manager', 'Reporting Tools', 'PeopleTools', 'Change My Password', 'My Personalizations', 'My System Profile', and 'My Dictionary'. The main content area is titled 'Standard Notes' and contains the following fields:

- SetID:** UOFMO
- Standard Note Code:** THANKS1
- Effective Date:** 12/10/2007
- Status:** Active
- Description:**
- Note Type:**
- Text:**
- Search Key Words:**
- Print On Document:**

At the bottom of the page, there are buttons for 'Save', 'Notify', 'Add', 'Update/Display', and 'Include History'. A link 'Return to Common Definitions' is also present.

Step	Action
4.	The Standard Notes page will display. Change the effective date to the first day of the current month. Click the Choose a date button. 

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
5.	Click the 1 link. 
6.	Enter the desired information into the Description field. For this training example, enter " Thanks ".
7.	Enter or select the Note Type . For this training example, click the Look up Note Type button. 
8.	Click on Standard in the Note Type column. 
9.	Enter the desired information into the Text field. This information will print on the invoice. Enter " Thank you for using our services ".

You can enter up to 254 characters of text in the **Text** field. More text can be added by inserting rows.

Step	Action
10.	Click the Document button. 
11.	Click on the Invoice link in the Document Code column. 
12.	Click the Save button. 

Changes can always be made at a later date using the **Find an Existing Value** page, inserting a row, changing the data, and saving.

Step	Action
13.	End of Procedure.

Customers

Request a New Customer or Update an Existing Customer

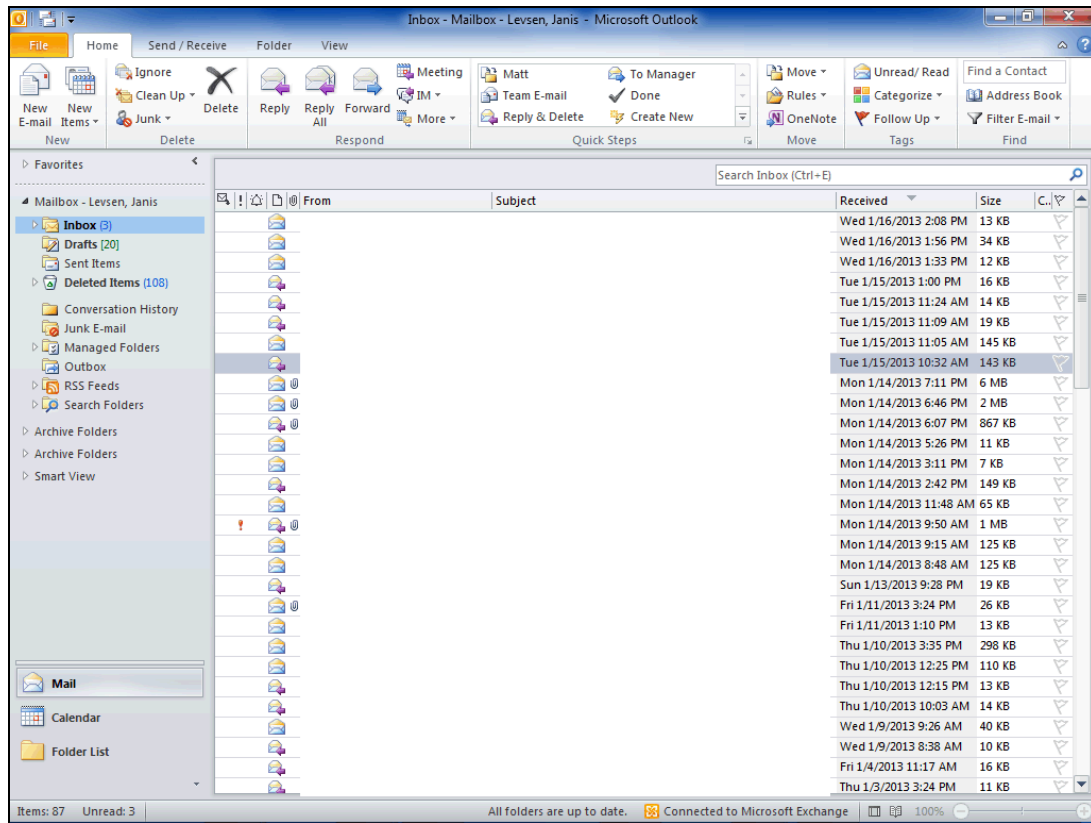

When a customer is not present in the system, you will need to request the customer be added before an invoice can be created. The Customer Request Form in Microsoft Outlook needs to be completed to make this request. The form may also be used to update customer information.

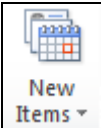

The accounting office will use the Customer Request Form to verify that a customer does not already exist in PeopleSoft and will then use the information provided to establish a new customer number. If additional information is required, you will be notified via e-mail. When the customer number has been established in PeopleSoft, the Customer Request Form will be returned via e-mail with the customer's number.

8899XXXXXX customers are not to be used except by the Office of Sponsored Programs.

Note: If a customer is tax exempt, the department should request a copy of the customer's tax exempt certificate and send it to the accounting office to keep on file. The customer's tax ID number should be obtained if possible.

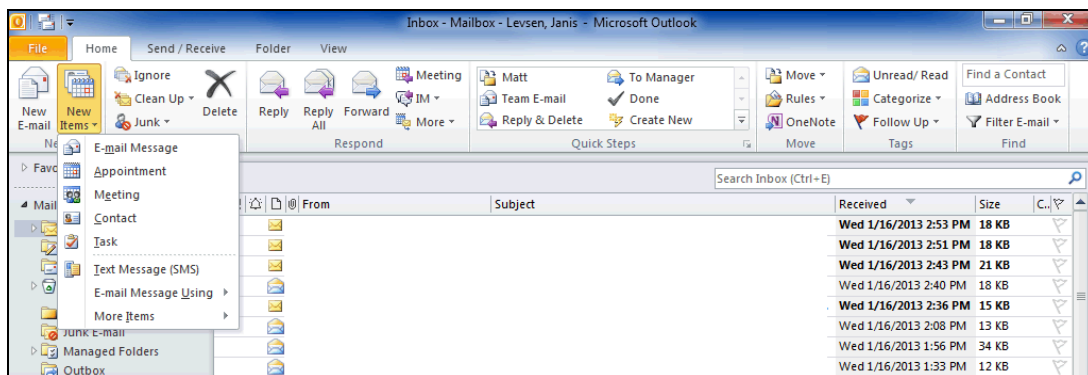

Procedure

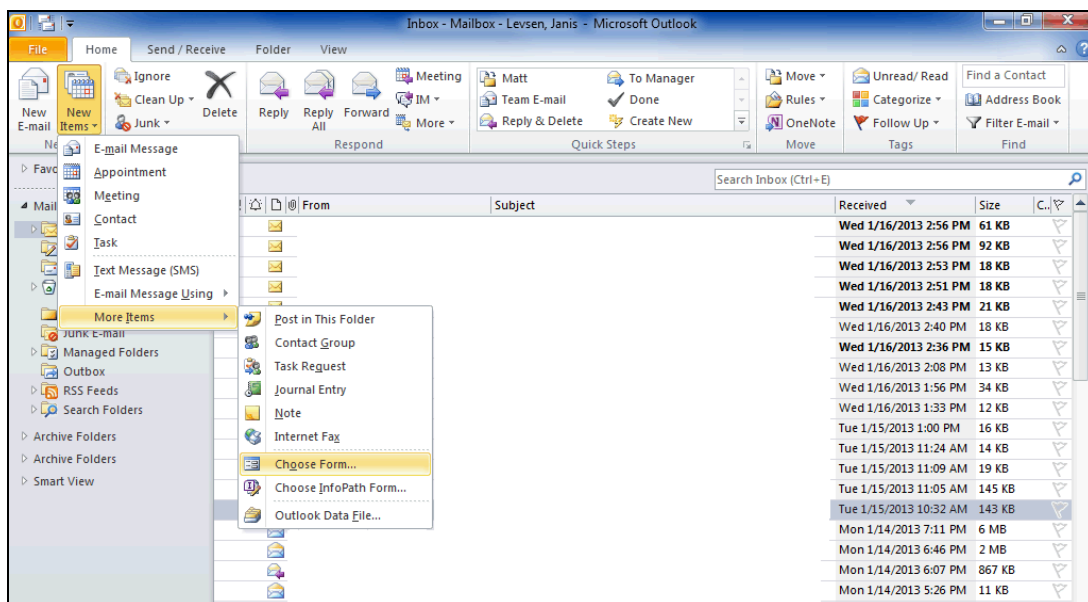

Step	Action
1.	<p>From Microsoft Outlook, you will need to create a message using the Customer Request Form.</p> <p>On the Home tab, click the New Items button.</p> 

Training Guide

Step	Action
7.	<p>The Customer Request Form will display.</p> <p>Complete the form and send the email to UMCACCTGACCTREC@missouri.edu.</p> <p>The Columbia Accounting Office creates the customer and will send you an email message providing the new customer number or informing you that the update has been made.</p>
8.	<p>You have successfully completed the procedure to request a new customer or update an existing customer.</p> <p>End of Procedure.</p>

Customer Naming Convention Rules for Name/Address Info

Departments need to be familiar with the naming convention rules in this section to find customers in the system.

The following contains standards for naming conventions used in the name and address fields necessary for the Customer conversion to PeopleSoft AR/BI module. The intent of these standards is to ensure that all converted customers and eventually new ones follow the same basic guidelines for naming conventions.

1. All CAPS will be used for names and addresses. PeopleSoft is case sensitive.
2. Searching on the customer's long name is case sensitive; use all CAPS.
3. All Attention To's for individual names should be set up in the customer Contact panel for the BILL TO Primary address. They will default when you create an invoice. It will print with the address on the invoice.
4. When entering an individual's name as a *customer*, follow the PeopleSoft standard of Last Name, First Name Middle Name or Initial (if middle name or initial is known). If only initials are provided for a first and middle name, they should be entered together, e.g.,
 - a. SMITH, LAURA SUE
 - b. SMITH, LAURA S
 - c. SMITH, L SUE
 - d. SMITH, LS
5. No titles on individual's names, e.g., Mr, Mrs, Ms, Miss, Dr, Prof.
6. No punctuation except when entering the comma between the Last and First name of an individual. Replace hyphens with spaces. All other punctuation should just be eliminated.
7. No spaces between initials, e.g., ABC DISTRIBUTING or PO BOX.
8. No acronyms.
9. Do not begin a customer's name with "a," "an," or "the."
10. Use the two-letter postal abbreviation for states listed in the Customer's Name.
11. If a customer's name will not fit within the 40-character PeopleSoft field, use the next line of the name field. (It is important if you have overflow to fill the first line up to 40 characters for search purposes in PS.)
12. If a company has a department or division, etc., that needs to be referenced, it should be made part of the name on the *first name line* up to 40 characters with overflow on the second name line. (It is important if you have overflow to fill the first line up to 40 characters for search purposes.)

13. Customer short name should be the first 10 characters (no spaces) of a customer's long name. If that short name has already been used, adjust the last characters.
14. Location Description on the Address Panel should be the City and the first line of the address (as much as possible).
15. If both a PO Box and a Street Address are provided, put the Street Address in the First Address line and the PO Box in the Second Address Line.
16. Use the following abbreviations for secondary address unit designators:
- | | | | |
|------------|------|-------------|------|
| Apartment: | APT | Unit: | UNIT |
| Building: | BLDG | Room: | RM |
| Floor: | FL | Department: | DEPT |
| Suite: | STE | | |
17. Abbreviate directionals with N, S, E, W, NE, NW, SE, or SW, unless the directional is the primary street name, e.g., NORTH AVE.
18. Enter Rural Route addresses with the letters RR and do not use the words Rural, Number, No., or #, e.g., RR 2 BOX 152.
19. Use the following abbreviations for suffixes:
- | | | | |
|------------|------|-------------|------|
| Avenue: | AVE | Highway: | HWY |
| Boulevard: | BLVD | Parkway(s): | PKWY |
| Circle: | CIR | Place: | PL |
| Court: | CT | Road: | RD |
| Drive: | DR | Street: | ST |
| Freeway: | FWY | Terrace: | TER |
20. City names should be spelled out in their entirety. However, if the name will not fit within the 30-character field provided by PeopleSoft, directionals within the name may be abbreviated.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

21. Some customers are external to the University, but have an address that can be delivered by campus mail or by courier. In order for Campus Mail Services to sort them they need to be *easily identifiable*. **All customers with these types of addresses at UMR, UMSL, and UMKC should say COURIER in the last address line of the Address with a *DESIGNATION for the Campus*. For example "COURIER KC."** (See the example in the screenshot below.) There is no need to put the city, state, or zip in the address. Since everything will print in Columbia, other campuses will have to say "COURIER." Columbia customers will say "CAMPUS MAIL."

The screenshot displays the 'Address' tab of a software interface. At the top, there are tabs for 'General 1', 'General 2', 'General 3', and 'Address'. Below these, a header bar shows 'SetID: UOFMC', 'Customer: NEXT', and 'MED STUDENTS ASSOC'. The main form area contains several fields and checkboxes. The 'Location' field is set to '1' and 'Descr' is 'KANSAS CITY 1025 CONNALLY'. There are checkboxes for 'Ship To Address', 'Correspondence Address', 'Bill To Address', and 'Sold To Address'. The 'Eff Date' is '05/22/2002', 'Status' is 'Active', and 'Language Code' is 'English'. The 'Country' is 'USA' with a dropdown arrow, and 'United States' is listed below it. The 'Tax Code' field is empty with a dropdown arrow. The 'Address 1' field contains '1025 CONNALLY'. The 'Address 2' field is empty. The 'Address 3' field is circled and contains 'COURIER KC'. To the right of the address fields is a section for 'Alternate Names' with two empty text boxes. At the bottom, there are fields for 'City', 'County', 'State', and 'Postal', along with an 'In City Limit' checkbox. A small icon of a printer is visible in the bottom right corner of the form area.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

22. The following are common words used in customer names. For consistency, the standard abbreviations for these words should be used even if space is not an issue. These are the only words to be abbreviated. All other words must be spelled out. *These abbreviations have been added for AR/BI.

Michigan	MI	Wisconsin	WI
Minnesota	MN	West Virginia	WV
Missouri	MO	Wyoming	WY
Mississippi	MS		

24. The zip code should be entered as zip+4 if the additional four digits are known. When using the additional four digits, a hyphen should be used, e.g., 12345-1234.

Entering Bills

When a service or product is provided by the University to another organization, a bill/invoice must be entered into the PeopleSoft Billing Module by the department. Once the entry is made, it will be run through a daily process of edit and budget checking. If the process is without error, an invoice will be generated and mailed out from a central location.

Understanding the Billing Page Series

Procedure

Step	Action
1.	<p>The Bill Entry module consists of many pages and options. A shortcut "Page Series" has been set up to access only the pages that our University will be using to create invoices.</p> <p>In the lower right of each page in the Bill Entry series, you will see a Page Series box that allows you to access pages in a specific order.</p> <p>Pages that you will be using to create an invoice are in a series that can be accessed by clicking "Next." To access a previous page, click "Prev."</p>

UMSYS FS 9.0 Accounts Receivable and Billing

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes links for Home, Worklist, Add to Favorites, and Sign out. A left-hand menu lists various system functions, with 'Maintain Bills' expanded to show options like 'Standard Billing', 'Recurring Bill Schedules', and 'Create Consolidated Header'. The main content area is titled 'Address Info' and contains the following fields:

- Unit:** UMSYS
- Bill To:** 110000
- Pretax Amt:** 0.00 USD
- Invoice:** NEXT
- Attention To:** (empty field)
- Name:** BARTON SCHOOL DIST
- Location:** 1
- # of Copies:** 1
- Invoice Media:** P
- Language Code:** ENG
- Country:** USA United States
- Address 1:** 200 PLANTERS DR
- Address 2:**
- Address 3:**
- City:** BARTON
- County:**
- Postal:** 65583-2266
- State:** MO Missouri

Below the fields, there are links for 'Go to: Header Info 2', 'Address', 'Copy Address', 'Notes', and 'Express Entry'. A 'Page Series' section includes 'Summary', 'Bill Search', and 'Line Search'. A 'Navigation' dropdown is set to 'Address Info', with 'Prev' and 'Next' buttons. At the bottom, there are buttons for 'Save', 'Notify', 'Refresh', 'Add', and 'Update/Display'.

Step	Action
3.	2. Address Info - Enables you to review mailing address information and change the location code, if necessary

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes links for Home, Worklist, Add to Favorites, and Sign out. A left-hand menu lists various system functions, with 'Billing' and 'Interface Transactions' expanded. The main content area is titled 'Header - Note' and shows the following details:

- Unit:** UMSYS
- Bill To:** 110000
- Pretax Amt:** 0.00 USD
- Invoice:** NEXT
- Customer:** BARTON SCHOOL DIST

Below these details is the 'Bill Header Notes' section, which includes a search bar and a list of notes. The first note is selected, showing the following information:

- Standard Note Flag:** ☒
- Internal Only Flag:** ☐
- Std Note:** I THANK YOU
- Note Type:** STANDARD
- Note Text:** Thank You for allowing us to be able to serve you. Please feel free to call anytime.

At the bottom of the interface, there are navigation links for 'Header - Info 1', 'Line - Info 1', and 'Header - Note'. There are also buttons for 'Save', 'Notify', 'Refresh', 'Add', and 'Update/Display'.

Step	Action
4.	3. Header - Note - Enables you to add internal notes or notes to be printed on the invoice that pertains to the entire bill

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The main window is titled 'Acctg - Rev Distribution'. The left sidebar contains a 'Menu' with various options, including 'Maintain Bills' and 'Generate Invoices'. The main content area shows the 'Header - Info 1' and 'Line - Info 1' tabs. The 'Header - Info 1' tab is active, displaying the following information:

- Unit: UMSYS
- Bill To: 110000
- Pretax Amt: 44.94 USD
- Invoice: NEXT
- BARTON SCHOOL DIST
- Max Rows: 25

The 'Line - Info 1' tab is also visible, showing the 'Bill Line' table with the following data:

Seq	Line	Identifier	Description	Net Extended
1		ARC10302	MRT 6-MANUAL INTERP-LEVEL 1&2	44.94

Below the 'Bill Line' table is the 'Bill Line Distribution - Revenue' table, which shows the distribution of revenue for the selected bill line. The table has columns for Code, Account, Fund, Dept, Program, Class, Project, Percentage, and Amount. The data is as follows:

Code	Account	Fund	Dept	Program	Class	Project	Percentage	Amount
CK06943000	430000	0410	C1820031	0	AC013	00	100.00	

The 'Percent' row shows 100.00, and the 'Amount' row shows 44.94. The 'Gross Extended' is 44.94. The interface also includes a 'Navigation' dropdown set to 'Acctg - Rev Distribution' and a 'Page Series' section with 'Prev' and 'Next' buttons.

Step	Action
7.	2. Acctg - Rev Distribution - Enables you to specify general ledger account distribution information for each bill line

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
3.	<p>The Header - Info 1 tab will display.</p> <p>Accept the default (current date) in the Invoice Date field.</p> <p>Enter or select the bill Type for your operation. For this training example, enter "COP".</p>

Bill **Type** is used to default several fields on the **Header - Info 1** tab. Unless your department does a lot of invoices, use the standard bill type for your campus: COLUM - COP, HELTH – HTH, HOSPT - HOS, KCITY - KCL, ROLLA - ROL, STLOU - STL, UMSYS - COP, UOEXT - COP. Work with your campus accounting office if you need a specific bill type.

4.	Enter or select the desired information for the Customer field. For this training example, enter " 110000 ".
----	--

If the customer has not been created, a Customer Request Form will need to be submitted and a customer number assigned before proceeding. (See the "Create a New Customer or Update an Existing Customer" topic for instructions.)

Do not use customers that start with 8899XXXXXX because they are used by the Office of Sponsored Programs only.

Step	Action
5.	<p>For larger operations, the Biller field will default in when you select your Type. Other operations must populate the Biller field by using the lookup feature and selecting the Billing Specialist.</p> <p>Note: The biller (Billing Specialist) will need to be set up by your accounting office prior to using it. The biller operation name and phone number print on the invoice.</p> <p>Click the Look up Biller button.</p> <p></p>
6.	<p>Click an entry in the Billing Specialist column. For this training example, click on CASRESCT.</p> <p><u>CASRESCT</u></p>

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
7.	<p>After the Biller is entered, several other fields are automatically populated and others are blank. Do not change or fill in these fields.</p> <p>Click the Next link in the Page Series box (lower right corner of page).</p> <p>Next</p>

The **Sales** field defaults as "N/A" (unless it is associated to the Biller), but it can be used for tracking purposes. Contact the accounting office about setting up a person's name in the system to select for this field. It will not print on the invoice.

Step	Action
8.	<p>The Address Info tab will display.</p> <p>Verify that the address is correct. If not, you can use the lookup feature for the Location field to select another location.</p> <p>If there is a contact name set up for this customer, you can enter it or select it using the lookup feature for the Attention To field.</p> <p>Click the Next link.</p> <p>Next</p>

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Location field: Most customers will have one customer number and only one location number (address). Larger customers that have a main address, as well as several other addresses will have one customer number but several other location numbers to select from. **Note:** The location/address shown as a default is Location 1 for each customer. This is the customer's primary location.

Attention To field: Contacts can be added for selection with the Customer Request Form in Outlook. Besides selecting or entering a contact name that has already been set up, you can enter a different name if desired. This will print on the invoice. **Note:** If data is entered in the Attention To field, it will override the second name line of the customer if there is one.

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes links for Home, Worklist, Add to Favorites, and Sign out. The left sidebar contains a Menu with various options like My Favorites, UM Applications, Set Up Financials/Supply Chain, Banking, Billing, Interface Transactions, Maintain Bills, Standard Billing, Recurring Bill Schedules, Create Consolidated Header, Attach and Detach Bills, Copy Single Bill, Adjust Entire Bill, Adjust Selected Bill Lines, Bill Summary, Correct Entry Type, Generate Invoices, Locate Bills, Review Billing Information, Review Processing Results, Customers, Accounts Receivable, Worklist, Tree Manager, Reporting Tools, PeopleTools, Change My Password, My Personalizations, My System Profile, and My Dictionary.

The main content area shows the Bill Header Notes section. It includes fields for Unit (UMSYS), Bill To (110000), Pretax Amt (0.00 USD), Invoice (NEXT), and Barton School Dist. There are checkboxes for Standard Note Flag and Internal Only Flag, and a Std Note field. A large text area is provided for Note Text. Navigation links include Header - Info 1, Line - Info 1, Header - Note, and Customer Notes. A Page Series section shows Header - Note with Prev and Next buttons. At the bottom, there are buttons for Save, Notify, Refresh, Add, and Update/Display.

Step	Action
9.	<p>The Header - Note tab will display.</p> <p>Header notes appear at the top of the invoice and should provide information that pertains to the entire bill.</p> <p>For this training example, click the Standard Note Flag option to add a standard note. (You can also add manual and internal notes.)</p> <p><input type="checkbox"/> Standard Note Flag</p>

Header notes typically include thank you for purchase notes, announcements of sales, return policies, holiday greetings, and other such general information. (The other place you may make notes is on the bill lines. Line notes apply to only one item.)

When entering notes on the **Header - Notes** tab, it is important to remember that these notes will appear only if selected on an invoice. If you need to set up a standard note to select when you do an invoice, please refer to the "Set Up Standard Notes" topic in the System Set Up lesson.

The three types of header notes are the following:

- 1) **Standard:** These notes are already set up in the system for you to select. Click the **Standard Note Flag** check box to select it and select the standard note.
- 2) **Manual:** These are notes that are entered manually. Type the note in the **Note Text** field.
- 3) **Internal:** These notes **will not** print on the invoice. Click the **Internal Only Flag** check box to select it and use the lookup feature to select a note or type a note in the **Note Text** field.

Step	Action
10.	<p>Click the Look up Std Note button.</p> <p></p>
11.	<p>Search for the desired note. For this training example, click on the THANK YOU entry in the Standard Note Code column.</p> <p><u>THANK YOU</u></p>
12.	<p>The note now appears in the Note Text field.</p> <p>Click the Next link.</p> <p><u>Next</u></p>

[Header - Info 1](#) | [Line - Info 1](#)

Step	Action
15.	<p>The Line - Info 1 tab will display.</p> <p>There are two ways to enter items for billing: manually enter items or define items ahead of time and select them from a stored table of items. These predefined items are called charge codes.</p> <p>For this training example, you will select a charge code (Charge ID). Click the Look up Table button.</p> 

Select charge code: Use this method if you will be billing repetitively for goods and services, and you have created charge codes for your items. (See the "Create Charge Codes" topic in the System Set Up lesson for instructions.)

Enter manually: To manually enter items for billing, enter data for the **Description**, **Qty**, **UOM**, and **Unit Price** fields.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
16.	Click the PS/Billing Charge Id link. PS/Billing Charge Id
17.	As an option, you can enter or select the Charge ID for your operation for the Identifier field. Note: The identifier prints on the invoice. For this training example, click the Look up Identifier button. 
18.	Search by entering the first two or three characters of your Charge ID in the Identifier field. For this training example, enter " ARC ".
19.	Click the Look Up button. 
20.	Click the desired entry in the Identifier column. For this training example, click on ARC10302 . ARC10302
21.	The Description , UOM , and Unit Price default from the Identifier field. (The description prints on the invoice and is a required field.) Note: All defaults can be overridden by typing over them. Enter the desired information into the Qty field. For this training example, enter " 1 ".
22.	If tax is to be charged, use the Tax Code lookup feature to select the tax code. Tax will print on the invoice but not display on the Line - Info 1 tab. If an item, service, or customer is tax exempt, do nothing (i.e., do not fill in any of the fields).
23.	Click the Next link. Next
24.	The Acctg - Rev Distribution tab will display. The required fields may already be populated if the revenue distribution code is tied to the Charge ID for the item. If the fields are not already populated, use the lookup feature for the Code field to search for the revenue distribution code or type in the ChartField strings.
25.	To split revenue in multiple ChartFields, use the plus sign button to the left of the ChartField string.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The 'Line - Note' tab is active, showing a form for entering a note for a specific line item. The form includes fields for 'Unit' (UMSYS), 'Bill To' (110000), 'Pretax Amt' (44.94 USD), 'Invoice' (NEXT), and 'Barton School Dist'. A table lists the bill line with sequence 1, line identifier ARC10302, and description MRT 6-MANUAL INTERP-LEVEL 1 & 2, with a net extended amount of 44.94. Below the table, there are checkboxes for 'Standard Note Flag' and 'Internal Only Flag', and a 'Note Text' field. The interface also includes a menu on the left, a search bar, and various navigation and action buttons at the bottom.

Step	Action
27.	<p>The Line - Note tab will display.</p> <p>This tab allows you to enter a standard or manual note that will show on the invoice underneath a billing item or an internal note regarding the line that will not print on the invoice. (The instructions for entering line notes are the same as for entering header notes.)</p> <p>Click the Next link.</p> <p>Next</p>

The three types of line notes are the following:

- 1) **Standard:** These notes are already set up in the system for you to select. Click the **Standard Note Flag** check box to select it and select the standard note.
- 2) **Manual:** These are notes that are entered manually. Type the note in the **Note Text** field.
- 3) **Internal:** These notes **will not** print on the invoice. Click the **Internal Only Flag** check box to select it and use the lookup feature to select a note or type a note in the **Note Text** field.

Note: Make sure you are on the line that you want to make a note for!
Up to three notes can be created for each line on the invoice by inserting lines on the inside scroll bar.

If there is a scroll bar on the right side of the page, you may need to scroll down to see other lines of the invoice (if there are multiple invoice lines).

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes links for Home, Worklist, Add to Favorites, and Sign out. The left sidebar contains a menu with options like My Favorites, UM Applications, Set Up Financials/Supply Chain, Banking, Billing, Interface Transactions, and Maintain Bills. The main content area is titled 'Header - Info 1' and shows various fields for invoice information. The 'Unit' is UMSYS and the 'Invoice' is NEXT. The 'Pretax Amt' is 44.94 USD. The 'Status' is NEW and the 'Invoice Date' is 12/14/2007. The 'Type' is COP and the 'Source' is empty. The 'Frequency' is Once. The 'Customer' is 110000 and the 'Address' is BARTON SCHOOL DIST. The 'Cycle ID' is DAILY and the 'Invoice Form' is STANDARD. The 'Pay Terms' are N30 and the 'Pay Method' is CHK. The 'Accounting' is empty and the 'Account' is 132200. The 'Remit To' is 10601 and the 'Bank Account' is CAL. The 'Sales' is N/A and the 'Bill Inquiry Phone' is empty. The 'Credit' is N/A and the 'Collect' is CASRESCT. The 'Biller' is CASRES and the 'Billing Authority' is empty. The interface also includes buttons for Save, Notify, Refresh, Add, and Update/Display, as well as links for Summary, Bill Search, Line Search, and Navigation.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
28.	<p>All of the pages in the series are now complete and you are returned to the first page in the series.</p> <p>Click the Look up Status button to search for the ready to invoice status.</p> 

Any invoices still in New status will automatically change to ready (RDY) and process each night. If there are no edits or budget check errors, the invoice will be processed.

Step	Action
29.	<p>Click the Ready to Invoice link.</p> <p>Note: Doing this will initiate some edit checks, and it will let you know what needs to be fixed.</p> 
30.	<p>Click the Save button to save the invoice.</p> 
31.	<p>An invoice number has been assigned automatically. You may want to write down the invoice number to refer to it later.</p>
32.	<p>You have successfully completed the procedure for creating an invoice.</p> <p>End of Procedure.</p>

Set Up a Recurring Bill Template

Recurring bills are bills that can be reproduced on a schedule and are identical. By using recurring bills, you can avoid retyping the same information into the system month after month or week after week for recurring billing activity such as rental invoices or standing purchase orders. Currently, the billing cycle template allows you to create recurring bills on a monthly, quarterly, semiannual, or annual cycle.

Procedure

Navigation: Billing > Maintain Bills > Standard Billing

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes the Oracle logo, a search bar, and links for Home, Worklist, Add to Favorites, and Sign out. The left sidebar contains a menu with various options, including My Favorites, UM Applications, Set Up Financials/Supply Chain, Banking, Billing, Interface Transactions, Maintain Bills, Standard Billing, Recurring Bill Schedules, Create Consolidated Header, Attach and Detach Bills, Copy Single Bill, Adjust Entire Bill, Adjust Selected Bill Lines, Bill Summary, Correct Entry Type, Generate Invoices, Locate Bills, Review Billing Information, Review Processing Results, Customers, Accounts Receivable, Worklist, Tree Manager, Reporting Tools, PeopleTools, Change My Password, My Personalizations, My System Profile, and My Dictionary. The main content area is titled 'Bill Entry' and contains a search bar with the text 'Enter any information you have and click Search. Leave fields blank for a list of all values.' Below the search bar are two tabs: 'Find an Existing Value' and 'Add a New Value'. The 'Find an Existing Value' tab is active, showing a form with the following fields: Business Unit (dropdown menu), Invoice (dropdown menu), Bill Status (dropdown menu), Customer (dropdown menu), Contract (dropdown menu), Bills in Business Unit (dropdown menu), and Template Invoice Flag (dropdown menu). The 'Business Unit' field is set to 'UMSYS'. The 'Invoice' field is set to 'begins with'. The 'Bill Status' field is set to '='. The 'Customer' field is set to 'begins with'. The 'Contract' field is set to 'begins with'. The 'Bills in Business Unit' field is set to '='. The 'Template Invoice Flag' field is set to '='. There is a 'Case Sensitive' checkbox. Below the form are buttons for 'Search', 'Clear', 'Basic Search', and 'Save Search Criteria'. At the bottom of the form, there are links for 'Find an Existing Value' and 'Add a New Value'.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
1.	<p>Setting up a recurring bill template involves the same steps as creating an invoice along with some additional steps.</p> <p>Click the Add a New Value tab.</p> 

For more detailed steps and information about creating an invoice, see the "Create an Invoice" topic.

Step	Action
2.	<p>The Business Unit will default based on the user's sign on. It must be the same as the ChartField string that will be receiving revenue. For this exercise, retain the default.</p> <p>Click the Add button.</p> 

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
3.	Enter or select the bill Type for your operation. For this training example, enter "COP" .
4.	Enter or select the desired information for the Customer field. For this training example, enter "110000" .
5.	Enter or select the desired information for the Biller field. For this training example, enter "CASRESCT" .
6.	The Cycle ID and then the Frequency (in that order) must be selected to set up a recurring invoice template. Click the Look up Cycle ID button. 
7.	For this training example, click on QRTLY link in the Billing Cycle Identifier (Cycle ID) column. 

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
8.	Click the Recurring list item in the Frequency drop-down list. Note: The frequency must be set for Recurring. For other cycles, contact your accounting office. Recurring
9.	Remember that this is a template and the information you enter will be on each of the bills. Click the Next link to continue with the recurring invoice template. From this point forward, the steps are the same as the Create an Invoice procedure. Next

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

The screenshot shows the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes links for Home, Worklist, Add to Favorites, and Sign out. A left-hand menu lists various functions under categories like My Favorites, UM Applications, Set Up Financials/Supply Chain, Banking, Billing, Interface Transactions, and Maintain Bills. The main content area is titled 'Recurring Bill Schedule' and contains the following fields and options:

- Unit:** UMSYS **Template Invoice:** INV0048934
- Start Date:** [Text Field] ☐ **Pre-Assign Invoice Numbers**
- End Date:** [Text Field] ☐ **Use Header Dates For Lines**

Below these fields is a 'Recurring Schedule' table with columns: Generate Date, Invoice Date, Invoice, Inv Generated?, and Date. The table shows one entry with 'NEXT' in the Invoice column and 'N' in the Inv Generated? column. Below the table are fields for 'Bill Header From Date' and 'To Date'. At the bottom of the main area are buttons for 'Return to Bill Entry', 'Save', 'Return to Search', and 'Notify'.

Step	Action
29.	<p>The Recurring Bill Schedule page will display. Enter the start date and end date to establish the period for the recurring billing.</p> <p>Enter or select the desired information for the Start Date field. For this training example, enter "01/01/2008"</p>
30.	<p>Enter or select the desired information for the End Date field. For this training example, enter "12/31/2008".</p>
31.	<p>Click to select the Pre-Assign Invoice Numbers option.</p> <p>Note: The template and the recurring invoices generated by the template will have different numbers.</p> <div style="border: 1px solid black; padding: 2px; display: inline-block;"><input type="checkbox"/> Pre-Assign Invoice Numbers</div>

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

32.	Click the Generate Rev. Rec. Schedule button to generate the billing cycle. 
33.	View and update the appropriate fields and make any necessary changes. PeopleSoft populates all the fields based on current information and extends the recurring billing for the period that you select. When all information is correct, click the Save button to replace "NEXT" with a pre-assigned invoice number. 

 If you generate a schedule and if you change the end date to be further in the future than originally defined, the Extend button appears on the page. This button allows you to generate the additional recurring bill dates and pre-assigned invoice numbers.

Selecting Generate does not create the recurring bills. Instead, you generate a schedule of dates and pre-assigned invoice numbers, if indicated, for the Generate Recurring Bills process. **The recurring bills are then created during the nightly processing based on the Generate Date on the Recurring Bills Schedule page.** When the **Inv Generated?** status on this page is Y (Yes), this means that the bills have been created and are waiting with a status of RDY (Ready) to be finalized and printed.

Step	Action
34.	Click the Return to Bill Entry link. Return to Bill Entry

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Set Up Recurring Bill after Entering Invoice but Prior to Post

If you do not establish the recurring bill during invoice input and the overnight updating process has **not** run, you can still select your bill and set it up as a recurring bill template. **Remember:** Once the overnight process has run, you cannot use a billing to create a recurring invoice.

Procedure

Navigation: Billing > Maintain Bills > Standard Billing

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes the Oracle logo, a search bar, and links for Home, Worklist, Add to Favorites, and Sign out. The left sidebar contains a menu with various options, including My Favorites, UM Applications, Set Up Financials/Supply Chain, Banking, Billing, Interface Transactions, Maintain Bills, Standard Billing, Recurring Bill Schedules, Create Consolidated Header, Attach and Detach Bills, Copy Single Bill, Adjust Entire Bill, Adjust Selected Bill Lines, Bill Summary, Correct Entry Type, Generate Invoices, Locate Bills, Review Billing Information, Review Processing Results, Customers, Accounts Receivable, Worklist, Tree Manager, Reporting Tools, PeopleTools, Change My Password, My Personalizations, My System Profile, and My Dictionary. The main content area is titled "Bill Entry" and contains a search form. The search form includes a "Find an Existing Value" button and an "Add a New Value" button. The search criteria include Business Unit (UMSYS), Invoice (begins with), Bill Status (begins with), Customer (begins with), Contract (begins with), Bills in Business Unit (begins with), and Template Invoice Flag (begins with). There is also a "Case Sensitive" checkbox. The search results are displayed below the search form.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
1.	Instead of selecting the Add a New Value page, use the Find an Existing Value page to look for the bill that you want to use to create a recurring invoice. For this training example, search based on the invoice number. Enter " INV004 " into the Invoice field..
2.	Click the Search button. 
3.	For this training example, click on INV0048920 in the Invoice column. 

Step	Action
4.	Follow the steps for creating a recurring bill template. Refer to the "Set Up a Recurring Bill Template" topic for instructions.
5.	End of Procedure.

Manage a Recurring Bill Template

A recurring bill template can be accessed by the normal billing process. This access allows you to adjust the Recurring Bill Schedule. The recurring schedule controls the period of time during which the recurring bill will be issued. If the time frame changes, the adjustment is made by accessing the recurring bill template, changing the date range on the Recurring Bill Schedule, and regenerating the recurring bill cycle.

Procedure

Navigation: Billing > Maintain Bills > Standard Billing

OR

Navigation: Billing > Maintain Bills > Recurring Bill Schedules

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes links for Home, Worklist, Add to Favorites, and Sign out. The left sidebar contains a menu with various options, including 'Billing' and 'Maintain Bills'. The main content area is titled 'Bill Entry' and contains a search form. The search form includes fields for Business Unit (set to UMSYS), Invoice (begins with), Bill Status, Customer (begins with), Contract (begins with), Bills in Business Unit, and Template Invoice Flag. There are also buttons for Search, Clear, Basic Search, and Save Search Criteria. The bottom of the page shows the University of Missouri logo and page number 60.

Step	Action
1.	Use the Find an Existing Value tab to search for your billing template. Enter or select the desired information for the Customer field. For this training example, enter " 110000 ".

Note: If you do not know your customer number, selecting **Recurring Bill** from the **Template Invoice Flag** list and clicking the **Search** button will list all templates currently on file.

Step	Action
2.	Click the Recurring Bill list item in the Template Invoice Flag list. 
3.	Click the Search button and then double click on the template that you would like to adjust.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
5.	Change the Start Date and End Date fields as needed. For this training example, change the start date to " 06/01/2008 ". Note: If a recurring invoice has been generated, PeopleSoft will only allow you to change the End Date. If an invoice has not been generated, you may change both dates.
6.	Enter the desired information into the End Date field. For this training example, enter " 06/30/2009 ".
7.	Click the Re-generate Recurring Bill Schedule button. 
8.	PeopleSoft issues a warning that all unbilled lines will be adjusted. Click the OK button. 
9.	The system defaults back to "NEXT" for invoice numbers. Click the Save button to reassign the recurring invoice numbers. 

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
10.	Click the Return to Bill Entry link to go back to the original invoice. Return to Bill Entry
11.	Ensure the Status is RDY (Ready to Invoice).
12.	You have successfully completed the procedure to manage a recurring bill template. End of Procedure.

Hold or Cancel an Invoice

After you enter and save an invoice, the status of the invoice will remain RDY. Each evening all invoices in New or RDY status will automatically process. If you do not want an invoice to process, change the status to HOLD (HLD) and save. When you decide you are ready for it to process, change the invoice date and the status to Ready and re-save.

7.	You have successfully completed the procedure for changing the status of a NEW or RDY invoice to HLD (Hold) or CAN (cancel). End of Procedure.

Bill Adjustments

Bills can be adjusted the day they are created by using the update/display feature on the Billing page. This lesson covers the methods for adjusting invoices that have already been processed.

Bills can be adjusted and credited by using PeopleSoft pages to save both time and effort. To adjust or credit an invoice, use either the [Adjust Bill](#) or the [Adjust Selected Bill Lines](#) page. These methods also leave a trail in PeopleSoft so that you can see any adjustments or credits made to an invoice. All of these generate invoices that are sent to the customer. **Adjustments that are not sent to the customer can be done by the accounting offices only.**

Note: Please contact Accounts Receivable in your accounting office if the types of credit adjustments discussed in this lesson do not meet your needs.

Adjust Entire Bill - Credit an Entire Bill (No Rebilling)

In the Adjust Entire Bill function, the Credit Entire Bill option allows you to create a credit of the entire invoice.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
1.	Enter the invoice number that you want to credit into the Invoice field. For this training example, enter " INV0048456 ".
2.	Click the Search button. 

The screenshot shows the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The left sidebar contains a menu with options like 'My Favorites', 'UM Applications', 'Set Up Financials/Supply Chain', 'Banking', 'Billing', 'Interface Transactions', 'Maintain Bills', 'Generate Invoices', 'Locate Bills', 'Review Billing Information', 'Review Processing Results', 'Customers', 'Accounts Receivable', 'Worklist', and 'Tree Manager'. The main area displays the 'Adjust Entire Bill' screen. It shows the following information:

- Unit:** UMSYS
- Bill To:** 110000
- Invoice Amt:** 300.00 USD
- Invoice:** INV0048456
- Header:** BARTON SCHOOL DIST

Below this information, there are two sections:

- Select Bill Adjustment Action:**
 - ☒ No Bill Action
 - ☐ Credit Entire Bill
 - ☐ Credit & Rebill
- Adjustment Results:**
 - *Credit Bill: NEXT
 - Rebill Bill: NEXT
 - Header Info 1

At the bottom, there are buttons for 'Save', 'Return to Search', 'Notify', and 'Refresh'.

Step	Action
3.	Check the information to confirm that this is the correct invoice. Click the Credit Entire Bill option. 
4.	Click the Save button. 
5.	An invoice number appears in the Credit Bill field; this is a credit of the original bill. The original invoice number will print on this credit, so the customer will know what the credit is for.
6.	If you want to put an additional note on the credit invoice, click the Header Info 1 link. Otherwise, the transaction is complete.
7.	You have successfully completed the procedure for crediting an entire bill (no rebill). End of Procedure.

Adjust Entire Bill - Credit an Entire Bill and Rebill

In the Adjust Entire Bill function, the Credit and Rebill option allows you to create a credit of the original invoice and a rebill invoice with one action. For example, you could use this option when the bill's quantity or customer is incorrect. Once the new bill has been created, you can make any corrections required to bill correctly. The credit bill is created with a status of RDY (Ready) and the rebill is created with a status of INV (Invoiced).

Procedure

Navigation: Billing > Maintain Bills > Adjust Entire Bill

The screenshot shows the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The left-hand menu is expanded to 'Billing' > 'Interface Transactions' > 'Maintain Bills' > 'Adjust Entire Bill'. The main content area is titled 'Adjust Entire Bill' and contains a search form. The form has a 'Find an Existing Value' section with a search bar. Below this, there are fields for 'Business Unit' (set to UMSYS), 'Invoice' (begins with), 'Customer' (begins with), and 'Contract' (begins with). There is also a 'Case Sensitive' checkbox. At the bottom of the form are buttons for 'Search', 'Clear', 'Basic Search', and 'Save Search Criteria'.

Step	Action
1.	Enter the invoice number that you would like to credit and rebill into the Invoice field. For this training example, enter " INV0048445 ".
2.	Click the Search button. 

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

The screenshot shows the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes links for Home, Worklist, Add to Favorites, and Sign out. A left-hand menu lists various functions, with 'Adjust Entire Bill' highlighted under the 'Interface Transactions' section. The main content area displays the 'Adjust Entire Bill' screen with the following information:

- Unit:** UMSYS
- Bill To:** 110000
- Invoice Amt:** 675.00 USD
- Invoice:** INV0048445
- BARTON SCHOOL DIST**

Below this information are two sections:

- Select Bill Adjustment Action:** Contains three radio buttons: ☒ No Bill Action, ☐ Credit Entire Bill, and ☐ Credit & Rebill.
- Adjustment Results:** Contains two text input fields: 'Credit Bill:' with the value 'NEXT' and 'Rebill Bill:' with the value 'NEXT'. To the right of these fields is a link labeled 'Header Info 1'.

At the bottom of the screen are four buttons: Save, Return to Search, Notify, and Refresh.

Step	Action
3.	Check the information to confirm that this is the correct invoice. Click the Credit & Rebill option. <input type="radio"/> Credit & Rebill
4.	Click the Save button. <input type="button" value="Save"/>
5.	Two new invoice numbers have been created. The invoice number in the Credit Bill field is the credit invoice and it will reference the number of the original invoice for the customer. The invoice number in the Rebill Bill field is an exact duplicate of the original invoice, so it will need to be corrected.
6.	Click the Header Info 1 link to the right of the Rebill Bill field to make corrections to the rebill invoice. Header Info 1
7.	A new window with the rebill will display. The rebill, which is a copy of the original bill, needs to be updated so that the new bill will be correct. You will need to navigate to the page(s) that need to be corrected, make corrections, and click on the Save button. (Both the credit and the rebill will process nightly with new invoice numbers .) When finished, you click on the X in the upper right-hand corner of the window to close it.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
8.	You have successfully completed the procedure for crediting an entire bill and rebilling. End of Procedure.

Invoice Printing

Print a Proforma Invoice

A proforma is not a formal invoice but is an "advance" of the actual invoice. The proforma says clearly, "Please do not pay from this Proforma. This is not an official invoice. An official invoice will be mailed within 24 hours." Proformas can be used to mail with additional documentation required for the billing or for viewing and editing an invoice you created before it has been processed and posted. The proforma invoice will not have the payment coupon on it.

Since you are producing a sample invoice, you can generate a proforma anytime after you save an invoice. Printing proformas also enables you to view the invoice and correct errors before bills go through the overnight process. Proformas only print the day you create the invoice and before the overnight processing. **Remember: Once billings go through the updating process, you cannot make changes to them, so corrections must be done the same day.** After that you would have to process an adjustment invoice.

Procedure

For invoice with taxes, begin by navigating to:

Billing > Maintain Bills > Standard Billing

For invoice without taxes, begin by navigating to:

Billing > Generate Invoices > Non-Consolidated > Print Pro Forma
(Starts at step 6 in this procedure.)

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

The screenshot shows the Oracle Pro Forma page. On the left is a menu with options like 'My Favorites', 'UM Applications', 'Set Up Financials/Supply Chain', 'Banking', 'Billing', 'Interface Transactions', 'Maintain Bills', 'Generate Invoices', 'Non-Consolidated', 'Print Pro Forma', 'Consolidated', 'Locate Bills', 'Review Billing Information', 'Review Processing Results', 'Customers', 'Accounts Receivable', 'Worklist', 'Tree Manager', 'Reporting Tools', 'PeopleTools', 'Change My Password', 'My Personalizations', 'My System Profile', and 'My Dictionary'. The main area has a 'Pro Forma' section with a search bar and a 'Run Control ID' field. The 'Run Control ID' field has a dropdown menu set to 'begins with' and a text input field. Below the field is a 'Case Sensitive' checkbox. There are buttons for 'Search', 'Clear', 'Basic Search', and 'Save Search Criteria'. At the bottom, there are links for 'Find an Existing Value' and 'Add a New Value'.

Step	Action
10.	<p>The Pro Forma page will display.</p> <p>If you are generating a proforma for the first time, you will need to create a run control. Click the Add a New Value tab.</p> <p>Add a New Value</p>
11.	<p>Enter the desired information into the Run Control ID field. For this training example, enter "PROFORMA".</p>

The Run Control ID is an operator-specific control that will trigger the invoice printing process. The maximum number of characters for a Run Control ID is 8. After adding a Run Control ID, you can search for it and use it the next time you want to print a proforma.

Step	Action
12.	<p>Click the Add button.</p> <p>Add</p>

[OK](#) [Cancel](#)

Step	Action
23.	Click the OK button to start the report process. OK
24.	A window opens and displays "Queued," "Processing," and then "Success." Then the proforma displays for viewing or printing.

If you use software that blocks pop-up advertisements, you will have to disable it to view and print your invoices. Pop-ups should not be blocked for any PeopleSoft URLs.

Step	Action
25.	You have successfully completed the procedure for printing a proforma invoice. End of Procedure.

Reprint Invoices Using PS Search Options

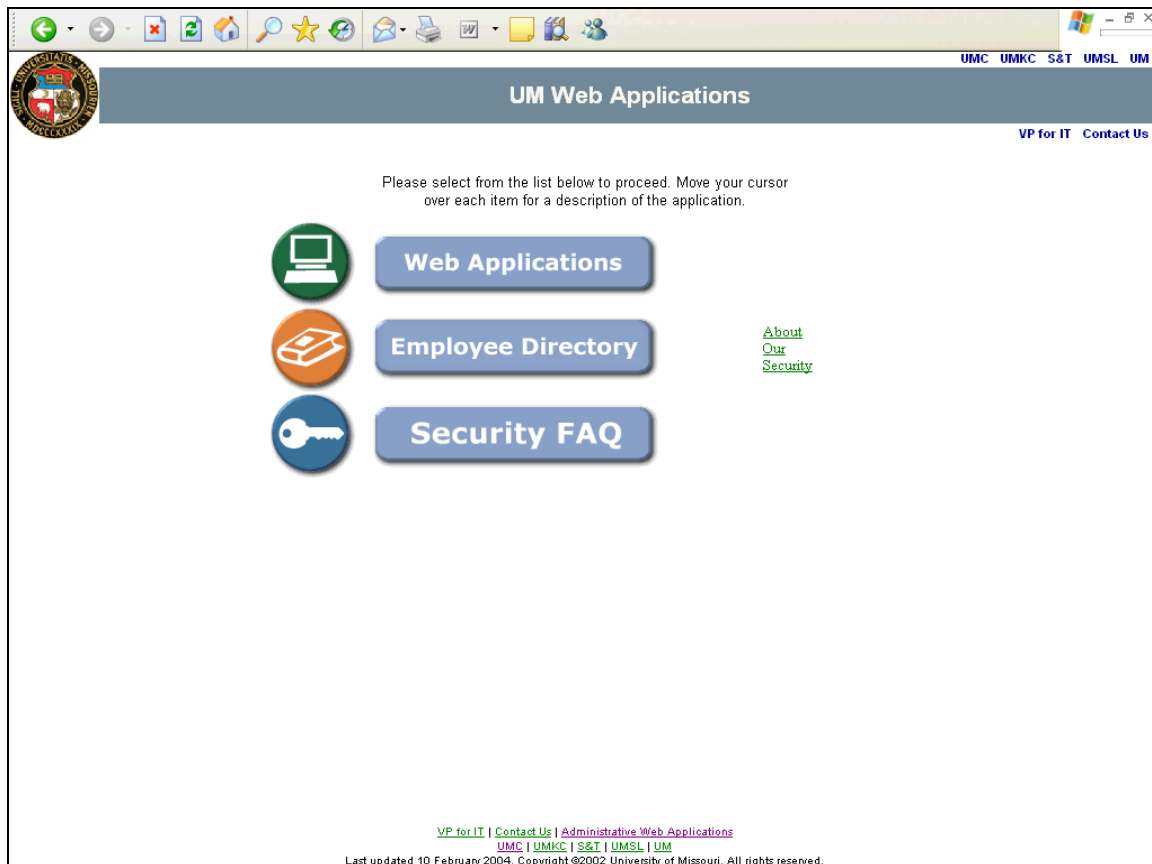

The easiest way to reprint an invoice is with the PS Search Options application. This application can be accessed using Internet Explorer on the Administrative Web Applications site (formerly MIS Web Applications) at <https://webapps.umsystem.edu/>. Invoices can be printed here only after processing, so they can be printed the day after they are created.

Link for Administrative Web Applications site (<https://webapps.umsystem.edu/>)

Procedure

Navigation: Using Internet Explorer, go to <https://webapps.umsystem.edu/>.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
1.	Click the Web Applications button and then log in using your User ID and password. 
2.	A list of links for various Web applications will display. Click the PS Search Options link. Note: The links available on this page will vary depending on your security access. 
3.	Enter the invoice number that you want to print into the Look for field. For this training example, enter " INV0012613 ". Note: You must enter all 10 characters of the invoice number.
4.	Click the AR/BI Invoice Number list item in the in drop-down list. 

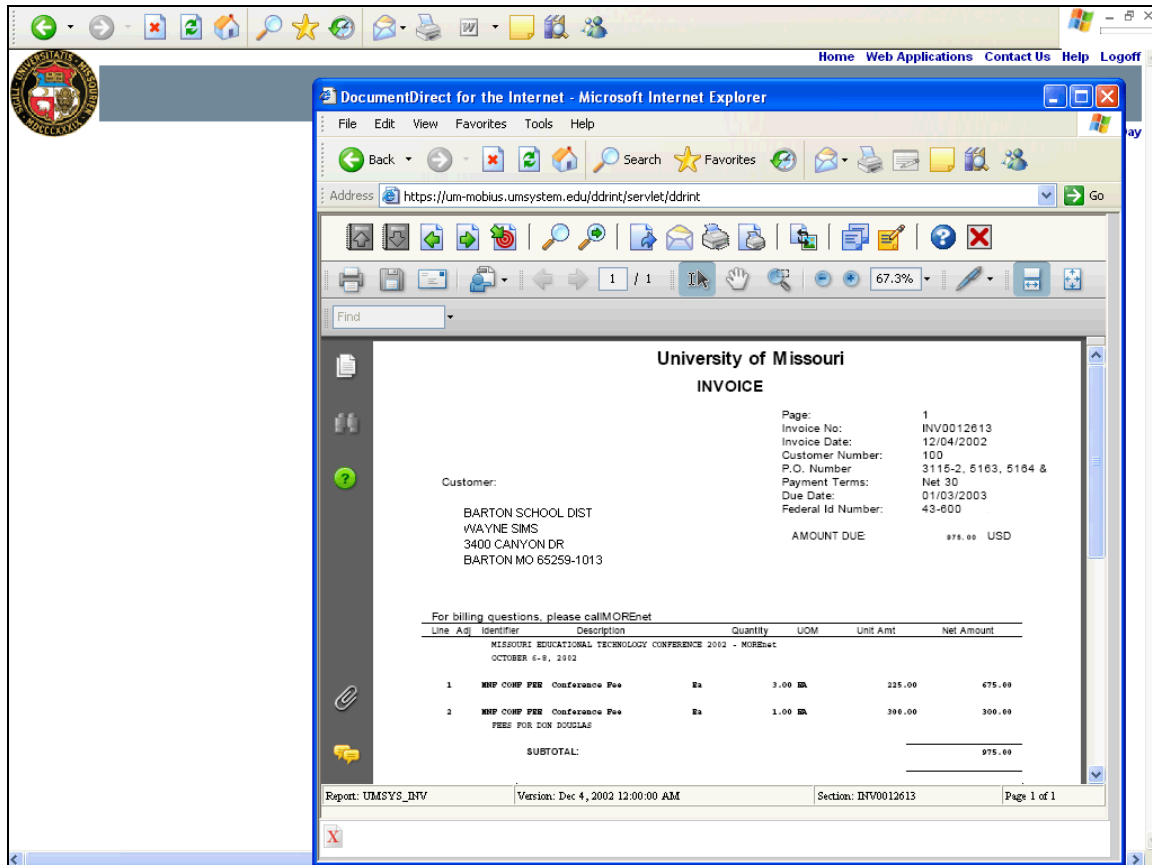

If you do not know the invoice number, you can leave the **Look for** field blank, choose **AR/BI Invoice Number** for the **in** field, and click submit. An **AR/BI Invoice Search** page will display that provides alternative search criteria. See the "Print an Invoice When You Do Not Know the Invoice Number" topic for instructions.

Step	Action
5.	Click the Submit button. 

Training Guide

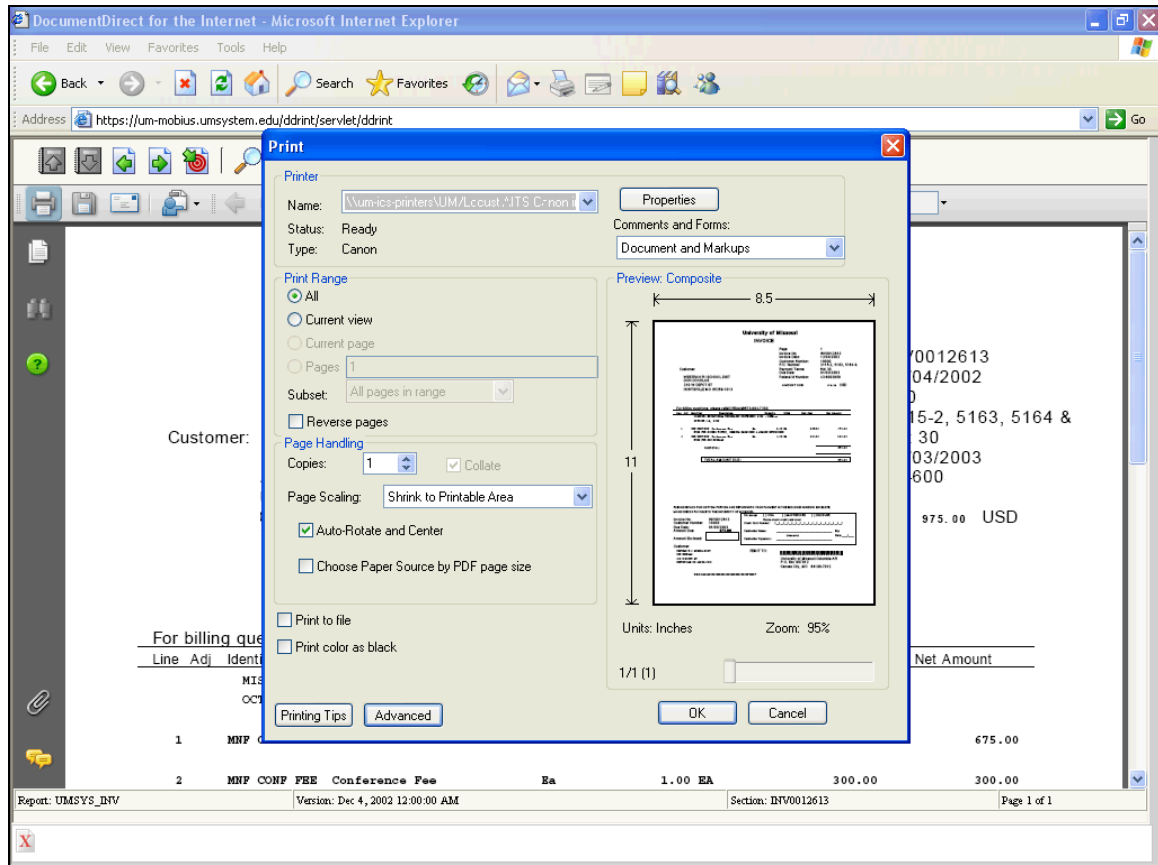

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
6.	<p>The invoice will display in a new browser window.</p> <p>Click the Maximize/Restore button in the upper right of the browser window to maximize the window containing the invoice.</p> 
7.	<p>In the second row of icons at the top of the page, click the printer icon at the left (next to disk icon).</p> 

Training Guide

Step	Action
8.	<p>The Print dialog box for your printer will display.</p> <p>Ensure the settings are correct and click the OK button to print the invoice.</p> <p>OK</p>
9.	<p>You have successfully completed the procedure for reprinting an invoice using PS Search Options.</p> <p>End of Procedure.</p>

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

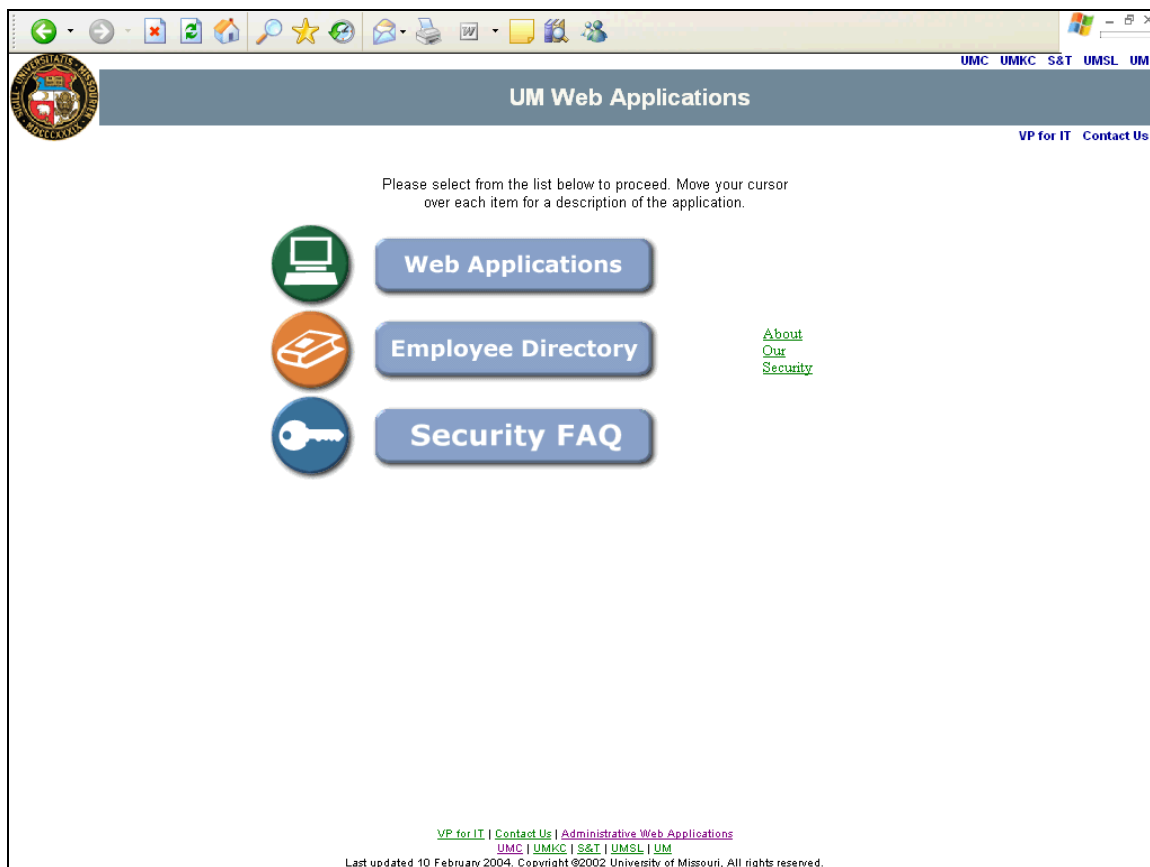

Print an Invoice When You Do Not Know the Invoice Number

When you do not know the invoice number of the invoice that you want to reprint, PS Search Options on the Administrative Web Applications site (<https://webapps.umsystem.edu/>) provides an alternative search method to locate the invoice.

Procedure

Navigation: Using Internet Explorer, go to <https://webapps.umsystem.edu/>.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
1.	Click the Web Applications button and then log in using your User ID and password. 
2.	A list of links for various Web applications will display. Click the PS Search Options link. 
3.	Click the AR/BI Invoice Number list item in the in drop-down list. 
4.	Click the Submit button. 
5.	Select the correct Business Unit . For this training example, click the UMSYS list item. 
6.	Select the month of the invoice date for the Month field. For this training example, click the December list item. 
7.	Select the year of the invoice date for the Year field. For this training example, click the 2007 list item. 
8.	Click the go button to submit the search criteria. 
9.	A list of invoices matching your search criteria will display. Find the invoice you want to print and click the invoice link. For this training example, click the INV0124610 link.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Copy a Single Bill

You can select a previously invoiced bill to be copied. This can save data entry time if you have a bill that is an exact duplicate of a bill or if you are billing for items invoiced at a prior date and you need to make a few minor changes. You can copy any bill, regardless of status. The only information that does not copy is the bill status, invoice date, and invoice number.

Procedure

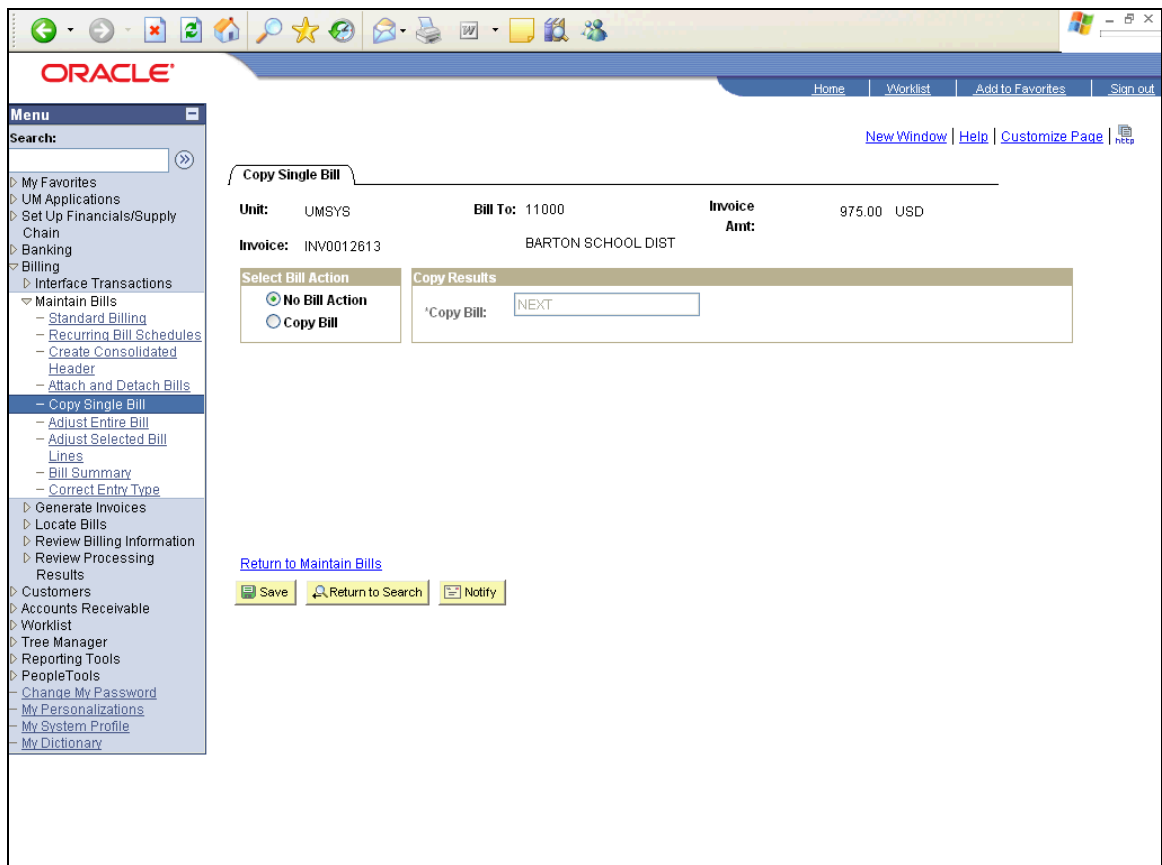

Navigation: Billing > Maintain Bills > Copy Single Bill

The screenshot displays the Oracle UMSYS FS 9.0 Accounts Receivable and Billing interface. The top navigation bar includes links for Home, Worklist, Add to Favorites, and Sign out. The left sidebar contains a menu with various options, including 'Copy Single Bill' which is currently selected. The main content area is titled 'Copy Single Bill' and includes a search bar and several input fields for filtering results. The search bar is labeled 'Find an Existing Value'. Below it, there are input fields for 'Business Unit', 'Invoice', 'Bill Status', 'Customer', and 'Contract'. Each field has a dropdown menu and a search icon. The 'Invoice' field is set to 'begins with'. The 'Bill Status' field is set to '='. The 'Customer' field is set to 'begins with'. The 'Contract' field is set to 'begins with'. There is also a checkbox for 'Case Sensitive'. At the bottom of the search section, there are buttons for 'Search', 'Clear', 'Basic Search', and 'Save Search Criteria'.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
1.	Enter the desired information into the Business Unit field. For this training example, enter " UMSYS ".
2.	Enter the number of the invoice you want to copy into the Invoice field. For this training example, enter " INV0012613 ".
3.	Click the Search button. 

The screenshot shows the Oracle UM SYS FS 9.0 Accounts Receivable and Billing interface. The left sidebar contains a menu with options like 'My Favorites', 'UM Applications', 'Set Up Financials/Supply Chain', 'Banking', 'Billing', 'Interface Transactions', 'Maintain Bills', 'Generate Invoices', 'Locate Bills', 'Review Billing Information', 'Review Processing Results', 'Customers', 'Accounts Receivable', 'Worklist', 'Tree Manager', 'Reporting Tools', 'PeopleTools', 'Change My Password', 'My Personalizations', 'My System Profile', and 'My Dictionary'. The main content area is titled 'Copy Single Bill' and displays the following information:

- Unit:** UMSYS
- Bill To:** 11000
- Invoice Amt:** 975.00 USD
- Invoice:** INV0012613
- BARTON SCHOOL DIST**

Below this information, there are two sections: 'Select Bill Action' and 'Copy Results'.

Select Bill Action: This section contains two radio buttons: 'No Bill Action' (selected) and 'Copy Bill'.

Copy Results: This section contains a text field labeled '*Copy Bill:' with the value 'NEXT'.

At the bottom of the screen, there are three buttons: 'Save', 'Return to Search', and 'Notify'.

Step	Action
4.	Click the Copy Bill option. 
5.	Click the Save button. 
6.	A copy of the bill has been generated and the Copy Results box populates with the new invoice number.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
7.	Click the Go To Bill Header - Gen. Info link to access this page of your new bill. Go To Bill Header - Gen. Info
8.	The copy of the invoice will display. You can enter a new invoice date and make other necessary changes.
9.	The copied invoice's Status defaults to NEW. If you do not want the invoice to print automatically during the nightly update cycle, change the invoice Status to HLD (Hold).
10.	You have successfully completed the procedure for copying a single bill. End of Procedure.

[OK](#) [Cancel](#)

Step	Action
10.	Click the OK button to start the report process. OK
11.	A window opens and displays "Queued," "Processing," and then "Success." Then the proforma invoices display for viewing or printing.

If you use software that blocks pop-up advertisements, you will have to disable it to view and print your invoices. Pop-ups should not be blocked for any PeopleSoft URLs.

Step	Action
12.	You have successfully completed the procedure for printing a range of invoices. End of Procedure.

Entering Payments

Customers make payments as compensation for services or products they have received from the University. Payments will be made to a lockbox at the bank, where a deposit is made into a University account, and fed with information regarding the payments that were made, back to the University. This in turn automatically updates the Accounts Receivable system. Deposits may also have to be made for payments sent directly to the University.

Two important points:

- Checks and other instruments made payable to the University (money orders, etc.) should be restrictively endorsed upon receipt.
- All funds should be deposited on the day received following established procedures unless the campus business office has approved less frequent deposits.

Understanding the Payment Life Cycle

The payment life cycle begins when the payment is received. The deposit may be entered electronically by lockbox interface or Accounts Receivable Cash Receipt Report – PS ARR. After the payments are posted, the customer account balances are updated nightly.

Lockbox Payments/Deposits

A lockbox is a bank account that our customers use to remit their payments. Our bank receives payments on our behalf, making the funds available to our organization as soon as the payments are processed by the bank. The advantage of a lockbox account is that the funds are available the same day the payment is received.

PeopleSoft allows the bank to electronically feed the deposit and payment information from the lockbox account into the PS AR Module. This eliminates the need for someone to manually enter the payment and deposit information into Receivables. The bank will make two deposits from each campus bank lockbox, one for all recognized customer payments and one for all unrecognizable customer payments.

Recognized Customer Payments: Commerce Bank will feed a file for each retail lockbox to AR to post all payments. The total dollar amount of the file will match the amount of the bank deposit. These are the payments received by the bank *with* the invoice remittance that can be scanned easily by the bank.

Unrecognized Customer Payments: Commerce Bank will feed a file for each wholesale lockbox to AR to be posted by the Campus Accounting Departments. The total dollar amount of the file will match the amount of the bank deposit.

The Campus Accounting Departments are responsible for posting the payments to the correct customer account.

For instructions on how to enter the different types of ARR deposits, retrieve existing ARRs, and approve ARRs, refer to the Cash Receipts Reports (CRRs and ARRs) training materials on the [General Ledger](#) page of the Division of IT training website.

Credit Management

The implementation of the PeopleSoft Accounts Receivable/Billing (AR/BI) Module provided an opportunity for the University of Missouri to establish a credit management policy for receivables originating from non-student billings. This management process begins with the issuance of the initial invoice to the customer and ends when payment is received from the customer or the invoice is written-off as uncollectible. The responsibility to create invoices and follow up on unpaid invoices on a monthly basis rests with campus departments. The campus accounting offices will perform an oversight function. The Grants Offices will handle grant customers.

An aging report indicating items over 180 days will be available to the department for review. The department can request to delay the write-off of particular items due to extenuating circumstances or customer history. Once an invoice is written-off, the item is forwarded to a collection agency. The amount written-off is charged to the original invoices's ChartField as a reduction of revenue.

Invoice Collection Procedures

Campus Department's Responsibilities

Campus departments who prepare billings to external customers will perform one or more of the following procedures, depending on the length of the collection cycle:

1. Create customer invoices using the AR/BI module.
2. Review the aged account receivable report at least once a month in PS Search Options.
3. Contact customers to request payments on past due invoices.
 - a. The department must contact the customer at least once within 90 days of the original invoice date if payment has not been received.
4. Review the Upcoming Write-off Report that lists items 150 days or older to be written-off after 180 days (365 days for OSPA), based upon the dates of the original invoices. (This report will be on PS Search Options. Until then the accounting offices will notify departments of invoices to be written off so they can be reviewed by the departments.
5. Request that particular items not be written-off due to extenuating circumstances and/or customer history.

Accounting/Grant Department's Responsibilities

Campus accounting offices will perform the following oversight functions:
Grant offices will perform only the items marked with a *.

1. Review and follow up on the lockbox daily exception report.
 - a. Manually apply payments to appropriate invoices.
2. *Process refunds.
3. Generate, review, and send legal letters to external customers with outstanding invoices greater than 120 days.
4. At the beginning of each month, send a list of invoices for upcoming write-offs to campus departments.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

5. *Establish an allowance for uncollectible accounts receivable by fund at the end of each fiscal year based upon a percentage of the accounts receivable year-end balance.
6. *Process write-offs.
7. *Submit unpaid customer invoices > \$100.00 to the collection agency.
8. *Maintenance of customer account balances.

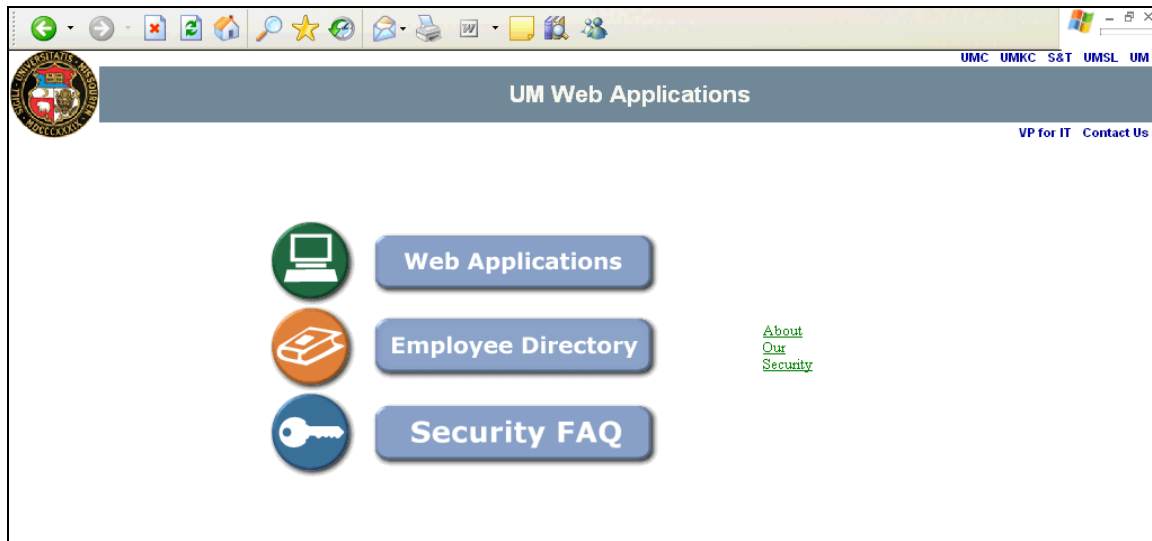

View or Print Age Analysis Reports

One of the tools available in PeopleSoft to assist in the credit management process is the aging report. Aging reports are generated at the second or third day of the calendar month and are available under PS Search Options on the Web. Campus departments may also use the inquiry panels to inquire on customer balances.

Procedure

Navigation: Using Internet Explorer, go to <https://webapps.umsystem.edu/>.

Step	Action
1.	Click the Web Applications button and then log in using your User ID and password. 

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Step	Action
2.	<p>A list of links for various Web applications will display.</p> <p>Click the PS Search Options link.</p> <p>Note: The links available on this page will vary depending on your security access.</p> <p></p>
3.	<p>Click the AR/BI Aging Report list item in the in drop-down list.</p> <p></p>
4.	<p>Click the Submit button.</p> <p></p>
5.	<p>The Report Type options are 1) Detail, which shows the detail information for all invoices for a customer, and 2) Summary, which shows aging by customer for an operation, but no invoice number or details are given.</p> <p>For this training example, click the DETAIL list item in the Report Type drop-down list.</p> <p></p>
6.	<p>Aging Reports are based on the Billing Specialist "Biller" that is used when you invoice.</p> <p>To select the Billing Specialist, click the drop-down list and scroll as needed to find the name of the operation. For this training example, click on the CAGRCLTR list item.</p>
7.	<p>Click the go button to submit the search.</p> <p></p>
8.	<p>The aging report will display in a separate browser window.</p> <p>You can click on the forward and backward buttons (arrow buttons) at the upper left of the page to view the report.</p>
9.	<p>To print the report, click on the printer icon at the top of the page. Click the Print Pages button.</p> <p></p>
10.	<p>The Print dialog box will display.</p> <p>Adjust the settings as needed and click on the Print (printer icon) button.</p>
11.	<p>Another window will display that confirms that the report is printing.</p>
12.	<p>You have successfully completed the procedure for viewing and printing an age analysis report.</p> <p>End of Procedure.</p>

Collecting and Writing-Off a Customer Invoice

An invoice ages from the date of the invoice. In this section, sample late letters are shown for 60 days, 90 days, and 120 days past due.

Example 1 – late letter (60 days past due)

November 8, 2002

City of Columbia – Finance
Attn: Accounts Payable
PO Box 7236
Columbia, MO 65205

Re: Customer Account #1943

Invoice Date	Invoice #	PO #	Amount	Billing Department
8/28/02	INV0004165	020834	282.08	Printing Services@573-882-5945
8/28/02	INV0004273	020801	6,547.08	Printing Services@573-882-5945
9/01/02	INV0006541	021769	3,670.30	Printing Services@573-882-5945
8/24/02	INV0003795	020836	66.25	ExtentionPublications@573-882-7216
9/02/02	INV0006826	021381	119.71	ExtentionPublications@573-882-7216

The invoice(s) listed above are PAST DUE.

1. If you recently paid the invoice(s) listed above, please disregard this notice. If the above list indicates you have unapplied credit memos or on-account payments (OA), please contact the Billing Department listed next to these items.
2. Should you have any reason to believe this is not a valid debt, please notify the Billing Department listed next to your outstanding invoice.

Sincerely,

University of Missouri

60-day Dunning Letter revised 12/04/02

Example 2 – late letter (90 days past due)

November 8, 2002

City of Columbia – Finance
Attn: Accounts Payable
PO Box 7236
Columbia, MO 65205

Re: Customer Account #1943

Invoice Date	Invoice #	PO #	Amount	Billing Department
8/28/02	INV0004165	020834	282.08	Printing Services@573-882-5945
9/02/02	INV0006826	021381	119.71	ExtentionPublications@573-882-7216

2nd Notice: The invoice(s) listed above are PAST DUE.

1. If you recently paid the invoice(s) listed above, please contact the Billing Department listed next to the outstanding invoice IMMEDIATELY to resolve this issue.
2. If you are unable to remit the full amount, please contact the Billing Department listed next to the outstanding invoice to make satisfactory arrangements for payment by installments.
3. Should you have any reason to believe this is not a just and lawful claim, please notify the Billing Department listed next to your outstanding invoice immediately after receiving this notice.

If we do not hear from you within 30 days, we will refer your account to the Legal Department of the University.

Sincerely,
University of Missouri

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Example 3 – late letter (120 days past due)

The following is an example of the legal letter that will be sent at 120 days.

November 8, 2002

City of Columbia – Finance
Attn: Accounts Payable
PO Box 7236
Columbia, MO 65205

Re: Customer Account #1943

Invoice Date	Invoice #	PO #	Amount	Billing Department
8/28/02	INV0004165	020834	282.08	Printing Services@573-882-5945

Your invoice(s), as indicated above, for services rendered from the University of Missouri has been referred to the Legal Department of the University because of your nonpayment of this obligation.

This letter is your notification that the University is making demand for immediate payment of the amount indicated above. If you are unable to remit the full amount, it will be necessary for you to make satisfactory arrangements for payment by installments. However, an installment plan cannot be considered unless you make a substantial partial payment at this time.

Should you have any reason to believe that this is not a just and lawful claim, you should notify the Billing Department listed above within fifteen (15) days from the receipt of this letter stating the reason. Should you fail to contact the Billing Department by way of payment or installment proposal or provide justification for not owing this account, we shall proceed to take all necessary steps to protect the legal interest of the University of Missouri.

Sincerely,

Phillip J. Hoskins
Counsel

PJH/kme

Legal letter ARBI revised 11/29/02

Invoice Write-Offs

The Campus Accounting departments will write-off invoices after 180 days of inactivity unless campus departments request otherwise. Grants will do write-offs after 365 days. The departments will review the Upcoming Write-off Report, which shows the number of days late for all invoices that are over 150 days late. This reminds the department of those invoices that are still open after all letters have been sent. The department reviews this list and makes any final effort at collection. At the end of the month all the invoices on the list will be written off.

Each month the departments can access their aging report in PS Search Options. It is updated every Friday at noon. To delay a write-off of an invoice the Request to Delay AR Write-Off must be completed and submitted by the 15th of the current month. If approved, the invoice write-off will be delayed for one month. If not approved, then the write-off will be performed by the end of the current month.

An allowance for Uncollectible Accounts, set up by fund, will be established every year. It is not to go against invoices, but will represent a percentage of write-offs. Normal write-offs will offset the revenue credited for the original invoice.

Request to Delay AR Write-Off Form

To delay a write-off, please use the Request to Delay A/R Write-Off form. To access the form electronically, go to MS Outlook and select: File > New > Choose Form. Highlight UM Request to Delay Write-Off and click Open.

Complete the form in its entirety and e-mail it to your Campus Accounting department (see addresses below) no later than the 15th of the month after the item appears on your Monthly A/R Pending Write-Off Report. If approved, the invoice write-off will be delayed for one month only. **Note: A new form must be submitted and approved if additional one-month write-off extensions are required.** If not approved, the write-off will be performed by the end of the current month.

- UMC:** Select from your e-mail box UMC ACCTG ACCT REC. If you are off campus and need an actual e-mail address it is: umcacctga@missouri.edu.
- UMHS:** UMHS Hospital Accounting or UMHSHOSPITALACCOUNTING@HEALTH.MISSOURI.EDU
- UMKC:** UMKCARFolder or UMKCARFOLDER@UMKC.EDU
- UMR:** UMR Accounting A/R Billing or ARBILL@UMR.EDU
- UMSL:** UMSL Cashiers or UMSLCASH@MSX.UMSL.EDU
- UM System:** UM System AR Requests or ARREQUESTS@UMSYSTEM.EDU

Appendix—ARBI Query Listing

Below is a list of queries designed to address ARBI reporting needs. The queries have been sorted into categories.

Note: If your offices would like to modify these queries to better suit your needs, **please save them with a different name**, so that the original query will not be corrupted. These are intended for use by everyone using ARBI.

Campus Accounting Offices:

- 1) ARBI_JOURNAL_LOOKUP** - This query prompts you for the journal number for an ARBI transaction, e.g., AR0# or BI0 #, to find out what invoice or reference numbers are included in that journal number.
- 2) BI_INVOICES_NOT_PRINTED** - This query produces a list of all non-cancelled invoices that have not been printed. This could mean the invoice has just been created, has a BCM error, or is in hold status. A prompt is used to select a particular Business Unit.
- 3) BI_INVOICE_CANCEL_ADJUST** - This query produces a list of all invoices that have either been cancelled or adjusted.
- 4) BI_INV_OPERID** - This query prompts for an invoice number and will return the Operator ID for an invoice. (This would be the creator or the last person to update an invoice.)
- 5) BCM_ERRORS_BI** - This query produces a list of all invoices containing BCM errors. These errors must be corrected prior the invoice printing or posting to the GL.
- 6) CUSTOMER_BALANCES_UMKC** - This query produces a list of current balances for all UMKC customers. This query may be modified to fit your campus.
- 7) CUSTOMER_CREDIT_BALANCES** - This query produces a list of customers with credit balances. This would assist with refund processing.
- 8) CUSTOMER_LIST_ACTIVE** - This query pulls up all active customers for ARBI.
- 9) AR_ACTIVITY_DEPTID** - This query produces a list of all AR activity by DeptID for a particular Business Unit.
- 10) AR_ACTIVITY_TYPE** - This query produces a list of all AR activity by Bill Type for a particular Business Unit.
- 11) AR_OPEN_ONACCOUNT_ITEMS** - This query prompts for a Business Unit and lists items with an OA prefix not in a closed status.

Training Guide

UMSYS FS 9.0 Accounts Receivable and Billing

Either Campus Accounting Offices or Campus Departments:

- 1) **BI_INVOICES_NOT_PRINTED** - This query produces a list of all non-cancelled invoices that have not been printed. This could mean the invoice has just been created, has a BCM error, or is in hold status.
- 2) **BI_INVOICE_CANCEL_ADJUST** - This query produces a list of all invoices that have either been cancelled or adjusted.
- 3) **BCM_ERRORS_BI** - This query produces a list of all invoices containing BCM errors. These errors must be corrected prior to the invoice printing or posting to the GL.
- 4) **CUSTOMER_BALANCES_UMKC** - This query produces a list of current balances for all UMKC customers. This query may be modified to fit your campus.
- 5) **AR_ACTIVITY_DEPTID** - This query produces a list of all AR activity by DeptID for a particular Business Unit.
- 6) **AR_ACTIVITY_TYPE** - This query produces a list of all AR activity by Bill Type for a particular Business Unit.
- 7) **AR_OPEN_ITEMS_BI_SPECIALIST** - This query lists outstanding invoices and prompts by Billing Specialist. An alternative report would be the Aging Report located in the PS Search Options on the MIS Web Applications Web site.
- 8) **AR_PAYMENT_SEARCH** - This query allows you to search for a payment by amount.
- 9) **BILL_PAYMENT_SEARCH** - This query allows you to search for an invoice amount in the event you do not know the invoice number.
- 10) **PAYMENT_SEARCH_BY_CK_NUMBER** - This query allows to you to search for a payment by entering the check number, which needs to be 15 characters starting with CK or CC.
- 11) **PAYMENT_SEARCH_BY_CUSTID** - This query allows you to search for all payments that have posted to the customer number.
- 12) **ARBI_PROJECT_LOOKUP** - This query provides the user with project end dates based on the active or inactive file in PS.
- 13) **ARBI_WRITEOFFS** - This query prompts for Business Unit and returns a list of all Write Offs and Reverse Write Offs done in PS. You may sort by Business Unit for locating the write-offs of an individual department. This query must be run in Production.
- 14) **AR_CUSTOMER_ACCOUNT** - This query prompts for customer number and returns a list of invoices and OAs sorted by group ID. It is useful in identifying OA matches to invoices without having to use PS panels and also returns check numbers when the payment was directly applied. This may be beneficial when researching a customer's payment history for a breakdown by invoice. This query must be run in Production.

15) ARBI_ALL_INVOICES_OPRID – This query prompts for Business Unit, Invoice Dates, and Operator ID and provides the user with a list of invoices created by the Operator ID within the time frame specified.

16) AR_OPEN_INVOICES – This query provides the user with a current list of all open AR items in the system (not including on-accounts or credit invoices). This can be a useful tool when searching for an invoice solely by amount.

17) AR_WORKC_LEDGER_BAL - This query is to be run monthly to determine which items remain in the BU WORKC at the end of every month. The items listed in the query results must be transferred to a campus Business Unit at the end of every month in order for the month to close with WORKC in balance. The Ledger query identifies the amount. The Customer query identifies the customer(s). The campuses are to run these queries periodically throughout the month to keep the balance at a minimum.

18) CUSTOMER_BALANCE_BU - This query produces a list of current balances. The Business Unit is prompted; therefore it can be used for any Business Unit. This query must be run in Production.
