ITS UPDATE
April 2022

ITS Project Pipeline:
Limiting Desktop Administrator Access

As part of a long-term project and directive from campus and system leadership to secure the digital assets and information of the University, UMSL ITS along with other UM campuses are working on a project to limit the use of administrator level accounts on computer workstations. This is a key step in preventing malware and ransomware on our computers and in our sensitive data stores.

This project will roll out slowly first for new installations and newly imaged systems by limiting the end users everyday user ID (SSO) from the local administrator group on all university owned computer workstations. Their account would be a regular user, with limited access to install software, including malware which in turn creates a much safer computing environment. If a need for administrator access arises overtime, we have solutions in place to meet a need.

As always, it is the goal of IT to enable our users to be productive as possible and put as few barriers in front of them as possible while keeping a secure/stable environment. As times change and the world changes, we must change and adapt as well to keep our systems available.

While we are early in the process we did want to be transparent and communicate about this important initiative. More information will become available as the project progresses in the upcoming months.

Congrats Upcoming Graduates!

UMSL ITS wishes you well on your future endeavors!

Join the UMSL ITS Team Today!

UMSL ITS is seeking qualified candidates to join our team!
Available Positions:

- Systems Support Analyst-Entry (Job ID #41203)
- Business Tech Analyst-Expert (Job ID#40775)
- Database Programmer/Analyst (Job ID#39163)
