

Wireless Network Configuration → Android

These instructions assume this is not the first setup of the Android device. The Android Operating System has a reputation of varying slightly from one manufacturer to another. There may be small differences in the settings but they should be very close to the following:

1. Touch the Menu Key then select “Settings”.
2. Touch “Wireless and network”.
3. Select Wi-Fi settings.
4. The device will automatically locate available networks. Touch eduroam,
7. A dialog box will appear Enter your umsystem username and password, with your username in the form of: ssoid@umsystem.edu touch ‘connect’ after entering your password.

5. You are now connected to the eduroam network.
