FamilyForward is a local non-profit agency that serves children who have faced physical and emotional trauma. We understand the impact of a loving family and believe that every child should be part of one. Our passion comes from knowing we can achieve this and that we can make a positive difference by empowering families to reach their full potential.

We are seeking a full time therapist in our Family Support Partner (FSP) program with social work or counseling licensure or provisional licensure in the State of Missouri to join our team. Our FSP team provides counseling, psycho education, parent coaching and case management for families of children from birth through age 19, who have experienced or are at high-risk for abuse, neglect or trauma. This position will meet with St. Louis City and St. Louis County families in their homes or community, and use trauma-informed approaches to increase the family’s knowledge of positive parenting, improve relationships between children and caregivers, reduce mental health symptoms, and promote resiliency.

An ideal candidate will have 2 to 3 years clinical experience working with children and families. The FSP therapist must have a Master’s Degree in Social Work, Psychology or a closely related degree and at minimum a provisional license. Graduate course work or clinical experience regarding trauma and child development is a plus.

FamilyForward offers an excellent working environment with exceptional professional development training opportunities, a comprehensive benefits package including Medical, Dental, Vision, Life and LTD Insurance, 403(b) retirement match, paid holidays, sick and vacation time, Education Assistance, EAP, Disability Programs and a flexible full-time work schedule.

Job Type: Full-time
